Chanakya's Chant Ashwin Sanghi, 2010 Chanakya's Chant is a racy and gripping account on Chanakya, one of the greatest political strategists India has seen. The story changes track as it narrates the tale of Gangasagar Mishra, the reincarnation of Chanakya, in parallel. Will he be the next kingmaker? Gangasagar Mishra, a denizen of a quaint old Indian town, is no ordinary man. Society sees him as a Brahmin teacher who can barely make ends meet, but he's the reincarnation of the man who brought the fragmented subcontinent together under a single empire – Chanakya. Chanakya's Chant by Ashwin Sanghi gives its readers a look into two parallel worlds that are tied together by the intelligence of the main protagonists. The first story is set in 340 BC, when a young Brahmin man, fueled by the death of his father, vows revenge against the king and overthrows his rule by bringing in Chandragupta Maurya, the first emperor of the Maurya Dynasty. The scene then shifts to modern day India, where Gangasagar Mishra leads his life as a nonentity – until he decides to groom an ambitious girl from Kanpur into India's prime minister. Will Chanakya's manipulative mechanisms change the face of the nation again? The book takes readers on a joyride through

Chanakya's cold and calculating moves. Chanakya's Chant was very well received by critics and readers. Renowned bureaucrat and writer Shashi Tharoor released the book in Mumbai and termed it a gripping and delightful read. The book is a historical account, but features many colloquial terms too.

Autonomic Computing and Networking Mieso Denko, Laurence Tianruo Yang, Yan Zhang, 2009-06-12 Autonomic Computing and Networking presents introductory and advanced topics on autonomic computing and networking with emphasis on architectures, protocols, services, privacy & security, simulation and implementation testbeds. Autonomic computing and networking are new computing and networking paradigms that allow the creation of self-managing and self-controlling computing and networking environment using techniques such as distributed algorithms and context-awareness to dynamically control networking functions without human interventions. Autonomic networking is characterized by recovery from failures and malfunctions, agility to changing networking environment, self-optimization and self-awareness. The self-control and management features can help to

overcome the growing complexity and heterogeneity of exiting communication networks and systems. The realization of fully autonomic heterogeneous networking introduces several research challenges in all aspects of computing and networking and related fields.

Dory Fantasmagory: The Real True Friend Abby

Hanlon, 2016-06-07 Fans of Junie B. Jones and Ivy and Bean will love this new story about the spunky little rascal with big ideas. The star of Dory Fantasmagory is heading to school. Her older siblings, Luke and Violet, warn her to leave her imaginary friend, Mary, at home—or better yet, leave her whole imagination at home! Dory is determined to behave like a “regular old girl who never gets in trouble,” but on her very first day she meets a new friend, a girl whose imagination and style are just about as wild as her own. Now she just has to convince her siblings that she’s not making it all up! Filled with plenty of funny pictures, this book bursts with charm and impudence, making this a must-read for the chapter book set. Dory is as likable a kid heroine as I’ve encountered in a decade. –The Boston Globe * Once again, Hanlon’s hilarious narration and cartooning reveal an uncanny talent for getting into the mile-a-minute mind of a one-of-a-kind girl. –Publishers Weekly, starred review

The Art of Analog Layout Alan Hastings, 2006 For Electrical Engineering courses in analog layout or professional layout designers. This text covers the issues involved in successfully laying out analog integrated circuits. Hastings provides clear guidance and does not stress theoretical physics or mathematical analysis of layouts. He emphasizes cross- sections of devices and carrier-based models of device operation as compared to the more common geometric and schematic representation of devices.

The Oxford Handbook of Soft Condensed Matter Eugene Michael Terentjev, 2015 This Handbook serves both as an introduction and an overview of the field of soft condensed matter. The discussion covers topics ranging from the fundamentals of colloid science to the principles and action of surfactants, modern directions of research in liquid crystals, and the key properties of foams. The book also explores the fundamental physics that controls the structure and mechanics of granular matter; how the unusual and often dramatic mechanical properties of concentrated polymer systems are determined by the physics of entanglements; the complex structures formed by block copolymers and the methods of structure analysis; rubber elasticity and new emerging classes of rubber-elastic materials; the physics of polyelectrolytes;

the solvent dynamics in polymer gels, in equilibrium and under mechanical stress; and the hierarchical structure and characteristics of an extracellular matrix.

