Genes, Memes, Culture, and Mental Illness Hoyle Leigh, 2010-06-14 What produces mental illness: genes, environment, both, neither? The answer can be found in memes—replicable units of information linking genes and environment in the memory and in culture—whose effects on individual brain development can be benign or toxic. This book reconceptualizes mental disorders as products of stressful gene-meme interactions and introduces a biopsychosocial template for meme-based diagnosis and treatment. A range of therapeutic modalities, both broad-spectrum (meditation) and specific (cognitive-behavioral), for countering negative memes and their replication are considered, as are possibilities for memetic prevention strategies. In this book, the author outlines the roles of genes and memes in the evolution of the human brain; elucidates the creation, storage, and evolution of memes within individual brains; examines culture as a carrier and supplier of memes to the individual; provides examples of gene-meme interactions that can result in anxiety, depression, and other disorders; proposes a multi-axial gene-meme model for diagnosing mental illness; identifies areas of meme-based prevention for at-risk children; and defines specific syndromes in terms of memetic symptoms, genetic/ memetic development, and meme-based treatment.

Annals of Scientific Society for Assembly, Handling and Industrial Robotics Thorsten Schüppstuhl, Kirsten Tracht, Dominik Henrich, 2020-08-21 This Open Access proceedings present a good overview of the current research landscape of industrial robots. The objective of MHI Colloquium is a successful networking at academic and management level. Thereby the colloquium is focussing on a high level academic exchange to distribute the obtained research results, determine synergetic effects and trends, connect the actors personally and in conclusion strengthen the research field as well as the MHI community. Additionally there is the possibility to become acquainted with the organizing institute. Primary audience are members of the scientific association for assembly, handling and industrial robots (WG MHI).

Computer Games I David N.L. Levy, 2012-12-06 Computer Games I is the first volume in a two part compendium of papers covering the most important material available on the development of computer strategy games. These selections range from discussions of mathematical analyses of games, to more qualitative concerns of whether a computer game should follow human thought processes rather than a brute force approach, to papers which will benefit readers trying to program their own games. Contributions include selections from the major players in the development of computer games: Claude Shannon whose work still forms the foundation of most contemporary chess programs, Edward O. Thorpe whose invention of the card counting method caused Las Vegas casinos to change their blackjack rules, and Hans Berliner whose work has been fundamental to the development of backgammon and chess games.

Polymeric Gene Delivery Systems Yiyun Cheng, 2018-09-04 The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. The chapter Polymeric Nanoparticle-Mediated Gene Delivery for Lung Cancer Treatment is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Sustainable Energy Systems Planning, Integration and Management Kim Guldstrand Larsen, 2020-01-21 Energy systems worldwide are undergoing major transformation as a consequence of the transition towards the widespread use of clean and sustainable energy sources. Basically, this involves massive changes in technical and organizational levels together with tremendous technological upgrades in different sectors ranging from energy generation and transmission systems down to distribution systems. These actions generate huge science and engineering challenges and demands for expert knowledge in the field to create solutions for a sustainable energy system that is economically, environmentally, and socially viable while meeting high security requirements. This book covers these promising and dynamic areas of research and development, and presents contributions in sustainable energy systems planning, integration, and management. Moreover, the book elaborates on a variety of topics, ranging from design and planning of small- to large-scale energy systems to the operation and control of energy networks in different sectors, namely electricity, heat, and transport.

Beowulf Bryher,2020-10-14 The author of Roman Wall and other well received historical novels portrays here a more recent period of history, that of the Blitz in the London of World War II. Her portrayal of the living out of wartime days with their drabness and danger consists of cannily arranged sketches of over a dozen folk whose lives touch upon or center about the homely, comforting teashop run by two elderly ladies and fittingly named the Warming Pan. Selina Tippett is the motherly figure who presides and succors, Angelina is her militant partner who goes to battle for food rations and who brings home the plaster bulldog Beowulf as symbol of resolution. When the Warming Pan is blasted to nothingness, Beowulf remains unscathed -- and, while Angelina rejoices and thinks of hawking cakes, Selina laughs and weeps over the fact that she will never have to worry about overdue rent again and is embarrassed by the solicitude of her friends. There is an immediacy and a sharp etching in the presentation of people who seem to be caught candid and unaware by the author: the lonely widowed septuagenarian painter who hangs out at the teashop and who is mercifully spared complete poverty by the blast; young Eve, who has found freedom in the city and who worries that her friend Joe feels alive only in war; Ruby the waitress who discovers a friend she has come to mourn, alive beside her ruined dwelling; the retired colonel whom no one will put back in 'harness' ... A small, distinctively cut and polished piece.--Kirkus reviews

