Changing Patterns of Warfare between India and Pakistan Rizwana Abbasi,Muhammad Saeed Uzzaman,2023-05-12 Changing Patterns of Warfare between India and Pakistan analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan. Advanced nuclear technologies such as nuclear submarines, aircraft carriers, ballistic missile defence systems (BMDs), multiple independently targetable re-entry vehicles (MIRVs), anti-satellite weapons (ASAT); and disruptive technologies such as hypersonic weapons, artificial intelligence (AI), lethal autonomous weapons (LAWs), unmanned aerial vehicles (UAVs) / drones and space-based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region. Further, the employment of India's compellence strategy is an indication of a change in its stance that demonstrates smart/surgical strikes are now more likely. The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct/indirect military control and hence challenge the existing status quo and deterrence stability. Against this backdrop, the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan. This book will be of interest to all those researching and working in the fields of security studies, strategic studies, nuclear policy, deterrence thinking and proliferation/non-proliferation aspects of the nuclear weapons programme within South Asia and beyond. It will also be relevant for the academic community, policy-makers, diplomats, members of international non-governmental organizations (INGOs), professional research institutes and organizations working on India-Pakistan relations.

The BRICS and the Future of Global Order Oliver Stuenkel,2020-02-03 The transformation of the BRIC acronym from an investment term into a household name of international politics and into a semi-institutionalized political outfit (called BRICS, with a capital 'S'), is one of the defining developments in international politics in the past decades. While the concept is now commonly used in the general public debate and international media, there has not yet been a comprehensive and scholarly analysis of the history of the BRICS term. The BRICS and the Future of Global Order, Second Edition offers a definitive reference history of the BRICS as a term and as an institution—a chronological narrative and analytical account of the BRICS concept from its inception in 2001 to the political grouping it is today. In addition, it analyzes what the rise of powers like Brazil, Russia, India, China, and South Africa means for the future of global order. Will the BRICS countries seek to establish a parallel system with its own distinctive set of rules, institutions, and currencies of power, rejecting key tenets of liberal internationalism, are will they seek to embrace the rules and norms that define today's Western-led order?

A Global Corporate Trust for Agroecological Integrity John W. Head,2019-06-14 This book examines global environmental governance and how legal, institutional, and conceptual reform can facilitate a transformation to a new 'natural-systems' form of agriculture. Profound global climate disruption makes it essential that we replace our current agricultural system - described in this book as a fossil-carbon-dependent 'modern extractive agriculture' - with a natural-systems agriculture featuring perennial grains growing in polycultures, thereby mimicking the natural grassland and forest ecosystems that modern extractive agriculture has largely destroyed. After examining relevant international legal and conceptual foundations (sovereignty, federalism, global governance) and existing international organizations focusing on agriculture, the book explores legal and institutional opportunities to facilitate dramatic agricultural reform and ecological restoration. Among other things, it explains how innovative federalism structures around the world provide patterns for reorienting global environmental governance, including what the book calls eco-states that would, through exercise of pluralistic sovereignty, be responsible for agroecological management. Drawing from his experience working in international institutions, the author provides detailed global-governance proposals for facilitating the type of agricultural reform that can help avoid

ecological collapse, especially through soil degradation and climate change. This book will be of great interest to students and scholars of international law, agroecology, climate change, ecological restoration, sustainable development, and global governance, as well as policy-makers and practitioners working in these fields.

Eurasia's Maritime Rise and Global Security Geoffrey F. Gresh, 2018-04-04 This book explores Eurasia's growing embrace of its maritime geography from the Indian Ocean to Pacific Asia and the Arctic. In an age of climate change, the melting of the Arctic will transform Eurasia's importance, in addition to influencing the political, economic, and military dynamics across Eurasia's main maritime regions. These emerging shifts have already begun to alter maritime trade and investment patterns, and thus the global political economy. It also creates a rising threat to the current status quo of world order that has long been dominated by the Atlantic World. This edited volume showcases some of the world's leading experts and examines Eurasia from a saltwater perspective, analyzing its main maritime spaces in a threefold manner—as avenue, as arena, as source—to show the significance of this geostrategic change and why it matters for the future of the world's oceans.

Howler Monkeys Martín M. Kowalewski, Paul A. Garber, Liliana Cortés-Ortiz, Bernardo Urbani, Dionisios Youlatos, 2014-12-04 Howler monkeys (genus *Alouatta*) comprise twelve species of leaf-eating New World monkeys that range from southern Mexico through northern Argentina. This genus is the most widespread of any New World primate taxa, and can be found to inhabit a range of forest types from undisturbed rainforest to severely anthropogenically impacted forest fragments. Although there have been many studies on individual species of howler monkeys, this book is the first comprehensive volume to place information on howler behavior and biology within a theoretical framework of ecological and social adaptability. This is the second of two volumes devoted to the genus *Alouatta*. This volume: · Examines behavioral and physiological mechanisms that enable howler monkeys to exploit highly disturbed and fragmented habitats · Presents models of howler monkey diet, social organization, and mating systems that can also inform researchers studying Old World colobines, apes, and other tropical mammals These goals are achieved in a collection of chapters written by a distinguished group of scientists on the feeding ecology, behavior, mating strategies, and management and conservation of howlers. This book also contains chapters on the howler microbiome, the concept of behavioral variability, sexual selection, and the role of primates in forest regeneration.

