Network Models of the Diffusion of Innovations Thomas W. Valente,1995 This text presents a key to understanding how ideas, products and opinions take off and spread throughout society - referred to as the diffusion of innovation - and provides a means to estimate how fast or slow that spread occurs. The diffusion of innovations occurs among individuals in a social system, and the pattern of communications among these individuals is a social network. The network determines how quickly innovations diffuse and the timing of each individual's adoption. The book thus analyses how social networks structure the diffusion of innovation.

The Bias of Communication Harold Adams Innis,2008-01-01 First published in 1951, this masterful collection of essays explores the relationship between a society's communication media and that community's ability to maintain control over its development.
