Tourism in the City Nicola Bellini,Cecilia Pasquinelli,2016-08-29 This book critically explores the interconnections between tourism and the contemporary city from a policy-oriented standpoint, combining tourism perspectives with discussion of urban models, issues, and challenges. Research-based analyses addressing managerial issues and evaluating policy implications are described, and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well-being of local communities, e.g., in terms of quality spaces, employment, accessibility, innovation, and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development, including the rise of anti-tourism movements as a reaction to touristification, cultural commodification, and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon, and the supposedly unavoidable trade-off between the interests of residents and tourists is critically questioned.

Developing Corporate Social Responsibility Francesco Perrini,2006-01-01 'Perrini et al provide a detailed, authoritative look at the evolving European perspective on corporate social responsibility. They show how Europe has moved from follower status to leading edge practice. The book is the best current indicator of what the next stages of CSR will look like.' - Thomas W. Dunfee, University of Pennsylvania, US The rapidly increasing attention devoted to Corporate Social Responsibility (CSR) has resulted in the term 'CSR' being applied to myriad dissimilar phenomena. The authors therefore aim to dispel this confusion by presenting a multi-faceted view of socially responsible corporate behavior and related themes. They provide a conceptualization of CSR that emphasizes the role of the adoption and implementation of specific CSR strategies and their impact on corporate social and economic performance.

The Collaborative Enterprise Antonio Tencati,László Zsolnai,2010 Competitive economics produces an enormous abundance of goods and services but at an intolerable environmental and social cost. Competition has become an end in itself, which leads to detrimental effects on nature, society and future generations. A change of paradigm is needed. Business should respect the ecological and social limits in which it operates and embed its activities in the natural and social systems. This book promotes a collaborative attitude of doing business based on a positive view of the self and others. Theoretical contributions, reflections, cases, examples, and initiatives collected in the book show that a collaborative enterprise is not only possible but also a feasible and desirable alternative to the current, self-defeating, managerial models. Innovative firms seeking to build long-term, mutually beneficial relationships with all of their stakeholders while producing values for their business ecosystems represent well-grounded hopes for a really sustainable future.

100 Words To Make You Sound Smart American Heritage Dictionaries,2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. 100 Words to Make You Sound Smart provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Implementing Sustainability Strategies in Networks and Clusters Alessandra De Chiara,2016-10-04 This book investigates the dynamics of the management of sustainability in networks and clusters – an area of increasing importance that is neglected by the many studies addressing sustainability at the single-enterprise level. The focus is in particular on projects involving groups of enterprises with a high level of productive interdependence and steady relations that allow sharing of resources and activities. The book is organized into two parts, the first of which discusses the value of the territory for firm competitiveness, examines the importance of social capital in creating sustainable business behaviors and “unique” networks, and describes principles and tools for the implementation and management of sustainability strategies in networks or clusters. The second part then presents the methodology and outcomes of empirical research conducted on industrial districts and productive centres in Campania, southern Italy, which are representative of Italian productive chains. The book will be of value to all management scholars with an interest in this field, as well as to readers wishing to learn more of the role of local institutions.

Special Relativity and Motions Faster than Light Moses Fayngold,2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

Theoretical Optics Hartmann Römer,2006-03-06 Starting from basic electrodynamics, this volume provides a solid, yet concise introduction to theoretical optics, containing topics such as nonlinear optics, light-matter interaction, and modern topics in quantum optics, including entanglement, cryptography, and quantum computation. The author, with many years of experience in teaching and research, goes way beyond the scope of traditional lectures, enabling readers to keep up with the current state of knowledge. Both content and presentation make it essential reading for graduate and PhD students as well as a valuable reference for researchers.

Mathematical Models of Fluid Dynamics Rainer Ansorge,2006-03-06 This introduction to the field contains a careful selection of topics and examples without sacrificing scientific strictness. The author guides readers through mathematical modelling, the theoretical treatment of the underlying physical laws and the construction and effective use of numerical procedures to describe the behaviour of the dynamics of physical flow. Both students and experts intending to control or predict the behavior of fluid flows by theoretical and computational fluid dynamics will benefit from the combination of all relevant aspects in one handy volume. The book consists of three main parts: - The design of mathematical models of physical fluid flow; - A theoretical treatment of the equations representing the model, as Navier-Stokes, Euler, and boundary layer equations, models of turbulence, in order to gain qualitative as well as quantitative insights into the processes of flow events; - The construction and effective use of numerical procedures in order to find quantitative descriptions of concrete physical or technical fluid flow situations. This is the first text of its kind to merge all these subjects so thoroughly.

