Souls in the Great Machine Sean McMullen, 2002-12-15 The great Calculator of Libris was forced to watch as Overmayor Zarvora had four of its components lined up against a wall and shot for negligence. Thereafter, its calculations were free from errors, and that was just as well—for only this strangest of calculating machines and its two thousand enslaved components could save the world from a new ice age. And all the while a faint mirror sun hangs in the night sky, warning of the cold to come. In Sean McMullen's glittering, dynamic, and exotic world two millennia from now, there is no more electricity, wind engines are leading-edge technology, librarians fight duels to settle disputes, steam power is banned by every major religion, and a mysterious siren Call lures people to their death. Nevertheless, the brilliant and ruthless Zarvora intends to start a war in space against inconceivably ancient nuclear battle stations. Unbeknownst to Zarvora, however, the greatest threat to humanity is neither a machine nor a force but her demented and implacable enemy Lemorel, who has resurrected an obscene and evil concept from the distant past: Total War. *Souls in the Great Machine* is the first volume of Sean McMullen's brilliant future history of the world of Greatwinter.

Digital Copyright Jessica Litman, 2001 Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written. —JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia University Litman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. —PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

UNIX Hints & Hacks Kirk Waingrow, 1999 Written by the lead UNIX administrator for Disney's Imagineering Studios, this book delivers one-of-a-kind information to intermediate and experienced computer users. Waingrow explores creative ways of effectively applying technology in a variety of scenarios, combining new tricks with old UNIX commands.

In the Bubble John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of *In the Bubble* is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

Data Politics Didier Bigo, Engin Isin, Evelyn Ruppert, 2019-03-13 Data has become a social and political issue because of its capacity to reconfigure relationships between states, subjects, and citizens. This book explores how data has acquired such an important capacity and examines how critical interventions in its uses in both theory and practice are possible. Data and politics are now inseparable: data is not only shaping our social relations, preferences and life chances but our very democracies. Expert international contributors consider political questions about data and the ways it provokes subjects to govern themselves by making rights claims. Concerned with the things (infrastructures of servers, devices, and cables) and language (code, programming, and algorithms) that make up cyberspace, this book demonstrates that without understanding these conditions of possibility it is impossible to intervene in or to shape data politics. Aimed at academics and postgraduate students interested in political aspects of data, this volume will also be of interest to experts in the fields of internet studies, international studies, Big Data, digital social sciences and humanities. The Open Access version of this book, available at <https://www.routledge.com/Data-Politics-Worlds-Subjects-Rights/Bigo-Isin-Ruppert/p/book/9781138053267>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Beautiful Code Greg Wilson, Andy Oram, 2007-06-26 How do the experts solve difficult problems in software development? In this unique and insightful book, leading computer scientists offer case studies that reveal how they found unusual, carefully designed solutions to high-profile projects. You will be able to look over the shoulder of major coding and design experts to see problems through their eyes. This is not simply another design patterns book, or another software engineering treatise on the right and wrong way to do things. The authors think aloud as they work through their project's architecture, the tradeoffs made in its construction, and when it was

important to break rules. This book contains 33 chapters contributed by Brian Kernighan, Karl Fogel, Jon Bentley, Tim Bray, Elliotte Rusty Harold, Michael Feathers, Alberto Savoia, Charles Petzold, Douglas Crockford, Henry S. Warren, Jr., Ashish Gulhati, Lincoln Stein, Jim Kent, Jack Dongarra and Piotr Luszczek, Adam Kolawa, Greg Kroah-Hartman, Diomidis Spinellis, Andrew Kuchling, Travis E. Oliphant, Ronald Mak, Rogerio Atem de Carvalho and Rafael Monnerat, Bryan Cantrill, Jeff Dean and Sanjay Ghemawat, Simon Peyton Jones, Kent Dybvig, William Otte and Douglas C. Schmidt, Andrew Patzer, Andreas Zeller, Yukihiro Matsumoto, Arun Mehta, TV Raman, Laura Wingerd and Christopher Seiwald, and Brian Hayes. Beautiful Code is an opportunity for master coders to tell their story. All author royalties will be donated to Amnesty International.

