Copyright and the Music Marketplace United States Copyright Office,2015-12-21 The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. Moreover, the Office has underscored the need for a comprehensive approach to copyright review and revision generally. This is especially true in the case of music licensing the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.

WorkInspired: How to Build an Organization Where Everyone Loves to Work Aron Ain, 2018-10-05 Axiom Business Book Award Silver Medalist in Leadership • Soundview Best Business Book A “Highest Rated CEO” who has transformed his organization into a billion-dollar company and a “Top Place to Work” shows leaders how truly prioritizing employees isn’t just good for employees—it’s good for business. Imagine a company where everybody loves to work, where employees feel not just “satisfied” but truly cared for, respected, and energized. Think of the impact this would have on recruitment, retention, customer satisfaction, innovation, and overall performance. Aron Ain, the award-winning CEO of Kronos, a global provider of workforce management and human capital management cloud solutions, believes that anything is possible when people are inspired. By embracing employee development and engagement as a growth strategy, Ain transformed his

company's culture and built a billion-dollar business. This book takes leaders and managers inside Kronos's highly admired WorkInspired culture, showing them the surprisingly simple rules to follow to replicate that success. Ain's inspiring guide reveals the best practices that have earned Kronos distinctions on coveted lists, such as Glassdoor's 100 Best Places to Work, Fortune's 100 Best Companies to Work For, Forbes's America's Best Employers, and the Boston Globe's Top Places to Work. These include over-communicating and truth-telling, trusting your people again and again, holding managers accountable for being great at what they do, allowing employees flexible schedules and open vacation time, challenging your people to put the company out of business with new and revolutionary ideas, and welcoming back boomerang employees. Many executives talk about how "their people are their greatest asset." Ain challenges leaders to "walk the talk" and put people first, whether they oversee a team of five or an organization of 500,000. When they do, employees won't be the only ones who thank them. Customers and shareholders will, too.

Brian Eno Eric Enno Tamm,1995-08-22 Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

SpaceX Erik Seedhouse,2013-06-15 This first account of commercial spaceflight's most successful venture describes the extraordinary feats of engineering and human achievement that have placed SpaceX at the forefront of the launch industry and made it the most likely candidate for transporting humans to Mars. Since its inception in 2002, SpaceX has sought to change the space launch paradigm by developing a family of launch vehicles that will ultimately reduce the cost and increase the reliability of space access tenfold. Coupled with the newly emerging market for governmental, private, and

commercial space transport, this new model will re-ignite humanity's efforts to explore and develop space. Formed in 2002 by Elon Musk, the founder of PayPal and the Zip2 Corporation, SpaceX has already developed two state-of-the-art new launch vehicles, established an impressive launch manifest, and been awarded COTS funding by NASA to demonstrate delivery and return of cargo to the ISS. This book describes how simplicity, low-cost, and reliability can go hand in hand, as promoted in the philosophy of SpaceX. It explains how, by eliminating the traditional layers of internal management and external sub-contractors and keeping the vast majority of manufacturing in house, SpaceX reduces its costs while accelerating decision making and delivery, controls quality, and ensures constant liaison between the design and manufacturing teams.

The Apollo Guidance Computer Frank O'Brien, 2010-06-25 The technological marvel that facilitated the Apollo missions to the Moon was the on-board computer. In the 1960s most computers filled an entire room, but the spacecraft's computer was required to be compact and low power. Although people today find it difficult to accept that it was possible to control a spacecraft using such a 'primitive' computer, it nevertheless had capabilities that are advanced even by today's standards. This is the first book to fully describe the Apollo guidance computer's architecture, instruction format and programs used by the astronauts.

As a comprehensive account, it will span the disciplines of computer science, electrical and aerospace engineering. However, it will also be accessible to the 'space enthusiast'. In short, the intention is for this to be the definitive account of the Apollo guidance computer. Frank O'Brien's interest in the Apollo program began as a serious amateur historian. About 12 years ago, he began performing research and writing essays for the Apollo Lunar Surface Journal, and the Apollo Flight Journal. Much of this work centered on his primary interests, the Apollo Guidance Computer (AGC) and the Lunar Module. These Journals are generally considered the canonical online reference on the flights to the Moon. He was then asked to assist the curatorial staff in the creation of the Cradle of Aviation Museum, on Long Island, New York, where he helped prepare the Lunar Module simulator, a LM procedure trainer and an Apollo space suit for display. He regularly lectures on the Apollo computer and related topics to diverse groups, from NASA's computer engineering conferences, the IEEE/ACM, computer festivals and university student groups.