Book of Imaginary Media Eric Kluitenberg, 2006 Have you ever wondered if one day Windows 2028 might just know what you're thinking and type it? In this collection of essays, a selection of today's top media and sci-fi theorists weigh in. The Book of Imaginary Media explores the persistent idea that technology may one day succeed where no human has, not only in space or in nature, but also in interpersonal communication. Building on insights from media archeology, Siegfried Zielinski, Bruce Sterling, Erkki Huhtamo and Timothy Druckrey spin a web of associations between the fantasy machines of Athanasius Kircher, the mania of stereoscopy and dead media. Edwin Carels and Zoe Beloff descend into the cinematographic caverns of spiritualism and the iconography of death, and renowned cartoonists including Ben Katchor depict their own visionary media fantasies. On the enclosed DVD, artist Peter Blegvad provides hilarious commentary in a son et lumière version of his On Imaginary Media.

Science and Cooking: Physics Meets Food, From Homemade to Haute Cuisine Michael Brenner, Pia Sørensen, David

Weitz,2020-10-20 Based on the popular Harvard University and edX course, Science and Cooking explores the scientific basis of why recipes work. The spectacular culinary creations of modern cuisine are the stuff of countless articles and social media feeds. But to a scientist they are also perfect pedagogical explorations into the basic scientific principles of cooking. In Science and Cooking, Harvard professors Michael Brenner, Pia Sørensen, and David Weitz bring the classroom to your kitchen to teach the physics and chemistry underlying every recipe. Why do we knead bread? What determines the temperature at which we cook a steak, or the amount of time our chocolate chip cookies spend in the oven? Science and Cooking answers these questions and more through hands-on experiments and recipes from renowned chefs such as Christina Tosi, Joanne Chang, and Wylie Dufresne, all beautifully illustrated in full color. With engaging introductions from revolutionary chefs and collaborators Ferran Adria and José Andrés, Science and Cooking will change the way you approach both subjects—in your kitchen and beyond.

Writing at the Limit Daniel Punday, 2012-05-01 While some cultural critics are pronouncing the death of the novel, a whole generation of novelists have turned to other media with curiosity rather than fear. These novelists are not simply incorporating references to other media into their work for the sake of verisimilitude, they are also engaging precisely such media as a way of talking about what it means to write and read narrative in a society filled with stories told outside the print medium. By examining how some of our best fiction writers have taken up the challenge of film, television, video games, and hypertext, Daniel Punday offers an enlightening look into the current status of such fundamental narrative concepts as character, plot, and setting. He considers well-known postmodernists like Thomas Pynchon and Robert Coover, more-accessible authors like Maxine Hong Kingston and Oscar Hijuelos, and unjustly overlooked writers like Susan Daitch and Kenneth Gangemi, and asks how their works investigate the nature and limits of print as a medium for

storytelling. *Writing at the Limit* explores how novelists locate print writing within the contemporary media ecology, and what it really means to be writing at print's media limit.

**Functional Analysis, Harmonic Analysis, and Image Processing:
A Collection of Papers in Honor of Björn Jawerth** Michael

Cwikel, Mario Milman, 2017-07-26 This volume is dedicated to the memory of Björn Jawerth. It contains original research contributions and surveys in several of the areas of mathematics to which Björn made important contributions. Those areas include harmonic analysis, image processing, and functional analysis, which are of course interrelated in many significant and productive ways. Among the contributors are some of the world's leading experts in these areas. With its combination of research papers and surveys, this book may become an important reference and research tool. This book should be of interest to advanced graduate students and professional researchers in the areas of functional analysis, harmonic analysis, image processing, and approximation theory. It combines articles presenting new research with insightful surveys written by foremost experts.

Live Cell Imaging Robert D. Goldman, David L. Spector, 2005
Recent advances in imaging technology reveal, in real time and

great detail, critical changes in living cells and organisms. This manual is a compendium of emerging techniques, organized into two parts: specific methods such as fluorescent labeling, and delivery and detection of labeled molecules in cells; and experimental approaches ranging from the detection of single molecules to the study of dynamic processes in organelles, organs, and whole animals. Although presented primarily as a laboratory manual, the book includes introductory and background material and could be used as a textbook in advanced courses. It also includes a DVD containing movies of living cells in action, created by investigators using the imaging techniques discussed in the book. The editors, David Spector and Robert Goldman, whose previous book was *Cells: A Laboratory Manual*, are highly respected investigators who have taught microscopy courses at Cold Spring Harbor Laboratory, the Marine Biology Laboratory at Woods Hole, and Northwestern University.