Net.wars Wendy Grossman, 1998 London-based American journalist Grossman continues her coverage of the Internet by assessing the battles she believes will define its future. Among them are scams, class divisions, privacy, the Communications Decency Act, women online, pornography, hackers and the computer underground, criminals, and sociopaths. A Practical Approach to Cognitive Behaviour Therapy for Adolescents Manju Mehta, Rajesh Sagar, 2015-02-02 This volume discusses adolescent mental health concerns in non-Western contexts and situations, ranging from common mental disorders to building life skills. It combines previous literature and empirical work on various disorders to provide a comprehensive account of cognitive behaviour therapy (CBT) for adolescents. The volume covers a wide spectrum of conditions, ranging from anxiety to affective disorders and other associated disorders. It gives a practical guide to the management of disorders with specific focus on case vignettes, outlining session details and specific techniques to be used throughout the intervention plan. A detailed appendix elaborating various CBT techniques is included in the volume. It presumes a basic understanding and training in mental health care and psychotherapy and is useful for professionals: psychologists, counsellors, paediatricians and other practitioners in the field of mental health. It is also useful as a text for courses in health psychology, clinical psychology, adolescent medicine and adolescent psychology.

Digital Material Marianne van den Boomen, 2009 This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.

Information Architecture Christina Wodtke, Austin Govella, 2009-01-22 Information Architecture: Blueprints for the Web, Second Edition introduces the core concepts of information architecture: organizing web site content so that it can be found, designing website interaction so that it's pleasant to use, and creating an interface that is easy to understand. This book helps designers, project managers, programmers, and other information architecture practitioners avoid costly mistakes by teaching the skills of information architecture swiftly and clearly.

E-Commerce Strategy Sanjay Mohapatra, 2012-08-16 □□E-Commerce Strategy: Text and Cases provides the fundamental literature required for graduate students and practitioners to understand electronic commerce. Each chapter provides clearly designed learning objectives and review questions to highlight the major topics and goals. This book covers many of the new innovations and technologies that have been established for e-commerce site development. Unlike similar books, topics such as e-channel adoption, factors affecting e-commerce adoption, and strategy design are reviewed in greater depth. Additionally, the book examines areas not normally covered like open source, online research, and peer-to-peer systems. E-Commerce Strategy: Text and Cases is divided into two parts. Part 1 examines the evolution of e-commerce, analyzes different sectors such as B2B and m-Commerce, and explores the challenges they face. Case studies of well known companies reinforce the concepts learned to demonstrate both successes and failures in the field. Part 2 deals with developing strategies in e-Commerce and looks at future trends including Web 2.0. Overall, the useful guidelines provided should prove valuable to students and researchers in the field.

How Canadians Communicate David Taras, Frits Pannekoek, Maria Bakardjieva, 2003 How Canadians Communicate, Vol. 1 is a timely collection that chronicles the extraordinary changes that are shaking the foundations of Canada's cultural and communications industries in the twenty-first century. With essays from some of Canada's foremost media scholars, this book discusses the major trends and developments that have taken place in government policy, corporate strategies, creative communities, and various communication mediums: newspapers, films, cellular and palm technology, the Internet, libraries, TV, music, and book publishing. This volume addresses many issues unique to Canada in a broader framework of global communications. Specifically, it looks at new media communications in Aboriginal communities, the changing role of the state in cultural institutions, the conglomeratization of the media, the threat of American and global communications to Canadian voices, and the struggle to retain and reclaim local and national identities in the face of globalization. With articles from academics and professionals across Canada, How Canadians Communicate, Vol.1 provides the most current perspectives on communication in Canada in a rapidly changing world of technology and global communication.

Globalization George Ritzer, Paul Dean, 2019-02-26 A concise exploration of globalization and its role in the contemporary era Driven by technological advancements and global corporations, more and more people are swept up by globalizing processes, creating new winners and losers. Globalization: The Essentials explores the flows, structures, processes, and consequences of globalization in the modern economic, political, and cultural landscape. This comprehensive introduction offers balanced coverage of areas such as global economic and cultural flows, environmental sustainability, the impact of technology, and racial, economic, and gender inequality – providing readers with foundational knowledge of globalization. Extensively revised and updated, this second edition includes expanded coverage of human trafficking and migration, global climate change, fake news and information wars, and transnational social movements with increased emphasis on examples from Central and South America, Africa, and Asia: Offers a straightforward approach to the multiple facets of globalization and their positive and negative influences on contemporary society Employs unique metaphors and a coherent narrative structure to promote intuitive understanding of abstract concepts Introduces cutting-edge research, updated

statistics, and real-world examples in areas such as rising global populism, social justice movements, blockchain technology, and cryptocurrencies. Provides an efficient and flexible pedagogical structure, allowing integration with instructor's own course material. Emphasizing student comprehension, a wide range of source material is incorporated including empirical research, relevant theories, newspaper and magazine articles, and popular books and monographs. Examples of current research and recent global developments, such as emerging economies and global health concerns, encourage classroom discussion and promote independent study. *Globalization: The Essentials* – a compact edition of the authors' full-sized textbook *Globalization: A Basic Text* – provides concise coverage of the central concepts of this dynamic field. Offering a multidisciplinary approach, this textbook is an invaluable primary or supplemental resource for undergraduate study in any social science field, as well as coursework on economics, migration, inequality and stratification, and politics.

