Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law

enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Conservation of Cave 85 at the Mogao Grottoes, Dunhuang Neville Agnew, Lori Wong, 2014-02-01 The Mogao Grottoes, a World Heritage Site in northwestern China, are located along the ancient caravan routes—collectively known as the Silk Road—that once linked China with the West. Founded by a Buddhist monk in the late fourth century, Mogao flourished over the following millennium, as monks, local rulers, and travelers commissioned hundreds of cave temples cut into a mile-long rock cliff and adorned them with vibrant murals. More than 490 decorated grottoes remain, containing thousands of sculptures and some 45,000 square meters of wall paintings, making Mogao one of the world's most significant sites of Buddhist art. In 1997 the Getty Conservation Institute, which had been working with the Dunhuang Academy since 1989, began a case study using the Late-Tang dynasty Cave 85 to develop a methodology that would stabilize the deteriorating wall paintings. This abundantly illustrated volume is the definitive report on the project, which was completed in 2010.

A Stolen Life Jaycee Dugard, 2011-07-12 A raw and powerful memoir of Jaycee Lee Dugard's own story of being kidnapped as an 11-year-old and held captive for over 18 years On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper's parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido's home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both

fathered by Garrido. Dugard's memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

Daily Life in Traditional China Charles Benn,2001-12-30 This thorough exploration of the aspects of everyday life in China during the Tang Dynasty (618-907) provides fascinating insight into a culture and time that is often misunderstood, especially by those from western cultures. Here students will find the details of what life was really like for these people. How was their society structured? How did they entertain themselves? What sorts of food did they eat? The answers to these and other questions are provided in full detail to bring this golden age of Chinese culture alive for the modern reader. Based mainly on classical translations from the Chinese themselves, each chapter addresses a specific aspect of daily living in the voices of those who lived during the time. A myriad of interesting details are provided to help readers discover, among other things, what life was like in the city, what homes and gardens were like, how the role's of men and women differed, and the many rituals in which people participated. Detailed descriptions of the clothes and materials people wore, the games they played and the cooking methods they used for specific foods provide readers with the ability to experiment on their own to recreate the time and place, so they can have a better understanding of this intriguing culture.

Democratizing Innovation Eric Von Hippel,2006-02-17 The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services

for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among lead users, who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

In the Time of the Butterflies Julia Alvarez, 2010-01-12 Celebrating its 30th anniversary in 2024, internationally bestselling author and literary icon Julia Alvarez's *In the Time of the Butterflies* is beautiful, heartbreaking and alive ... a lyrical work of historical fiction based on the story of the Mirabal sisters, revolutionary heroes who had opposed and fought against Trujillo. (Concepción de León, New York Times) Alvarez's new novel, *The Cemetery of Untold Stories*, is coming April 2, 2024. Pre-order now! It is November 25, 1960, and three beautiful sisters have been found near their

wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leónidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas—the Butterflies. In this extraordinary novel, the voices of all four sisters--Minerva, Patria, María Teresa, and the survivor, Dedé--speak across the decades to tell their own stories, from secret crushes to gunrunning, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human costs of political oppression. Alvarez helped blaze the trail for Latina authors to break into the literary mainstream, with novels like *In the Time of the Butterflies* and *How the García Girls Lost Their Accents* winning praise from critics and gracing best-seller lists across the Americas.—Francisco Cantú, *The New York Times Book Review* This Julia Alvarez classic is a must-read for anyone of Latinx descent. —Popsugar.com A gorgeous and sensitive novel . . . A compelling story of courage, patriotism and familial devotion. —People Shimmering . . . Valuable and necessary. —Los Angeles Times A magnificent treasure for all cultures and all time.” —St. Petersburg Times Alvarez does a remarkable job illustrating the ruinous effect the 30-year dictatorship had on the Dominican Republic and the very real human cost it entailed.—Cosmopolitan.com

All that is Solid Melts Into Air Marshall Berman, 1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

Metallography and Microstructure in Ancient and Historic Metals David A. Scott, 1992-01-02 David A. Scott provides a detailed introduction to the structure and morphology of

ancient and historic metallic materials. Much of the scientific research on this important topic has been inaccessible, scattered throughout the international literature, or unpublished; this volume, although not exhaustive in its coverage, fills an important need by assembling much of this information in a single source. Jointly published by the GCI and the J. Paul Getty Museum, the book deals with many practical matters relating to the mounting, preparation, etching, polishing, and microscopy of metallic samples and includes an account of the way in which phase diagrams can be used to assist in structural interpretation. The text is supplemented by an extensive number of microstructural studies carried out in the laboratory on ancient and historic metals. The student beginning the study of metallic materials and the conservation scientist who wishes to carry out structural studies of metallic objects of art will find this publication quite useful.
