Colombian Agency and the making of US Foreign Policy Alvaro Mendez,2017-06-26 This book studies a significant event in US relations with Latin America, shedding light on the role of dependent states and their foreign policy agency in the process by which local concerns become intertwined with the dominant state's foreign policy. Plan Colombia was a large-scale foreign aid programme through which the US intervened in the internal affairs of Colombia, by invitation. It proved to be one of the major successes of US foreign policy, and has been credited with stemming a potentially catastrophic security failure of the Colombian state. This book discusses the strategies and practices deployed by the Colombian government to influence US foreign policy decision making at the bureaucratic, legislative and executive levels, and is a distinctive contribution to our understanding of the dynamics of small power agency. Giving a clearer insight into the decision making processes in both the US and Colombia, this book founds its argument on solid empirical analysis assembled from interviews of the major players in the events including: Andres Pastrana, President of Colombia; Thomas Pickering, US State Department; Arturo Valenzuela, Senior Director for Inter-American Affairs at the NSA; General Barry McCaffrey, the US 'Drug Czar'; and Dennis Hastert, Speaker of the US House of Representatives. Approaching the events in question from a bottom-up theoretical perspective that puts the emphasis on the facts of the case, this book will be of great interest to academics, students and policy makers in the field of foreign policy analysis, US foreign policy studies, and Latin American studies.

Foreign Correspondence Geraldine Brooks,1999-01-19 As a young girl in a working-class neighborhood of Sydney, Australia, Geraldine Brooks longed to discover the places where history happens and culture comes from, so she enlisted pen pals who offered her a window on adolescence in the Middle East, Europe, and America. Twenty years later Brooks, an award-winning foreign correspondent, embarked on a human treasure hunt to find her pen friends. She found men and women whose lives had been shaped by war and hatred, by fame and notoriety, and by the ravages of mental illness. Intimate, moving, and often humorous, Foreign Correspondence speaks to the unquiet heart of every girl who has ever yearned to become a woman of the world.

Some problems are too big for Origami Yoda alone . . . This semester, Dwight, Tommy, Sara, and the gang must face their deadliest enemy yet: the FunTime Education System. Meant to raise standardized test scores, the mind-numbing videos of Professor FunTime and his singing calculator are driving everybody crazy! And worse

yet, to make time for FunTime, all electives—drama, art, band—have been canceled! Naturally, the kids turn to Origami Yoda for help, but he tells them that this enemy is too strong for him to fight alone. If they want to get their favorite classes back, they must form a Rebel Alliance. Soon dozens of kids, each with his or her own origami puppet, join the Alliance. But will the Force be with them—or will they be defeated by the FunTime Menace? “Fans of the series will relish the side drawings’ goofy humor, the new puppets to make, and the cliff-hanger promising more to come.” —School Library Journal Includes instructions for folding your own origami Jabba and Ewok. Cycling & Walking for Regional Development Paolo Pileri, Rossella Moscarelli, 2020-08-28 This book investigates why and how cycle and walking paths can help to promote the regeneration of marginalized areas facing depopulation and economic decline. In addition, it offers a broad overview of recent scientific research into slow tourism and marginality/spatial inequality and explores the linkages between these topics. Key issues are addressed by experts from various disciplinary backgrounds, and potential measures are proposed for the integration of slow tourism into strategies for regional development. Particular attention is devoted to the VENTO project, which involves the creation of a 700-km-long cycle route from Venice to Turin that passes through various rural and marginalized areas of northern Italy. The goal, research process, design, and early lessons from this important project are all discussed in detail. Moreover, the book describes policies and strategies that have successfully been used to enhance the slow tourism infrastructure in other European countries. Given its scope, the book will appeal to researchers, professionals, and students interested in e.g. policymaking, tourism planning, regional development, and landscape and urban planning.

Systems of Life Richard A. Barney, Warren Montag, 2018-11-06 Systems of Life offers a wide-ranging revaluation of the emergence of biopolitics in Europe from the mid-eighteenth to the mid-nineteenth century. In staging an encounter among literature, political economy, and the still emergent sciences of life in that historical moment, the essays collected here reopen the question of how concepts of animal, vegetable, and human life, among other biological registers, had an impact on the Enlightenment project of thinking politics and economics as a joint enterprise. The volume’s contributors consider politics, economics, and the biological as distinct, semi-autonomous spheres whose various combinations required inventive, sometimes incomplete, acts of conceptual mediation, philosophical negotiation, disciplinary intervention, or aesthetic representation.

Machine Learning in the AWS Cloud Abhishek Mishra, 2019-08-13 Put the power of AWS Cloud machine learning services to work in your business and commercial applications! Machine Learning in the AWS Cloud introduces readers to the machine learning (ML) capabilities of the Amazon Web Services ecosystem and provides practical examples to solve real-world regression and classification problems. While readers do not need prior ML

experience, they are expected to have some knowledge of Python and a basic knowledge of Amazon Web Services. Part One introduces readers to fundamental machine learning concepts. You will learn about the types of ML systems, how they are used, and challenges you may face with ML solutions. Part Two focuses on machine learning services provided by Amazon Web Services. You'll be introduced to the basics of cloud computing and AWS offerings in the cloud-based machine learning space. Then you'll learn to use Amazon Machine Learning to solve a simpler class of machine learning problems, and Amazon SageMaker to solve more complex problems. • Learn techniques that allow you to preprocess data, basic feature engineering, visualizing data, and model building • Discover common neural network frameworks with Amazon SageMaker • Solve computer vision problems with Amazon Rekognition • Benefit from illustrations, source code examples, and sidebars in each chapter The book appeals to both Python developers and technical/solution architects. Developers will find concrete examples that show them how to perform common ML tasks with Python on AWS. Technical/solution architects will find useful information on the machine learning capabilities of the AWS ecosystem.