Forever Free Joe Haldeman, 2016-09-27 "A well-written and worthy sequel to one of SF's enduring classics"—the Nebula Award winner *The Forever War*—now with a bonus story, "A Separate War" (Publishers Weekly). On virtually every list of the greatest military science fiction adventures ever written, Joe Haldeman's Hugo and Nebula Award-winning classic, *The Forever War*, is ranked at the very top. In *Forever Free*, the Science Fiction Writers of America Grand Master and author of the acclaimed *Worlds* series returns to that same volatile universe where human space marines once engaged the alien Taurans in never-ending battle. While loyal soldier William Mandella was fighting for the survival of the human race in a distant galaxy, thousands of years were passing on his home planet, Earth. Then, with the end of the hostilities came the shocking realization that humanity had evolved into something he did not recognize. Offered the choice of retaining his individuality or becoming part of the genetically modified shared Human hive-mind, Mandella chose exile, joining other veterans of the *Forever War* seeking a new life on a wasteland world they called Middle Finger. Making a home for themselves in this half-frozen hell, Mandella and his life partner, Marygay, have survived into middle age, raising a son and a daughter in the process. Now, the dark truth about the colonists' ultimate role in the continuation of the Human group mind will force Mandella and Marygay to take desperate action as they hijack an interstellar vessel and set off on a frantic escape across space and time. But what awaits them upon their return is a mystery far beyond all human—or Human—comprehension . . . In *Forever Free*, Joe Haldeman's stunning vision of humankind's far future reaches its enthralling conclusion in a masterwork of speculation from the mind and heart of one of the undisputed champions of hard science fiction. And in the bonus story included in this volume, "A Separate War," Marygay, reassigned and separated from her lover, Mandella, continues fighting in military engagements across the stars—all the while planning how she and Mandella can reunite despite the time and space between them.

The Turing Option Harry Harrison, 2012-07-03 *Turing Option* is written by Harry Harrison who is also the author of *Deathworld*, *Make Room! Make Room!* (filmed as *Soylent Green*), the popular *Stainless Steel Rat* books, and many other famous works of SF. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Literary Criticism Mark Bauerlein, 2013-04-19 As the study of literature has extended to cultural contexts, critics have developed a language all their own. Yet, argues Mark Bauerlein, scholars of literature today are so unskilled in pertinent sociohistorical methods that they compensate by adopting clichés and catchphrases that serve as substitutes for information and logic. Thus by labeling a set of ideas an ideology they avoid specifying those ideas, or by saying that someone essentializes a concept they convey the air of decisive refutation. As long as a paper is generously sprinkled with the right words, clarification is deemed superfluous. Bauerlein contends that such usages only serve to signal political commitments, prove membership in subgroups, or appeal to editors and tenure committees, and that current textual practices are inadequate to the study of culture and politics they presume to undertake. His book discusses 23 commonly encountered terms—from deconstruction and gender to problematize and rethink—and offers a diagnosis of contemporary criticism through their analysis. He examines the motives behind their usage and the circumstances under which they arose and tells why they continue to flourish. A self-styled handbook of counterdisciplinary usage, *Literary Criticism: An Autopsy* shows how the use of illogical, unsound, or inconsistent terms has brought about a breakdown in disciplinary focus. It is an insightful and entertaining work that challenges scholars to reconsider their choice of words—and to eliminate many from critical inquiry altogether.

Entrepreneurial Small Business Jerry Katz, 2008-01-01 *Entrepreneurial Small Business (ESB)* provides students with a clear vision of small business as it really is today: Katz focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth. Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com or the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

Facebook Application Development Nick Gerakines, 2008-05-05 The wildly popular Facebook social networking platform has published an open Application Programming Interface (API) and developers are eating it up—60,000 signed up to use it in the first few days; with this API, any programmer can create applications and new features for Facebook. Explores and explains the components available to programmers, including working with Facebook Markup Language (FBML), querying Facebook with FQL, application layout and flow, advanced configuration and performance tuning, and more. Businesses such as NBC, Yahoo!, Red Bull, Forbes, and the Washington Post are building branded applications to reach the growing Facebook community.