Gene Delivery Huayu Tian,Xuesi Chen,2022-05-19 Gene therapy has been regarded as a great potential for specific treatment of gene-related human diseases, such as cancer, genetic and epidemic diseases. Gene therapy refers to the biomedical technology that inserts normal or therapeutic exogenous genes into target cells to repair or replace defective genes in target cells, so as to achieve the purpose of treating diseases. Efficient gene delivery systems are the crucial roles for successful implementation of gene therapy. This book provides a platform for young scholars and students to systematically understand the preparation and characterization of the existing non-viral gene delivery systems, as well as providing a technology platform for clinical gene therapy

Acceptance and Commitment Therapy for Chronic Pain JoAnne Dahl,Carmen Luciano,Kelly G. Wilson,2005-04-05 Professionals who work with patients and clients struggling with chronic pain will benefit from this values-based behavior change program for managing the effects of pain. Acceptance and Commitment Therapy for Chronic Pain addresses case formulation and clinical techniques for working with pain patients through a combination of practical instruction and a treatment scenario narrative that follows a patient through an ACT-based intervention. An invaluable resource for rehabilitation specialists, psychologists, physicians, nurses, and others.

Health Humanities Reader Therese Jones,Delese Wear,Lester D. Friedman,2014-08-28 Over the past forty years, the health humanities, previously called the medical humanities, has emerged as one of the most exciting fields for interdisciplinary scholarship, advancing humanistic inquiry into bioethics, human rights, health care, and the uses of technology. It has also helped inspire medical practitioners to engage in deeper reflection about the human elements of their practice. In Health Humanities Reader, editors Therese Jones, Delese Wear, and Lester D. Friedman have assembled fifty-four leading scholars, educators, artists, and clinicians to survey the rich body of work that has already emerged from the field—and to imagine fresh approaches to the health humanities in these original essays. The collection's contributors reflect the extraordinary diversity of the field, including scholars from the disciplines of disability studies, history, literature, nursing, religion, narrative medicine, philosophy, bioethics, medicine, and the social sciences. With warmth and humor, critical acumen and ethical insight, Health Humanities Reader truly humanizes the field of medicine. Its accessible language and broad scope offers something for everyone from the experienced medical professional to a reader interested in health and illness.

Dynamics of Complex Intracontinental Basins Ralf Littke,Ulf Bayer,Dirk Gajewski,Susanne Nelskamp,2008-08-11 Sedimentary basins host, among others, most of our energy and fresh-water resources: they can be regarded as large geo-reactors in which many physical and chemical processes interact. Their complexity can only be well understood in well-organized interdisciplinary co-operations. This book documents how researchers from different geo-scientific disciplines have jointly analysed the structural, thermal, and sedimentary evolution as well as fluid dynamics of a complex sedimentary basin system which has experienced a variety of activation and reactivation impulses as well as intense salt tectonics. In this book we have summarized our geological, geophysical and geochemical understanding of some of the most important processes affecting sedimentary basins in general and our view on the evolution of one of the largest, best explored and most complex continental sedimentary basins on Earth: The Central European Basin System.

Information Technology and Organizational Learning Arthur M. Langer,2017-10-17 Focusing on the critical role IT plays in organizational development, the book shows how to employ action learning to improve the competitiveness of an organization. Defining the current IT problem from an operational and strategic perspective, it presents a collection of case studies that illustrate key learning issues. It details a dynamic model for effective IT management through adaptive learning techniques—supplying proven educational theories and practices to foster the required changes in your staff. It examines existing organizational learning theories and the historical problems that occurred with companies that have used them, as well as those that have failed to use them.

Locating Lines and Hyperplanes Anita Schöbel,2013-12-01 Line and hyperplane location problems play an important role not only in operations research and location theory, but also in computational geometry and robust statistics. This book provides a survey on line and hyperplane location combining analytical and geometrical methods. The major portion of the text presents new results on this topic, including the extension of some special cases to all distances derived from norms and a discussion of restricted problems in the plane. Almost all results are proven in the text and most of them are illustrated by examples. Furthermore, relations to classical facility location and to problems in computational geometry are pointed out. Audience: The book is suitable for researchers, lecturers, and graduate students working in the fields of location theory or computational geometry.

Your Strategy Needs a Strategy Martin Reeves,Knut Haanaes,2015-05-19 You think you have a winning strategy. But do you? Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanæs, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as: • What replaces planning when the annual cycle is obsolete? • When can we—and when should we—shape the game to our advantage? • How do we simultaneously implement different strategic approaches for different business units? • How do we manage the inherent contradictions in formulating and executing different strategies across multiple businesses and geographies? Until now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.
