Apollo, the Race to the Moon Charles A. Murray, Catherine Bly Cox, 1989 Describes how a group of men and women accomplished the feat of landing men on the moon and returning them to earth.

Feminasty Erin Gibson, 2018-09-04 From the wickedly funny and feminist creator and host of the Throwing Shade podcast, a collection of hilarious personal essays and political commentary perfect for fans of Lindy West and Roxane Gay. Since women earned the right to vote a little under one hundred years ago, our progress hasn't been the Olympic sprint toward gender equality first wave feminists hoped for, but more of a slow, elderly mall walk (with frequent stops to Cinnabon) over the four hundred million hurdles we still face. Some of these obstacles are obvious-unequal pay, under-representation in government, reproductive restrictions, lack of floor-length mirrors in hotel rooms. But a lot of them are harder to identify. They're the white noise of oppression that we've accepted as lady business as usual, and the patriarchy wants to keep it that way. Erin Gibson has a singular goal-to create a utopian future where women are recognized as humans. In FEMINASTY-

titled after her nickname on the hit podcast Throwing Shade-she has written a collection of make-you-laugh-until-you-cry essays that expose the hidden rules that make life as a woman unnecessarily hard and deconstructs them in a way that's bold, provocative and hilarious. Whether it's shaming women for having their periods, allowing them into STEM fields but never treating them like they truly belong, or dictating strict rules for how they should dress in every situation, Erin breaks down the organized chaos of old fashioned sexism, intentional and otherwise, that systemically keeps women down.

Improvising Theory Allaine Cerwonka, Liisa H. Malkki, 2008-11-15 Scholars have long recognized that ethnographic method is bound up with the construction of theory in ways that are difficult to teach. The reason, Allaine Cerwonka and Liisa H. Malkki argue, is that ethnographic theorization is essentially improvisatory in nature, conducted in real time and in necessarily unpredictable social situations. In a unique account of, and critical reflection on, the process of theoretical improvisation in ethnographic research, they demonstrate how both objects of analysis, and our ways of knowing and explaining them, are created and discovered in the give and take of real life, in all its unpredictability and immediacy. Improvising Theory centers on the year-long correspondence between Cerwonka, then a graduate student in political science conducting research in Australia, and her anthropologist mentor, Malkki. Through regular e-mail exchanges, Malkki attempted to teach Cerwonka, then new to the discipline, the basic tools and

subtle intuition needed for anthropological fieldwork. The result is a strikingly original dissection of the processual ethics and politics of method in ethnography.

ASEAN Matters! Yoong Yoong Lee, 2011-04-26 The initiative to establish the Association of Southeast Asian Nations (ASEAN) Community was adopted by the ten leaders at the 2003 Bali Summit in Indonesia. Since then, the concept of a community-building process in ASEAN has become an issue that attracts a great deal of attention from scholars and experts around the world. ASEAN Matters! Reflecting on the Association of Southeast Asian Nations carries essays with different perspectives on critical issues relating to the three pillars in building the ASEAN Community, namely the ASEAN Political and Security Community; the ASEAN Economic Community; and the ASEAN Socio-Cultural Community. In a nutshell, this book provides broad and invaluable insights into the role ASEAN plays in enhancing peace, prosperity, and stability in the Southeast Asian region. Written in a highly accessible style, the contents include both a thorough review of current issues and a succinct overview of the past and future direction of ASEAN. The book reiterates the continued and strengthening relevance of ASEAN, 43 years after its founding. Unlike most other books on ASEAN, a majority of the essays are written by former professional staff at the ASEAN Secretariat, as well as from current office holders. This gives the volume a high degree of authenticity and unique insights. More interestingly, it also includes

viewpoints from experts, scholars, diplomats and officials who either have extensive research knowledge or had been involved in ASEAN's external and economic relations with the dialogue partners, such as China, India, Japan, the Republic of Korea, Australia, New Zealand, and the European Union (EU), among others. NASA's Scientist-Astronauts Shayler David, Colin Burgess, 2007-09-19 This book provides unique access to the story of how scientists were accepted into the American Space Programme, and reveals how, after four difficult decades, the role of the heroic test pilot astronaut has been replaced by men and women who are science orientated space explorers.

