The Coming Collapse of the Dollar and How to Profit from It James Turk,John Rubino,2004-12-28 The dollar is in trouble. It has fallen against other currencies for the past three years, and now its orderly retreat could well become a rout. This spells potential disaster for the American economy—and potential riches for a few smart investors. In *The Coming Collapse of the Dollar and How to Profit from It*, financial gurus James Turk and John Rubino show how the dollar arrived at this precipice, why it will plunge, and how you can profit from the resulting financial crisis. The U.S. today is the world's biggest debtor nation, printing money with abandon to sustain the illusion of prosperity. The federal government owes \$7 trillion and its debt is soaring. As a society, we owe more than \$37 trillion, or about \$500,000 per family of four. Our trade deficit with other countries is staggering, and to finance this mountain of debt we're flooding the world with dollars. The inevitable result: The dollar will decline until it is displaced as the world's dominant currency. Precious metals will soar in value, and gold will reclaim its monetary role at the center of the global financial system. Traditionally a haven during times of uncertainty, gold has risen dramatically since 2001. By the fall of 2004 it was up by nearly 50%, at over \$400 an ounce. But this is just the beginning. James Turk, a leading gold authority and the founder of GoldMoney.com, and

veteran financial writer John Rubino, show readers how to capitalize on gold's dramatic climb. In *The Coming Collapse of the Dollar*, Turk and Rubino reveal which stocks and bonds will falter as the dollar declines and why that decline is virtually inevitable. They offer strategies for using gold coins, gold stocks, gold-based digital currencies, and other hard assets to create a profitable portfolio. And they explain how to make the most of your gold and other precious metal holdings, identifying the opportunities and pitfalls of buying gold mining stocks and the mutual funds that invest in them. America's debt binge has put its economy at grave risk. The value of the dollar is falling; many stocks are once again wildly overvalued; and bonds, tied to an ever-diminishing dollar, are a disaster waiting to happen. By investing in gold and other hard assets, Turk and Rubino explain how you can protect yourself from these dangers. *The Coming Collapse of the Dollar* and *How to Profit from It* is a must read for every investor, whatever the size of his or her portfolio. Springer Handbook of Materials Data Hans Warlimont, Werner Martienssen, 2018-07-27 The second edition of this well-received handbook is the most concise yet comprehensive compilation of materials data. The chapters provide succinct descriptions and summarize essential and reliable data for various types of materials. The information is amply illustrated with 900 tables and 1050 figures selected primarily from well-established data collections, such as Landolt-Börnstein, which is now part of the SpringerMaterials database. The new edition of the Springer Handbook of Materials Data starts by presenting the latest CODATA recommended values of the fundamental physical constants and provides comprehensive tables of the physical and physicochemical properties of the elements. 25 chapters collect and summarize the most frequently used data and relationships for numerous metals, nonmetallic materials, functional materials and selected special structures such as

liquid crystals and nanostructured materials. Along with careful updates to the content and the inclusion of timely and extensive references, this second edition includes new chapters on polymers, materials for solid catalysts and low-dimensional semiconductors. This handbook is an authoritative reference resource for engineers, scientists and students engaged in the vast field of materials science.

Corporate Grantmaking Steven L. Paprocki,Robert O. Bothwell,1994 In the past few years, there has been an extensive re-evaluation of the way in which American institutions interact with and demonstrate their concerns for communities of African Americans, Hispanics, Asian Pacific Islander Americans, and Native Americans. One issue under reassessment has been the adequacy of financial resources dedicated to strengthening these communities through employment preparation, health, community improvement, education, arts/humanities, and basic human services. As part of the National Committee for Responsive Philanthropy's (NCRP) mission to encourage corporate grantmakers (and other philanthropic institutions) to be more responsive to the needs of disenfranchised communities, NCRP has initiated a series of surveys to determine the scope and extent of corporate support for Racial/Ethnic grantmaking patterns of the top corporations in the U.S. This survey is analysis of the Racial/Ethnic grantmaking patterns of the top 25 publicly-held corporate profitmakers of 1988, according to Forbes magazine.