Photonic Band Gaps and Localization C.M.

Soukoulis, 2013-11-27 This volume contains the papers presented at the NATO Advanced Research Workshop on Localization and Propagation of Classical Waves in Random and Periodic Media held in Aghia Pelaghia, Heraklion, Crete, May 26- 30, 1992. The workshop's goal was to bring together theorists and experimentalists from two related areas, localization and photonic band gaps, to highlight their common interests. The objectives of the workshop were (i) to assess the state-of-the-art in experimental and theoretical studies of structures exhibiting classical wave band gaps and/or localization, (ii) to discuss how such structures can be fabricated to improve technologies in different areas of physics and

engineering, and (iii) to identify problems and set goals for further research. Studies of the propagation of electromagnetic (EM) waves in periodic and/or disordered dielectric structures (photonic band gap structures) have been and continue to be a dynamic area of research. Anderson localization of EM waves in disordered dielectric structures is of fundamental interest where the strong electron-electron interaction effects entering the electron-localization are absent.

Silence John Cage, 1961-06 John Cage is the outstanding composer of avant-garde music today. The Saturday Review said of him: "Cage possesses one of the rarest qualities of the true creator- that of an original mind- and whether that originality pleases, irritates, amuses or outrages is irrelevant." "He refuses to sermonize or pontificate. What John Cage offers is more refreshing, more spirited, much more fun-a kind of carefree skinny-dipping in the infinite. It's what's happening now." -The American Record Guide "There is no such thing as an empty space or an empty time. There is always something to see, something to hear. In fact, try as we may to make a silence, we cannot. Sounds occur whether intended or not; the psychological turning in direction of those not intended seems at first to be a giving up of everything that belongs to humanity. But one must see that humanity and

nature, not separate, are in this world together, that nothing was lost when everything was given away.”

Audiovisions Siegfried Zielinski, 1999 De productie, de distributie, en de waarneming van bewegende beelden zijn onderhevig aan een radicale transformatie. Doordat steeds snellere computers en digitale technologie kracht bundelen, ontstaat er een nieuwe vorm van 'audiovisie'. Bijna niets zal hetzelfde blijven. De ooit 'normale' media voor het uitdragen van film - de bioscoop en de televisie - blijken niet meer te zijn dan een intermezzo in de geschiedenis van de audiovisuele media. Dit boek interpreteert de veranderingen niet als cultureel verlies maar als een uitdaging: de nieuwe 'audiovisie' moet anders benaderd worden om strategische interventie mogelijk te maken. 'Audiovisions' ondersteunt deze benadering op historische wijze. Door te kijken naar 100 jaar, van het eind van de negentiende tot aan het eind van de 20ste eeuw, laat het zien waarom de bioscoop en televisie als eindige, culturele vormen gezien moeten worden. Tevens is het boek een pleidooi voor 'blijvend kracht' van studies naar culturele technologie en de technologische cultuur van film. Essayistisch in stijl, is het boek gestructureerd rond verschillende historische fasen. De beelden en bij de tekst zorgen voor supplementaire informatie, contrast, en

aanvullend commentaar.

Archaeology Yesterday and Today Jaroslav Malina, Zdeněk Vašíček, 1990-11-30 This book, first published in 1990, presents a radical interpretation by Czech philosophers of science of the philosophical, social and political forces shaping archaeology from antiquity onwards. It provides a theoretically sophisticated and cosmopolitan overview of modern archaeology, treating the history of both traditions in a single framework.

Pocket Atlas of Remote Islands Judith Schalansky, 2014-11-12 A lovely small-trim edition of the award-winning Atlas of Remote Islands The Atlas of Remote Islands, Judith Schalansky's beautiful and deeply personal account of the islands that have held a place in her heart throughout her lifelong love of cartography, has captured the imaginations of readers everywhere. Using historic events and scientific reports as a springboard, she creates a story around each island: fantastical, inscrutable stories, mixtures of fact and imagination that produce worlds for the reader to explore. Gorgeously illustrated and with new, vibrant colors for the Pocket edition, the atlas shows all fifty islands on the same scale, in order of the oceans they are found. Schalansky lures us to fifty remote destinations—from Tristan da Cunha to Clipperton Atoll, from

Christmas Island to Easter Island—and proves that the most adventurous journeys still take place in the mind, with one finger pointing at a map.
