Research and Advanced Technology for Digital Libraries Trond Aalberg,Christos Papatheodorou,Milena Dobрева,Giannis Tsakonas,Charles J. Farrugia,2013-08-30 This book constitutes the refereed proceedings of the International Conference on Theory and Practice of Digital Libraries, TPDL 2013 (formerly European Conference on Research and Advanced Technology for Digital Libraries, ECDL) held in Valletta, Malta, in September 2013. The 24 full papers, 13 short papers, 22 posters and 8 demonstrations presented in this volume were carefully reviewed and selected from 158 submissions. The papers cover a wide range of research topics, clustered in four broader areas: foundation, infrastructures, content, and services. They have been organized in topical sections on conceptual models and formal issues, aggregation and archiving, user behavior, digital curation, mining and extraction, architectures and interoperability, interfaces to digital libraries, semantic web, information retrieval and browsing, and preservation. Also included are 6 tutorials and 2 panels.

Dividing the Droplet James De Barro,2006 This report includes rationale for the research, a brief outline of the methodology and the summarised data collected from the project. The results are presented in a format that can be used both by irrigators, the irrigation industry, as well as the Department of Water, Land and Biodiversity Conservation as part of the licence conversion process.

Operation Barbarossa David M Glantz,2011-09-30 On 22 June 1941 Hilter unleashed his forces on the Soviet Union. Spearheaded by four powerful Panzer groups and protected by an impenetrable curtain of air support, the seemingly invincible Wehrmacht advanced from the Soviet Union's western borders to the immediate outskirts of Leningrad, Moscow and Rostov in the shockingly brief period of less than six months. The sudden, deep, relentless German advance virtually destroyed the entire peacetime Red Army and captured almost 40 percent of European Russia before expiring inexplicably at the gates of Moscow and Leningrad. An invasion designed to achieve victory in three to six weeks failed and, four years later, resulted in unprecedented and total German defeat. David Glantz challenges the time-honoured explanation that poor weather, bad terrain and Hitler's faulty strategic judgement produced German defeat, and reveals how the Red Army thwarted the German Army's dramatic and apparently inexorable invasion before it achieved its ambitious goals.
