Microsoft Outlook 2000 E-mail and Fax Guide teaches advanced users and administrators, especially those within networked organizations using Exchange Server, how to manage and optimize Microsoft Outlook, the industry's leading messaging client, and use it as an effective tool for organizational communications. Written by one of the industry's leading experts on Outlook, Microsoft MVP-recognition winner Sue Mosher, the book concentrates on features, techniques and troubleshooting vital to advanced users and administrators but which are covered lightly, if at all, by other books on Outlook. Rather than offering only basic instruction or, like mammoth tomes on the topic, surveying every Outlook feature for every conceivable Outlook user, administrator, and developer, Microsoft Outlook 2000 E-mail and Fax Guide provides extensive instruction and best practices on the Outlook e-mail, fax and workgroup capabilities considered critical by sophisticated and frequent users of Outlook. Important new addition to Digital Press's Exchange Server and Outlook Cluster Author's Web site is one of the leading independent sites for Exchange and Outlook professionals Book targets Outlook advanced users and administrators

Extratropical Cyclones Chester Newton,Eero O. Holopainen,2018-11-22 This book is composed of 12 review papers invited for the Palmen Memorial Symposium on Extratropical Cyclones held in Helsinki, Finland, 29 August - 2 September 1988. To celebrate the 90th anniversary of the birth of Professor Erik Palmén, this symposium was organized to give a state-of-the-art picture of research on the structure and dynamics of extratropical cyclones, a topic which Palmén pioneered during the era of advances in aerological analysis. This symposium was organized by the Geophysical Society of Finland and the American Meteorological Society in cooperation with the Danish, Norwegian and Swedish Geophysical Societies. Extratropical Cyclones offers state-of-the-art information on extratropical cyclones, and recent findings by European and American authorities in various subject areas. The first two chapters discuss Palmen's works on cyclones and his early general circulation concepts. The ten chapters following chronicle the advances in understanding cyclones; the theory, structure, and physical processes of cyclones; orographic cyclogenesis; and more. Extratropical Cyclones also contains synoptic case analyses, modeling results, examples of the phenomena discussed, and abundant references. While particular aspects are emphasized in the individual contributions, the book as a whole summarizes the major features of various kinds of extratropical cyclones based on observational analyses, theory and numerical experimentation. This volume is of interest to researchers in dynamic and synoptic meteorology, climatology and mesometeorology, as well as in numerical modeling and weather forecasting. It is also useful for meteorology courses at graduate and upper undergraduate levels.

National Intellectual Capital and the Financial Crisis in Brazil, Russia, India, China, Korea, and South Africa Carol Yeh-Yun Lin,Leif Edvinsson,Jeffrey Chen,Tord Beding,2012-12-09 In the first decade of the twenty-first century, the biggest event of worldwide proportion was the 2008 global financial crisis, which was caused primarily by ineffective governance, failed surveillance systems, and implementation flaws. While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall, most economies have performed beneath pre-recession levels as governments continued to struggle with their finances. Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on the BRICKS—Brazil, Russia, India, China, Korea, and South Africa.
