The Cremation of Sam McGee Robert Service, 2013-03-01 In 1986 Kids Can Press published an edition of Robert Service's "The Cremation of Sam McGee" illustrated by painter Ted Harrison, who used his signature broad brushstrokes and unconventional choice of color to bring this gritty narrative poem to life. Evoking both the spare beauty and the mournful solitude of the Yukon landscape, Harrison's paintings proved the perfect match for Service's masterpiece about a doomed prospector adrift in a harsh land. Harrison's Illustrator's Notes on each page enhanced both poem and illustrations by adding valuable historical background. Upon its original publication, many recognized the book as an innovative approach to illustrating poetry for children. For years *The Cremation of Sam McGee* has stood out as a publishing landmark, losing none of its appeal both as a read-aloud and as a work of art. Kids Can Press proudly publishes this deluxe hardcover twentieth anniversary edition --- complete with a spot-varnished cover, new cover art and heavy coated stock --- of a book that remains as entrancing as a night sky alive with the vibrant glow of the Northern Lights.

How Tobacco Smoke Causes Disease ,2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Introduction to Information Retrieval Christopher D. Manning, Prabhakar Raghavan, Hinrich Schütze, 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections.

All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

China's Evolving Surface Fleet Peter Dutton, Ryan D. Martinson, 2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin blue-water, or far-seas operations, helping the United States to predict the future nature of Chinese maritime missions. You Are Not Your Brain Jeffrey Schwartz MD, Rebecca Gladding MD, 2012-06-05 Two neuroscience experts explain how their 4-Step Method can help identify negative thoughts and change bad habits for good. A leading neuroplasticity researcher and the coauthor of the groundbreaking books *Brain Lock* and *The Mind and the Brain*, Jeffrey M. Schwartz has spent his career studying the human brain. He pioneered the first mindfulness-based treatment program for people suffering from OCD, teaching patients how to achieve long-term relief from their compulsions. Schwartz works with psychiatrist Rebecca Gladding to refine a program that successfully explains how the brain works and why we often feel besieged by overactive brain circuits (i.e. bad habits, social anxieties, etc.) the key to making life changes that you want—to make your brain work for you—is to consciously choose to “starve” these circuits of focused attention, thereby decreasing their influence and strength. *You Are Not Your Brain* carefully outlines their program, showing readers how to identify negative impulses, channel them through the power of focused attention, and ultimately lead more fulfilling and empowered lives.

Grave Misfortune: The USS Indianapolis Tragedy Richard A. Hulver, 2019-06-03 Dedicated to the Sailors and Marines who lost their lives on the final voyage of USS Indianapolis and to those who survived the torment at sea

following its sinking. plus the crews that risked their lives in rescue ships. The USS Indianapolis (CA-35) was a decorated World War II warship that is primarily remembered for her worst 15 minutes. . This ship earned ten (10) battle stars for her service in World War II and was credited for shooting down nine (9) enemy planes. However, this fame was overshadowed by the first 15 minutes July 30, 1945, when she was struck by two (2) torpedoes from Japanese submarine I-58 and sent to the bottom of the Philippine Sea. The sinking of Indianapolis and the loss of 880 crew out of 1,196 --most deaths occurring in the 4-5 day wait for a rescue delayed --is a tragedy in U.S. naval history. This historical reference showcases primary source documents to tell the story of Indianapolis, the history of this tragedy from the U.S. Navy perspective. It recounts the sinking, rescue efforts, follow-up investigations, aftermath and continuing communications efforts. Included are deck logs to better understand the ship location when she sunk and testimony of survivors and participants. For additional historical publications produced by the U.S. Naval History and Heritage Command, please check out these resources here: <https://bookstore.gpo.gov/agency/naval-history-heritage-command> Year 2016 marked the 71st anniversary of the sinking and another spike in public attention on the loss -- including a big screen adaptation of the story, talk of future films, documentaries, and planned expeditions to locate the wreckage of the warship.
