Tourism in the City Nicola Bellini, Cecilia Pasquinelli, 2016-08-29 This book critically explores the interconnections between tourism and the contemporary city from a policy-oriented standpoint, combining tourism perspectives with discussion of urban models, issues, and challenges. Research-based analyses addressing managerial issues and evaluating policy implications are described, and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well-being of local communities, e.g., in terms of quality spaces, employment, accessibility, innovation, and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development, including the rise of anti-tourism movements as a reaction to touristification, cultural commodification, and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon, and the supposedly unavoidable trade-off between the interests of residents and tourists is critically questioned.

100 Words To Make You Sound Smart American Heritage Dictionaries, 2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from

the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. *100 Words to Make You Sound Smart* provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

Theoretical Optics Hartmann Römer, 2006-03-06 Starting from basic electrodynamics, this volume provides a solid, yet concise introduction to theoretical optics, containing topics such as nonlinear optics, light-matter interaction, and modern topics in quantum optics, including entanglement, cryptography, and quantum computation. The author, with many years of experience in teaching and research, goes way beyond the scope of traditional lectures, enabling readers to keep up with the current state of knowledge. Both content and presentation make it essential reading for graduate and PhD students as well as a valuable

reference for researchers.

90 Two Dastan Khalili, 2022-02-02 **90 Two By:** Dastan Khalili **DiaVerse**, dia meaning “two” and verse for the poetic rhyme, is a brand-new style of poetry where the only rule is all stanzas must have a maximum of two words. Created by poet Dastan Khalili, the style of **DiaVerse** breathes new life into poetry. The restraint of **DiaVerse** forces poets to use the purest forms of expression. **90 Two** is ninety of Khalili’s **DiaVerse** poems, written over the last five years. He combines his poetic verses with digital artwork and imagery, each conveying a sensation of inspiration that came to life with each poem.

Mathematical Models of Fluid Dynamics Rainer Ansorge, 2006-03-06 This introduction to the field contains a careful selection of topics and examples without sacrificing scientific strictness. The author guides readers through mathematical modelling, the theoretical treatment of the underlying physical laws and the construction and effective use of numerical procedures to describe the behaviour of the dynamics of physical flow. Both students and experts intending to control or predict the behavior of fluid flows by theoretical and computational fluid dynamics will benefit from the combination of all relevant aspects in one handy volume. The book consists of three main parts: - The design of mathematical models of physical fluid flow; - A theoretical treatment of the equations representing the model, as Navier-Stokes, Euler, and boundary layer equations, models of turbulence, in order to gain qualitative as well as quantitative insights into the processes of flow events; - The construction and effective use of numerical procedures in order to find quantitative descriptions of concrete physical or technical fluid flow situations. This is the first text of its kind to merge all these subjects so thoroughly.

The Tourist City Dennis R. Judd,Susan S. Fainstein,1999-01-01 An investigation of tourism and its transforming impact on cities, by urban experts from a variety of disciplines. They examine such tourist meccas as Las Vegas, Orlando and Boston, and take up themes such as the marketing of cities and how tourists perceive places.

Geometry, Particles, and Fields Bjørn Felsager,Carsten Claussen,1981 Teil 1: Basic properties of particles and fields. Teil 2: Basic principles and applications of differential geometry

Tourism Social Media Ana Maria Munar,Szilvia Gyimothy,Liping Cai,2013-07-18 This volume addresses the transformative power of tourism social media and offers novel theoretical and methodological approaches to its academic investigation. Acknowledging the collective value creation mechanisms of new media, the authors explore how technology nurtures, augments and modifies social or commercial interactions in tourism.

Tourist Clusters, Destinations and Competitiveness Francesco Capone,2015-12-14 Tourism has become one of the largest and fastest growing sectors in the world economy. Increasingly, research on tourism destinations has been at the centre of debates concerning destination competitiveness, governance, policies and destination management and marketing. This book investigates tourist destinations from two different perspectives. First, it approaches destinations using the concept of tourist clusters and investigates their role in competitiveness and firm performances. The second perspective studies the development of models of competitiveness and governance. It also develops an international benchmarking system of 15-EU

countries, with an additional focus on Italy, UK and United States. The book will appeal to academics, scholars and practitioners in tourism studies, management, urban and regional studies and economic geography, etc.

Rethinking Place Branding Mihalis Kavaratzis, Gary Warnaby, Gregory J. Ashworth, 2014-11-25 As Place Branding has become a widely established but contested practice, there is a dire need to rethink its theoretical foundations and its contribution to development and to re-assert its future. This important new book advances understanding of place branding through its holistic, critical and evidence-based approach. Contributions by world-leading specialists explore a series of crucially significant issues and demonstrate how place branding will contribute more to cultural, economic and social development in the future. The theoretical analysis and illustrative practical examples in combination with the accessible style make the book an indispensable reading for anyone involved in the field.

Linking Urban and Rural Tourism Susan L Slocum, Carol Kline, 2017-06-16 Destinations rely on regional strategies to support and enhance the tourism product through regional partnerships and integration. Integrated tourism is defined as tourism that is explicitly linked to the economic, social, cultural, natural and human structures of the region in which it occurs. Integrated tourism has evolved to include numerous meanings and definitions, but generally includes a vertical business or industry approach. The first of its kind, this book applies a more inclusive approach to integration by providing insight into inclusive regional development strategies that support both the needs of urban and rural areas whilst enhancing the tourist experience, supporting the positive impacts of tourism and mitigating the negative.

Regional studies tend to portray either an urban or rural focus without acknowledging that often these spaces constitute joint governance structures, similar historical and cultural roots, and economic dependencies. Sustainable tourism promotes sourcing locally, such as using rural agricultural products in urban tourism experiences. Furthermore, innovative rural marketing strategies linking tourism heritage, attractions, food and drink trails, and artisans with urban visitors are emerging. Including theoretical and applied research and international case studies, this will be a valuable resource to academics, students and practitioners working in tourism development and regional policy.

Towards Effective Place Brand Management Gregory Ashworth, Mihalīs Kavaratzis, 2010-01-01 Many facets of place branding, such as identities, image, promotion or sense of place, have been around for a long time. However, the need to analyse their nature in the context of branding and to examine their relationships in detail has grown rapidly in the last decade or so, as places all over the world have put branding activities higher than ever in their agenda. This important new book examines and clarifies key aspects of the recently popularised concept of place branding, expounding many controversies, confusions and discords in the field. The expert contributors clarify several unresolved issues surrounding the application of place branding, in particular its multiple goals. They provide a detailed analysis of the role of local communities in place branding strategies, and illustrate not only how, but also why brand management should be implemented. Case studies from a range of jurisdictions and cultural and political viewpoints are drawn upon, each illustrating an array of issues or techniques in specific economic, cultural and geographical contexts. This book provides a theoretically informed but practically oriented overview

and discussion of the increasingly popular field of place branding as an instrument of place management. As such, it will strongly appeal to both academics and practitioners in the fields of place marketing, place branding, local development, tourism planning and development, tourism marketing, cultural geography, urban and regional planning. Consultants in local authorities, national and regional tourism boards will also find this to be a fascinating read.
