Black Identities Mary C. WATERS, 2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

The Classical Orders of Architecture Robert Chitham, 2014-05-12 The Classical Orders of Architecture elaborates on the classical orders of architecture, including Classicism, Tuscan orders, Doric orders, Ionic orders, and Corinthian orders. The publication first examines the teaching of the orders, need for a new handbook of the orders, Roman and Renaissance theorists, traditional systems of proportion, and metric system of measurement. The text then ponders on historical background and orders in detail. Discussions focus on the Greek orders and comparative Tuscan orders, Doric orders, Ionic orders, Corinthian orders, and Composite orders. The book tackles the orders in detail, including the five orders, Tuscan order, Tuscan capital and entablature, Tuscan base and pedestal, Doric order, Doric base and pedestal, Ionic order and volute, Ionic capital and entablature, Ionic base and pedestal, and the Corinthian order. The manuscript then reviews the use of the orders, as well as diminution and fluting, rustication, pediments, moldings and their enrichment, and characteristics of Classicism. The text is a valuable source of information for architects, historians, and researchers interested in the classical orders of architecture.

Forty Years of Uranium Resources, Production and Demand in Perspective OECD Nuclear Energy Agency, 2006 The Red Book, jointly prepared by the OECD Nuclear Energy Agency and the International Atomic Energy Agency, is a recognised world reference source on the uranium industry. This publication collates and analyses key information drawn from the twenty editions of the Red Book published between 1965 and 2004, in order to set out a comprehensive review of developments in the world uranium industry from the birth of civilian nuclear energy through to the beginning of the 21st century. It summarises developments in the major uranium-producing countries and topics covered include: installed nuclear capacity, reactor-related uranium requirements, market price, exploration, resources, production, natural and enriched uranium inventories, thorium, mine start-up and closure histories, environmental aspects of uranium mining and processing.

Make it Safe Amanda M. Klasing, 2016 The report, 'Make It Safe: Canada's Obligation to End the First Nations Water Crisis,' documents the impacts of serious and prolonged drinking water and sanitation problems for thousands of indigenous people--known as First Nations--living on reserves. It assesses why there are problems with safe water and sanitation on reserves, including a lack of binding water quality regulations, erratic and insufficient funding, faulty or sub-standard infrastructure, and degraded source waters. The federal government's own audits over two decades show a pattern of overpromising and underperforming on water and sanitation for reserves--Publisher's description.
