Competing Visions Robert Cherny, Gretchen Lemke-Santangelo, Richard Griswold del Castillo, 2014 With a strong social emphasis and succinct narrative, **COMPETING VISIONS: A HISTORY OF CALIFORNIA**, 2E chronicles the stories of people who have had an impact on the state's history while presenting California as a hub of competing economic, social, and political visions. It highlights the state's cultural diversity and explicitly compares it to other Western states, the nation, and the world--illustrating the national and

international significance of California's history. Its chronological organization and thematic approach enables readers to keep track of events and fully understand their significance. Telling the full story, the text concludes by discussing such current events as immigration and demographic changes, the Occupy Movement, energy challenges, and more.

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

The Real North Korea Andrei Lankov, 2015 In The Real North Korea, Lankov substitutes cold, clear analysis for the overheated rhetoric surrounding this opaque police state. Based on vast expertise, this book reveals how average North Koreans live, how their leaders rule, and how both survive

Culture and Imperialism Edward W. Said, 2012-10-24 A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and

reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

Architecture Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form,*

Space, and Order encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

Memories, Dreams, Reflections Carl G. Jung, 2011-01-26 An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. An important, firsthand document for readers who wish to understand this seminal writer and thinker. –Booklist In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. *Memories, Dreams, Reflections* is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII Sermones ad Mortuos.

Man and His Symbols Carl G. Jung, 2012-02-01 The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic

impulses—featuring more than a hundred images that break down Carl Jung’s revolutionary ideas “What emerges with great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life’s work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, *Man and His Symbols* is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, *Man and His Symbols* proves to be—decades after its

conception—a revelatory, absorbing, and relevant experience.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris, 2021-08-16 Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Eames House Conservation Management Plan Sheridan Burke, Jyoti Somerville, Gail Ostergren, Laura Matarese, Chandler McCoy, 2018-12 The Eames House Conservation Management Plan (CMP) provides a framework for the care, management, and conservation of the Eames House, also known as Case Study House No. 8, an internationally renowned work of modern architecture designed by Charles and Ray Eames. The CMP was developed using an internationally recognized, values-based methodology. It analyzes the historical, documentary, and physical site evidence to develop a thorough understanding

of the place, followed by an assessment of its heritage significance. These assessments provided the foundation for development of a series of policies, some general and some specific to particular elements of the site, intended to guide the conservation, interpretation, and management of the Eames House in a manner that preserves its cultural significance for future generations.

Cybernetic Revolutionaries Eden Medina, 2014-01-10 A historical study of Chile's twin experiments with cybernetics and socialism, and what they tell us about the relationship of technology and politics. In *Cybernetic Revolutionaries*, Eden Medina tells the history of two intersecting utopian visions, one political and one technological. The first was Chile's experiment with peaceful socialist change under Salvador Allende; the second was the simultaneous attempt to build a computer system that would manage Chile's economy. Neither vision was fully realized—Allende's government ended with a violent military coup; the system, known as Project Cybersyn, was never completely implemented—but they hold lessons for today about the relationship between technology and politics. Drawing on extensive archival material and interviews, Medina examines the cybernetic system envisioned by the Chilean government—which was to feature holistic system design, decentralized management, human-computer interaction, a national telex network, near real-time control of the growing industrial sector, and modeling the behavior of dynamic systems. She also describes, and documents with photographs, the network's Star Trek-like operations room, which

featured swivel chairs with armrest control panels, a wall of screens displaying data, and flashing red lights to indicate economic emergencies. Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution. This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological, intellectual, and political possibilities. Technologies, Medina writes, are historical texts; when we read them we are reading history.

Local Knowledge Clifford Geertz, 2008-08-04 In essays covering everything from art and common sense to charisma and constructions of the self, the eminent cultural anthropologist and author of *The Interpretation of Cultures* deepens our understanding of human societies through the intimacies of local knowledge. A companion volume to *The Interpretation of Cultures*, this book continues Geertz's exploration of the meaning of culture and the importance of shared cultural symbolism. With a new introduction by the author.

Human Factors Considerations of Undergrounds in Insurgencies Us Army Special Operations Command, 2017-08-31 From the preface: The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most

important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtria e Kosovës (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al-Islamiyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude

more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines.

Food at Work Christopher Wanjek, 2005 This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break, and decent conditions for eating is not only socially important and economically viable but a profitable business practice, too. Food at Work sets out key points for designing a meal program, presenting a multitude of food solutions including canteens, meal or food vouchers, mess rooms and kitchenettes, and partnerships with local vendors. Through case studies from a variety of enterprises in twenty-eight industrialized and developing countries, the book offers valuable practical food solutions that can be adapted to workplaces of different sizes and with different budgets.

Under the Net Iris Murdoch, 1977-10-27 Iris Murdoch's debut—a comic novel about work and love, wealth and fame Jake Donaghue, garrulous artist, meets Hugo Bellfounder, silent philosopher. Jake, hack writer and sponger, now penniless flat-hunter, seeks out an old girlfriend, Anna Quentin, and her glamorous actress sister, Sadie. He resumes acquaintance with the formidable Hugo, whose 'philosophy' he once presumptuously dared to interpret. These

meetings involve Jake and his eccentric servant-companion, Finn, in a series of adventures that include the kidnapping of a film-star dog and a political riot on a film set of ancient Rome. Jake, fascinated, longs to learn Hugo's secret. Perhaps Hugo's secret is Hugo himself? Admonished, enlightened, Jake hopes at last to become a real writer.

A Psalm for the Wild-Built Becky Chambers, 2021-07-13 Winner of the Hugo Award! In A Psalm for the Wild-Built, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