City Matters Boddy, Martin,Parkinson, Michael,2004-05-19 This volume provides in one single comprehensive collection, the findings of the largest ever programme of cities research in the UK. The country's leading experts present the findings of this wide-ranging programme of work funded by the Economic and Social Research Council.

Legitimacy and Urban Governance Hubert Heinelt,David Sweeting,Panagiôtēs Getimēs,2006 While addressing the problematic balance between economic performance and social cohesion, this text presents a new understanding of urban governance, leadership and community involvement.

Partnership Working Balloch, Susan,Taylor, Marilyn,2001-07-11 This volume goes beyond the confines of statutory partnerships, addressing other important forms of collaboration between voluntary, private and statutory sectors, and service users and community and minority groups.

The Tourist City Dennis R. Judd,Susan S. Fainstein,1999-01-01 An investigation of tourism and its transforming impact on cities, by urban experts from a variety of disciplines. They examine such tourist meccas as Las Vegas, Orlando and Boston, and take up themes such as the marketing of cities and how tourists perceive places.

Local Government in the 1990s John David Stewart,1995 This follow-up to *The Future of Local Government* provides an account of the major changes that have taken place in the organization, management and key areas of service delivery in UK local government under Thatcher and Major, and interprets likely future developments.

Art in Poland, 1572-1764 Jan K. Ostrowski,Thomas DaCosta Kaufmann,1999-01-01 In the golden years of the baroque era, Poland expressed

creative ties to East and West in extraordinary works of fine and decorative art. This illustrated book displays more than 150 pieces that celebrate the cross-cultural richness of Poland's creative output during this period. From the dramatic uniform of the winged hussar complete with feathered wings and leopard skin to traditional portraits of royalty to a Turkish-style beverage service, these splendid objects represent Poland's diversity and breadth at a time when it was the largest land empire in Europe, stretching from the Baltic to the Black Sea. This book is the catalogue for a major exhibition at The Walters Art Gallery in Baltimore. The Art Institute of Chicago, Huntsville Museum of Art. The San Diego Museum of Art. The Philbrook Museum of Art, and the Royal Castle in Warsaw.

De Mondiale Context Van Nederlandse Kunst Thijs Weststeijn,Eric Jorink,Frits Scholten,2016 This NKJ volume breaks new ground in applying the aims and approaches of global art history to the Low Countries. From Greenland to South Africa and Mexico to Sri Lanka, it explores how Netherlandish art testifies to the interconnectedness of the Early Modern world.

Tourism Social Media Ana Maria Munar,Szilvia Gyimothy,Liping Cai,2013-07-18 This volume addresses the transformative power of tourism social media and offers novel theoretical and methodological approaches to its academic investigation. Acknowledging the collective value creation mechanisms of new media, the authors explore how technology nurtures, augments and modifies social or commercial interactions in tourism.

Netherlandish Artists in Gdańsk in the Time of Hans Vredeman de Vries ,2006-01-01

Drawn from the Antique Adriano Aymonino,Anne Varick Lauder,Eloisa Dodero,Rachel Hapoienu,Ian Dennis Jenkins,Jerzy Kierkuc-Bielinski,Michiel Plomp,Jonathan Yarker,Sir John Soane's Museum,2015 This catalogue examines one of the most important educational tools and sources of inspiration for Western artists for over five hundred years: drawing after the Antique. From the Renaissance to the 19th century, classical statues offered young artists idealised models from which they could learn to represent the volumes, poses and expressions of the human figure and which, simultaneously, provided perfected examples of anatomy and proportion. For established artists, antique statues and reliefs presented an immense repertory of forms that they could use as inspiration for their own creations. Through a selection of thirty-nine drawings, prints and paintings, covering more than four hundred years and by artists as different as Federico Zuccaro, Hendrick Goltzius, Peter Paul Rubens, Charles-Joseph Natoire, Henry Fuseli and Joseph Mallord William Turner, this catalogue provides the first overview of a phenomenon crucial for the understanding and appreciation of European art.-- Page 2 of cover.