A Polyglot of Foreign Proverbs Henry George Bohn, 1889

Liberty Bell 7 Colin Burgess, 2014-03-19 NASA's Mercury astronauts were seven highly skilled professional test pilots. Each of them seemed to possess the strength of character and commitment necessary to overcome apparently insurmountable obstacles as the United States entered into a Cold War space race with the Soviet Union. This was never more evident than on the epic suborbital MR-4 flight of Liberty Bell 7 with astronaut Virgil ('Gus') Grissom piloting the spacecraft to a successful splashdown, followed by the premature blowing of the craft's explosive hatch. After a hurried exit and struggling to stay afloat, he could only watch helplessly as the recovery helicopter pilot valiantly fought a losing battle to save the sinking capsule. That day NASA not only lost a spacecraft but came perilously close to losing one of its Mercury astronauts, a decorated Korean fighter pilot from Indiana who might one day have soared to the highest goal of them all, as the first person to set foot on the Moon. For the first time, many of

those closest to the flight of Liberty Bell 7 and astronaut Gus Grissom offer their stories and opinions on the dramatic events of July 21, 1961, and his later pioneering Gemini mission. They also tell of an often controversial life cut tragically and horrifically short in a launch pad fire that shocked the nation.

Early Mathematical Explorations Nicola Yelland, Carmel Diezmann, Deborah Butler, 2014-01-20 Early Mathematical Explorations shows readers how to provide young children with rich mathematical learning environments and experiences. This book presents teachers with a sound theoretical framework to encourage children to become numerate in the twenty-first century. It shows that mathematical learning can occur in a variety of ways, including when children explore ideas through play, problem solving and problem posing; engage in a rich variety of multimodal learning experiences; pursue self-directed activities and cooperate with others; and make connections between ideas and experiences in their everyday worlds. Chapters 2 and 3 explore the ways in which mathematical understandings can be supported from birth to five years. Chapters 4–9 provide an overview of mathematics in the early primary years. The final chapters illustrate the contexts and connections that can be made in early mathematical learning. Early Mathematical Explorations is an essential resource for pre- and in-service teachers alike.

Leap of Faith Gordon Cooper, Bruce Henderson, 2018-10-23 “An exciting insider’s look at Projects Mercury, Gemini and Apollo . . . NASA’s internal

politics, disasters, glitches and close calls” by a pioneering astronaut (Publishers Weekly). Gordon “Gordo” Cooper was one of the original Mercury Seven astronauts, pilot for Apollo X, head of flight crew operations for the United States’ first orbiting space station, and the last American to venture into space alone. Stretching from the dawning days of NASA to the far reaches of the unknown, Cooper’s distinguished career as a record-setting astronaut helped shape America’s space program and blazed a trail for generations to come. In this astonishing memoir—written with #1 New York Times bestseller Bruce Henderson—Cooper crosses paths with such aviation luminaries as Amelia Earhart, Wiley Post, and German rocket scientist Wernher von Braun; he shares his early days at Edwards Air Force Base and the endeavors that became the basis for *The Right Stuff*; he takes us inside NASA with candid accounts of his defeats and accomplishments; he reflects on the triumphs and tragedies of his heroic colleagues; and he finally reveals the reasons behind his belief in extraterrestrial intelligence, including the US military’s long-standing UFO cover-ups. Buckle yourself in for a breathtaking ride because in *Leap of Faith*, Gordon Cooper takes readers to places they’ve never been before.

