**Has IFPRI's research decentralization strategy made a difference? An econometric study of African and Asian Countries, 1981–2014** Benin, Samuel, Place, Frank M., Hazell, Peter B.R., 2018-08-09 This study uses country-level panel data on 57 countries in Africa and Asia from 1981 to 2014 to assess the relationships between IFPRI's in-country presence (as measured by staff present) and various policy and outcome indicators in those countries. An econometric model with country fixed-effects, year fixed-effects, and country-specific time trends is used, controlling for several factors deemed to affect the different policy and outcome indicators such as the country's research capacity, production environment and resources, political economy and institutions, and complementary investments.

**Behind Deep Blue** Feng-hsiung Hsu, 2022-05-03 The riveting quest to construct the machine that would take on the world's greatest human chess player—told by the man who built it On May 11, 1997, millions worldwide heard news of a stunning victory, as a machine defeated the defending world chess champion, Garry Kasparov. Behind Deep Blue tells the inside story of the quest to create the mother of all chess machines and what happened at the two historic Deep Blue vs. Kasparov matches. Feng-hsiung Hsu, the system architect of Deep Blue, reveals how a modest student project started at Carnegie Mellon in 1985 led to the production of a multimillion-dollar supercomputer. Hsu discusses the setbacks, tensions, and rivalries in the race to develop the ultimate chess machine, and the wild controversies that culminated in the final triumph over the world's greatest human player. With a new foreword by Jon Kleinberg and a new preface from the author, Behind Deep Blue offers a remarkable look at one of the most famous advances in artificial intelligence, and the brilliant toolmaker who invented it.

IFPRI Report International Food Policy Research Institute, 1993

**Taking stock of IFPRI's experience with country programs** Hazell, Peter B.R., Place, Frank M., Tollens, Eric, 2019-01-16 IFPRI commissioned this study to assess how the country programs (CPs) are performing—which approaches and methods are producing the best outcomes across countries and over time—to identify factors that promote or impede their progress and lessons for making them more impactful in the future. The study has two major components. The first is a survey and analysis of the factors that CP leaders perceived to have most helped them influence host-country policies. We interviewed all current and most past CP leaders, which enabled us to compile evidence from recent CP experiences as well as from the 1980s and 1990s. We focused on the lessons they drew from their past successes that shed light on how to make their other activities successful. We did not undertake similar interviews on failed efforts because it is much harder to elicit such information from CP leaders. Additional insights about unsuccessful activities are, however, captured in the second component of the study, a commissioned external evaluation of the performance of a sample of ongoing country programs. Ideally, the external evaluation would have included CPs in both Africa and Asia, but this was not possible with the available budget. We therefore settled for an evaluation of CPs in Africa south of the Sahara. Doing so had two advantages: (1) the African CPs are more homogenous in terms of their objectives, structure, and internal IFPRI management, making comparisons among them more insightful; and (2) the budget was sufficient to both include all the African CPs in some of the analyses and allow the external evaluator to visit three of them.

**Requisite Organization** Elliott Jaques, 2017-07-05 Based on Elliott Jaques latest research, this is a thorough revision of a book that has established itself as a classic in its field. Jaques has written a practical high-level, how-to book, that applies to all kinds of working organizations - industrial, commercial, service and public. He sets out a totally new way of doing business. Step by step, he builds up the concepts, and then introduces the working procedures to enable CEOs and senior executives, managers, and HR specialists, to develop requisite organization for themselves - in other words, organization which enhances creativity, productive effectiveness, human satisfaction and excellent morale. Requisite Organization challenges all of our current methods and assumptions in the field of organization, leadership and management, and presents a unified total management system built upon a rigorous theoretical base, Stratified Systems Theory. Any enterprise can gain a competitive edge in the short-term by introducing new products and services. In the long-term, however, an adaptive and successful enterprise calls for soundly structured organization with effective staffing and managerial leadership at every level - a requisite organization.

Supplies Management for Health Services Stanley Hyman, 2022-03-07 First published in 1979, Supplies Management for Health Services looks at the characteristics and problems of hospital suppliers and examines the way in which the hospital and the National Health Service deal with supplies problems and relations with suppliers.

Beginning with a description of the National Health Service and its supplies’ organisations and the role of the Department of Health and Social Security in this field, the book then reports on the detailed studies made over two years of the supplies’ problems of ten London area health authorities and ten London manufacturers of medical equipment. The NHS situation is then contrasted with the supplies’ situation in three non-health organisations and with the health supplies situation in France and West Germany. The final part of the book analyses the information obtained, proposes a means of assessing supplies systems, and evaluates the NHS situation. This is followed by the realistic proposals for reform, advocating a system similar to that used in British defence services, based on a central procurement agency, close cooperation with private manufacturers, and manufacture by government where necessary. This book will surely interest students of economics and global health.

*Elements of Positional Evaluation* Dan Heisman,2010-08-26 Which side stands better? How much better? Why? Most chess players rely on loosely knit, unstructured methods to evaluate chess pieces and positions. They learn positional principles which often lead to inaccurate evaluations and faulty decisions about how to proceed. This groundbreaking book by best-selling chess author Dan Heisman addresses the evaluation and understanding of how static features affect the value of the pieces in a given position. Emphasis is placed on the static evaluation of each piece s value and its role in the overall position rather than the assessment of a specific position, but Heisman s approach can also be applied to help evaluate entire positions by helping to answer the questions who stands better, by how much, and why?
