The Librarian's Guide to Homelessness Ryan Dowd, 2018 Homelessness is a perennial topic of concern at libraries. In fact, staff at public libraries interact with almost as many homeless individuals as staff at shelters do. In this book Dowd, executive director of a homeless shelter, spotlights best practices drawn from his own shelter's policies and training materials --

Grid-Based Problem Solving Environments Patrick W. Gaffney, James C.T. Pool, 2007-09-05 This volume presents the proceedings of the IFIP TC2 WG 2.5 Conference on Grid-Based Problem Solving Environments: Implications for Development and Deployment of Numerical Software, held in Prescott, Arizona from July 17-21, 2006. It will interest users and developers of both grid-based and traditional problem solving environments, developers of grid infrastructure, and developers of numerical software.

Library Services Platforms American Library Association, Marshall Breeding, 2015 The genre of library services platforms helps libraries manage their collection materials and automate many aspects of their operations by addressing a wider range of resources and taking advantage of current technology architectures compared to the integrated library systems that have previously dominated. This issue of Library Technology Reports explores this new category of library software, including its functional and technical characteristics. It highlights the differences with integrated library systems, which remain viable for many libraries and continue to see development along their own trajectory. This report provides an up-to-date assessment of these products, including those that have well-established track records as well as those that remain under development. The relationship between library services platforms and discovery services is addressed. The report does not provide detailed listings of features of each product, but gives a

general overview of the high-level organization of functionality, the adoption patterns relative to size, types, and numbers of libraries that have implemented them, and how these libraries perceive their performance. This seminal category of library technology products has gained momentum in recent years and is positioned to reshape how libraries acquire, manage, and provide access to their

Index-Based Discovery Services Marshall Breeding, 2018-11-01 This report shares data describing the use of the following discovery services among colleges and universities in the United States: WorldCat Discovery Service and its predecessor WorldCat Local from OCLC, Summon and Primo from Ex Libris, and EBSCO Discovery Service from EBSCO Information Services.

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

Theoretical Optics Hartmann Römer, 2006-03-06 Starting from basic electrodynamics, this volume provides a solid, yet concise introduction to theoretical optics, containing topics such as nonlinear optics, light-matter interaction, and modern topics in quantum optics, including entanglement, cryptography, and quantum computation. The author, with many years of experience in teaching and research, goes way beyond the scope of traditional lectures, enabling readers to keep up with the current state of knowledge. Both content and presentation make it essential reading for graduate and PhD students as well as a valuable reference for researchers.

Mathematical Models of Fluid Dynamics Rainer Ansorge, 2006-03-06 This introduction to the field contains a careful selection of topics and examples without sacrificing scientific strictness. The author guides readers through mathematical modelling, the theoretical treatment of the underlying physical laws and the construction and effective use of numerical procedures to describe the behaviour of the dynamics of physical flow. Both students and experts intending to control or predict the behavior of fluid flows by theoretical and computational fluid dynamics will benefit from the combination of all relevant aspects in one handy volume. The book consists of three main parts: - The design of mathematical models of physical fluid flow; - A theoretical treatment of the equations representing the model, as Navier-Stokes, Euler, and boundary layer equations, models of turbulence, in order to gain qualitative as well as quantitative insights into the processes of flow events; - The construction and effective use of numerical procedures in order to find quantitative descriptions of concrete physical or technical fluid flow situations. This is the first text of its kind to merge all these subjects so thoroughly.

Sanpaku Kate Gavino, 2018-08-29 Marcine is fascinated with the Japanese theory of Sanpaku. It states that seeing the white around the iris of one's eyes is a bad omen. But it's everywhere Marcine looks—her grandmother has it, some of her classmates at Catholic school have it, JFK had it . . . even Marcine might suffer from this odd condition. It's believed that eating a strict macrobiotic diet and meditating is supposed to help, but no matter how much Marcine wants it to, these practices can't save her grandmother, or bring back pop star Selena, or make her life at school any easier . . . ! From critically acclaimed cartoonist Kate Gavino (Last Night's Reading), Sanpaku gives voice to the insecurities that abound in teens of all cultures.

About Betty's Boob Vero Cazot, 2018-06-20 An inspiring and surprisingly comedic tale of loss

and acceptance told largely through silent sequential narrative, *About Betty's Boob* is a seminal work from master storytellers Véro Cazot and Julie Rocheleau. Betty lost her left breast, her job, and her guy. She does not know it yet, but this is the best day of her life.