An IUCN situation analysis of terrestrial and freshwater fauna in West and Central Africa, 2015-06-01 This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa. It draws on a wide range of information to provide information on the status of these species, important sites, pressures, legislation, the effectiveness of protected areas, and both community-based incentives for conservation and institutional responses. The overriding conclusion is of substantial wildlife declines and inadequate responses to either long-standing pressures or rapidly escalating threats that have emerged in recent years.

Spatial Observation of Giant Panda Habitat Xinyuan Wang, Jing Zhen, Qingkai Meng, 2023-05-08 This book evaluates the past, present, and future habitat suitability of giant pandas based on spatial observation technology involving optical remote sensing, microwave remote sensing, and LiDAR to discover the mysterious ecological environment of giant panda habitat. Considering the problems faced by the world natural heritage site protection, it takes the world natural heritage site “Sichuan Giant Panda Sanctuaries - Wolong, Mt Siguniang and Jiayin Mountains” as the research area, exemplifies systematically the various techniques and methodologies of spatial information technology for monitoring, evaluation, and prediction of rare and endangered species habitats, and provides scientific suggestions for sustainable development of giant panda habitat based on a series of comprehensive case analysis at Wolong national nature reserve and Ya'an prefecture, Sichuan province, China. The book serves both as a textbook in the field of natural heritage protection, remote sensing, and GIS application, as well as a reference for managing natural heritage sites.

Tourism and Water Stefan Gössling, C. Michael Hall, Daniel Scott, 2015-04-01 This book provides a systematic and comprehensive guide to the current state of knowledge on tourism and water. Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR) Adrian Fozzard, This Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR) seeks to provide practitioners with the tools and information needed to respond to the public expenditure policy and management challenges arising from climate change. It is a series of notes and supporting materials written as a first step towards consolidating current research and international experience, identifying emerging practice and providing practical and applicable guidance for staff of central finance agencies, development agencies, environmental agencies and other international organizations working on climate change issues. In addition to emphasizing the importance of strengthening national systems throughout, the Sourcebook focuses on the specific public expenditure policy and management challenges posed by climate change, such as decision-making in the face of uncertain future climate conditions, expenditure planning for extreme weather and climate events, the lack of agreed budget definition and classification of climate change activities.

India-China Relations Jagannath P. Panda, 2016-10-04 The rise of India and China as two major economic and political actors in both regional and global politics necessitates an analysis of not only their bilateral ties but also the significance of their regional and global pursuits. This book looks at the nuances and politics that the two countries attach to multilateral institutions and examines how they receive, react to and approach each other's presence and upsurge. The driving theme of this book is to highlight the enduring and emerging complexities in India-China relations, which are multi-layered and polygonal in nature, and both a result and reflection of a multipolar world order. The book argues that coexistence between India and China in this multipolar world order is possible, but that it is limited to a medium-term perspective, given the constraints of identity complexities and global aspirations these two rising powers are pursuing. It goes on to discuss how their search for energy resources, quest to uphold their own identity as developing powers, and engagement in balance-of-power politics to exert authority on each other's presence, are some elements that guide their non-cooperative relationship. By explaining the foreign policy approaches of Asia's two major powers towards the growing Asian and global multilateralism, and highlighting the policies they carry towards each other, the book is a useful contribution to students and scholars of Asian Politics, Foreign Policy and International Relations.

Advancing Human Development Frances Stewart, Gustav Ranis, Emma Samman, 2018-02-17 Human Development has been advocated as the prime development goal since 1990, when the publication of the first UNDP Human Development Report proposed that development should improve the lives people lead in multiple dimensions instead of primarily pursuing economic growth. This approach forms the foundation of Advancing Human Development: Theory and Practice. It traces the evolution of approaches to development, showing how the Human Development approach emerged as a consequence of defects in earlier strategies. Advancing Human Development argues that Human Development is superior to measures of societal happiness. It investigates the determinants of success and failure in Human Development across countries over the past forty years, taking a

multidimensional approach to point to the importance of social institutions and social capabilities as essential aspects of change. It analyses political conditions underlying the performance of Human Development, and surveys global progress in multiple dimensions such as life expectancy, infant mortality, and education and outcomes, whilst reflecting on dimensions which have worsened over time, such as rising inequality and declining environmental conditions. These deteriorating conditions inform Advancing Human Development's account of the challenges to the Human Development approach, covering the insufficient attention paid to macroeconomic conditions and the economic structure needed for sustained success.

The Hindu Kush Himalaya Assessment Philippus Wester,Arabinda Mishra,Aditi Mukherji,Arun Bhakta Shrestha,2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people’s well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

On the Edge Claude Martin,2015-04-20 In 1972, *The Limits to Growth* introduced the idea that world resources are limited. Soon after, people became aware of the threats to the world’s rainforests, the biggest terrestrial repositories of biodiversity and essential regulators of global air and water cycles. Since that time, new research and technological advances have greatly increased our knowledge of how rainforests are being affected by changing patterns of resource use. Increasing concern about climate change has made it more important than ever to understand the state of the world’s tropical forests. This book provides an up-to-date picture of the health of the world’s tropical forests. Claude Martin, an eminent scientist and conservationist, integrates information from remote imaging, ecology, and economics to explain deforestation and forest health throughout the world. He explains how urbanization, an increasingly global economy, and a worldwide demand for biofuels put new pressure on rainforest land. He examines the policies and market forces that have successfully preserved forests in some areas and discusses the economic benefits of protected areas. Using evidence from ice core records and past forest cover patterns, he predicts the most likely effects of climate change. Claude Martin brings his wealth of experience as an ecologist, director of the WWF, and advisor to various conservation organizations to bear on the latest research from around the world. Contributions from eight leading experts provide additional insight.
