Augmented Reality in Tourism, Museums and Heritage

Vladimir Geroimenko, 2021-04-24 This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. *Augmented Reality in Tourism, Museums and Heritage: A New Technology to Inform and Entertain* is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

Bound by Creativity Hannah Wohl, 2021-06-23 While our traditional view of creative work might lead us to think of artists as solitary visionaries, the creative process is in fact deeply social. From those trying to land their first solo show to those with dozens of museum exhibitions, artists are influenced by others' evaluations. In *Bound by Creativity*, sociologist Hannah Wohl draws on more than one hundred interviews and two years of ethnographic research in the New York contemporary art market, developing a sociological perspective on creativity through the analytic lens of judgment. Wohl takes readers into artists' studios and shares firsthand how they decide which works to leave unfinished, destroy, put into storage, or exhibit. Wohl then transports readers into the art world, examining the interactions in galleries, international art fairs, and collectors' homes that shape artists' understandings of their work. Wohl shows us how moments of judgment--whether by artists, curators, dealers, or collectors--reveal artistic practices to be profoundly sociological, both because artists' sensibilities are informed by their interactions with others, and because artists' decisions about their work affect the objects that circulate through the world. We see that judgment is an integral element of the creative process, resulting in the creation of distinctive and original works. Creativity, Wohl shows, rests on these highly social dynamics, and exploring it through this lens sheds new light on the production of cultural objects, markets, and prestige.

Assembling Çatalhöyük Ian Hodder, Arkadiusz

Marciniak, 2017-12-02 *Assembling Çatalhöyük*, like archaeological remains, can be read in a number of ways. At one level the volume reports on the exciting new discoveries and advances that are

being made in the understanding of the 9000 year-old Neolithic site of Çatalhöyük. The site has long been central to debates about early village societies and the formation of mega-sites in the Middle East. The current long-term project has made many advances in our understanding of the site that impact our wider understanding of the Neolithic and its spread into Europe from the Middle East. These advances concern use of the environment, climate change, subsistence practices, social and economic organization, the role of religion, ritual and symbolism. At another level, the volume reports on methodological advances that have been made by team members, including the development of reflexive methods, paperless recording on site, the integrated use of 3D visualization, and interactive archives. The long-term nature of the project allows these various innovations to be evaluated and critiqued. In particular, the volume includes analyses of the social networks that underpin the assembling of data, and documents the complex ways in which arguments are built within quickly transforming alliances and allegiances within the team. In particular, the volume explores how close inter-disciplinarity, and the assembling of different forms of data from different sub-disciplines, allow the weaving together of information into robust, distributed arguments.

Critical Gaming: Interactive History and Virtual Heritage Erik Champion, 2016-03-09 This book explains how designing, playing and modifying computer games, and understanding the theory behind them, can strengthen the area of digital humanities. This book aims to help digital humanities scholars understand both the issues and also advantages of game design, as well as encouraging them to extend the field of computer game studies, particularly in their teaching and research in the field of virtual heritage. By looking at re-occurring issues in the design, playtesting and interface of serious games and game-based learning for cultural heritage and interactive history, this book highlights the importance of visualisation and self-learning in

game studies and how this can intersect with digital humanities. It also asks whether such theoretical concepts can be applied to practical learning situations. It will be of particular interest to those who wish to investigate how games and virtual environments can be used in teaching and research to critique issues and topics in the humanities, particularly in virtual heritage and interactive history.

Mastering Digital Panoramic Photography Harald Woeste, 2009 Takes the reader on a tour from the basics of capturing panoramas, all the way through stitching, editing, and printing panoramic images. This title provides a detailed description of the necessary equipment and materials, as well as the various software tools that can be used in the workflow.