Friendship 7 Colin Burgess, 2015-04-07 In this spellbinding account of an historic but troubled orbital mission, noted space historian Colin Burgess takes us back to an electrifying time in American history, when intrepid pioneers were launched atop notoriously unreliable rockets at the very dawn of human space exploration. A nation proudly and collectively came to a

standstill on the day this mission flew; a day that will be forever enshrined in American spaceflight history. On the morning of February 20, 1962, following months of frustrating delays, a Marine Corps war hero and test pilot named John Glenn finally blazed a path into orbit aboard a compact capsule named Friendship 7. The book's tension-filled narrative faithfully unfolds through contemporary reports and the personal recollections of astronaut John Glenn, along with those closest to the Friendship 7 story, revealing previously unknown facts behind one of America's most ambitious and memorable pioneering space missions. Sigma 7 Colin Burgess, 2016-05-28 Colin Burgess offers a comprehensive yet personal look at the 1962 orbital mission of Wally Schirra aboard the spacecraft Sigma 7, the first book about this popular pioneering astronaut which explores his entire life and accomplishments. This continues the *Pioneers in Early Spaceflight* series, the volumes of which form an excellent record of Project Mercury's pioneering early phase of the Space Age. Schirra's pre-NASA life is examined, as well as his training as a NASA

astronaut and for his Mercury MA-8 flight. The 6-orbit flight of Sigma 7 is fully covered from its origins through to the spacecraft's safe recovery from the ocean after a highly successful Mercury mission. Schirra's participation on the Gemini 6 and Apollo 7 missions is also told, but in brief, and the book also relates his post-NASA life and activities through to his passing in 2007. The Mercury Seven occupy a unique spot in the history of human spaceflight, and Schirra is at last given his due as one of the contributing astronauts in this painstakingly researched book.

Moon Bound Colin Burgess, 2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions, the second and third groups included the leading figures for NASA's activities for the following two decades. "Moon Bound" complements the author's recently published work, "Selecting the Mercury Seven" (2011), extending the story of the men who helped to launch human spaceflight and broaden the American space program. Although the initial 1959 group became known as the legendary pioneering Mercury astronauts, the astronauts of Groups 2 and 3 gave us many household names. Sixteen astronauts from both groups traveled to the Moon in Project Apollo, with several actually walking on the Moon, one of them being Neil Armstrong. This book draws on interviews to tell the astronauts' personal stories and recreate the drama of that time. It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group. "Moon Bound" is divided into two parts,

recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part, and the fourteen finalists in Group 3 in the second part. The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds. One of these men is Al Rupp of the USAF who, as a West Point cadet, cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953, thus achieving legendary status in the game's history. Rupp was killed in a plane crash just two years after being named as a finalist for Group 3. The service career of naval aviator John Yamnicky was also very much the equal of other finalists, but he was killed on September 11, 2001, as he was a passenger on hijacked Flight 77, which was flown into the Pentagon. At the end of the work there are several chapters on how these candidates were prepped for their missions.

Aurora 7 Colin Burgess, 2015-08-28 TO A NATION enthralled by the heroic exploits of the Mercury astronauts, the launch of Lt. Cmdr. Scott Carpenter on NASA's second orbital space flight was a renewed cause for pride, jubilation and celebration. Within hours, that excitement had given way to stunned disbelief and anxiety as shaken broadcasters began preparing the American public for the very real possibility that an American astronaut and his spacecraft may have been lost at sea. In fact, it had been a very close call. Completely out of fuel and forced to manually guide Aurora 7 through the frightening inferno of re-entry, Carpenter brought the Mercury spacecraft

down to a safe splashdown in the ocean. In doing so, he controversially overshot the intended landing zone. Despite his efforts, Carpenter's performance on the MA-7 mission was later derided by powerful figures within NASA. He would never fly into space again. Taking temporary leave of NASA, Carpenter participated in the U.S. Navy's pioneering Sealab program. For a record 30 days he lived and worked aboard a pressurized habitat resting on the floor of the ocean, becoming the nation's first astronaut/aquanaut explorer. Following extensive research conducted by noted spaceflight historian Colin Burgess, the drama-filled flight of Aurora 7 is faithfully recounted in this engrossing book, along with the personal recollections of Scott Carpenter and those closest to the actual events.
