The Beekeeper of Aleppo Christy Lefteri, 2020-06-23 This unforgettable novel puts human faces on the Syrian war with the immigrant story of a beekeeper, his wife, and the triumph of spirit when the world becomes unrecognizable. “A beautifully crafted novel of international significance that has the capacity to have us open our eyes and see.”—Heather Morris, author of *The Tattooist of Auschwitz*
WINNER OF THE ASPEN WORDS LITERARY PRIZE • FINALIST FOR THE DAYTON LITERARY PEACE PRIZE
• NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE Nuri is a beekeeper and Afra, his wife, is an artist. Mornings, Nuri rises early to hear the call to prayer before driving to his hives in the countryside. On weekends, Afra sells her colorful landscape paintings at the open-air market. They live a simple life, rich in family and friends, in the hills of the beautiful Syrian city of Aleppo—until the unthinkable happens. When all they love is destroyed by war, Nuri knows they have no choice except to leave their home. But escaping Syria will be no easy task: Afra has lost her sight, leaving Nuri to navigate her grief as well as a perilous journey through Turkey and Greece toward an uncertain future in Britain. Nuri is sustained only by the knowledge that waiting for them is his cousin Mustafa, who has started an apiary in Yorkshire and is teaching fellow refugees beekeeping. As Nuri and Afra travel through a broken world, they must confront not only the pain of their own unspeakable loss but dangers that would overwhelm even the bravest souls. Above all, they must make the difficult journey back to each other, a path once so familiar yet rendered foreign by the heartache of displacement. Moving, intimate, and beautifully written, *The Beekeeper of Aleppo* is a book for our times: a novel that at once reminds us that the most peaceful and ordinary lives can be utterly upended in unimaginable ways and brings a journey in faraway lands close to home, never to be forgotten. Praise for *The Beekeeper of Aleppo* “This book dips below the deafening headlines, and tells a true story with subtlety and power.”—Esther Freud, author of *Mr. Mac and Me* “This compelling tale had me gripped with its compassion, its sensual style, and its onward and lively urge for resolution.”—Daljit Nagra, author of *British Museum* “This novel speaks to so much that is happening in the world today. It’s intelligent, thoughtful, and relevant, but very importantly it is accessible. I’m recommending this book to everyone I care about.”—Benjamin Zephaniah, author of *Refugee Boy*

Introduction to SuperCollider Andrea Valle, 2016-07-15 Originally developed by James McCartney in 1996 and now an open source project, SuperCollider is a software package for the synthesis and control of audio in real time. Currently, it represents the state of the art in the field of audio programming: there is no other software available that is equally powerful, efficient or flexible.

Yet, SuperCollider is often approached with suspicion or awe by novices, but why? One of the main reasons is the use of a textual user interface. Furthermore, like most software packages that deal with audio, SuperCollider prerequisites a series of skills, ranging from expertise in analog/digital signal processing, to musical composition, to computer science. However, as the beginner overcomes these initial obstacles and understands the powerful flexibility of SuperCollider, what once were seen as weaknesses become its strengths. SuperCollider's features also mean versatility in advanced software applications, generality in terms of computer modelling, and expressivity in terms of symbolic representations. This book aims at providing a brief overview of, and an introduction to, the SuperCollider programming environment. It also intends to informally present, by employing SuperCollider, a series of key notions relevant to what is broadly referred to as computer music. Andrea Valle is a researcher/aggregate professor in film, photography and television at the University of Turin-DAMS, and is active as a musician and composer. He has been a SuperCollider user since 2005.