Drone Operator's Logbook Jonathan Rupprecht, 2015-12-02 Federal Aviation Regulations, COA, & Section 333 Exemption Compliant. This logbook has been specifically designed to be compliant with 14 CFR 61.51, Section 333 exemptions, and COA logbook requirements. Easy COA Reporting. If you have MULTIPLE aircraft, this will NOT work. Buy one logbook for each drone. The FAA requires that commercial operators who have 333 exemptions and blanket COA's to file monthly reports. It is EXTREMELY annoying to log all this information and then send it in via email. If you have one drone per logbook, do not have any takeoff or landing damage, equipment malfunctions, or lost link events, you could simply make scans of the pages for the month and email them into the FAA. The COA's say, number of flights (per location, per aircraft) & total aircraft operational hours[.] The columns only support one aircraft; however, recreational flyers could list multiple aircraft because they are currently not required to report. Disclaimer: Current FAA blanket COAs say must submit the following information and do not explicitly say scans are acceptable. The FAA could issue guidance in the future further clarifying the mode of report (text in email vs. scan in email). It is up to YOU to keep up to date on this. The FAA or Law Enforcement

Can Request Your Logbook. 14 C.F.R. § 61.51(i) says, Persons must present their pilot certificate, medical certificate, logbook, or any other record required by this part for inspection upon a reasonable request by the FAA, an authorized representative from the National Transportation Safety Board, or any Federal, State, or local law enforcement officer. If your electronic logbook is on your device, do you really want to give law enforcement or the FAA your device? Furthermore, how are you to get the data off that device? Insurance. When you apply for insurance, they will ask you to fill out a form that is going to ask for all sorts of information. A logbook will assist you in filling out the form so you can receive the most accurate quote. Marketing. Showing a completed logbook to a potential customer is a great marketing point. Like the old adage, A picture is worth a thousand words, a good logbook is worth a thousand flights. You can quickly demonstrate your flight experience by flipping through the pages. Furthermore, a well-kept and orderly logbook gives the impression that you are a professional. Required in Other Countries. Other countries such as South Africa require the drone logbook to be in paper. Paper is the current industry standard. Going for a Certificate/Rating. Individuals can use this logbook to apply their experience towards UAS certificates / ratings. While the FAA is still working on creating certificates and ratings, you can prepare for the future by logging everything now. Less Cumbersome. If you are marketing to a potential client, you can scan pages of your logbook and send it to them. It is more cumbersome to get the data off a phone or website. Very Little Problems. What happens if your phone is stolen, water damaged, battery dies, or there is poor cell phone signal? Paper does not need a cell signal or batteries. No Data Theft. You don't have to worry about data theft like you would with a website or an app. Fidelity. Electronic logbooks can be changed while pen and paper is permanent.

BONUS DVD ONLY WITH THE PRINT EDITION (NOT AVAILABLE WITH

eBOOKS) ! In 2007, The HDRI Handbook was the first book to present this revolutionary new field to a larger audience. These days HDRI is a fully mature technology available to everyone. Real estate and landscape photographers have adopted it as part of their regular workflow, it has become one of the hottest trends for ambitious amateurs and creative professionals alike, and the modern movie industry would be completely dysfunctional without it. Now The HDRI Handbook 2.0 redefines its own gold standard. It has been completely rewritten and is packed with practical hints and tips, background knowledge, reference tools, breathtaking artist portfolios, and inspiring interviews. The book includes dozens of new step-by-step tutorials. Beginners will get a methodically solid introduction and advanced readers will be able to refine their technique to perfection. Topics include:- Understanding the foundation of HDRI- HDR software comparisons and evaluations- Capturing HDR images: today and tomorrow- Tonemapping for creating superior prints- HDR image processing and compositing- Shooting and stitching HDR panoramas- Image-based lighting and CG rendering 2.0 updates include:- New cameras, sensors, and HDR beamsplitter rigs- Open Camera Controller for endless auto-bracketing- Correct RAW pre-processing and ghost removal- Dozens of practical, easy-to-follow tutorials- A structured approach to tonemapping, inspired by Ansel Adams- Set etiquette and tips for capturing HDR panos for visual effects- Seven artist spotlights showing unique perspectives on HDRI- Seven crossword puzzles: a fun way to test yourself !
