Supreme Magus Legion20,2019-01-23 Derek McCoy was a man who spent his entire life facing adversity and injustice. After being forced to settle with surviving rather than living, he had finally found his place in the world, until everything was taken from him one last time. After losing his life to avenge his murdered brother, he reincarnates until he finds a world worth living in, a world filled with magic and monsters. Follow him along his journey, from grieving brother to alien soldier. From infant to Supreme Magus. ----- Tags: Transmigration, Male MC, Western Fantasy Schedule: 12 chapters/week (unless I'm ill or stuff happens) Chapter Length: 1200 - 1400 words Warning: The MC is not a hero nor an anti-hero. He is a broken, cynic and misanthropic person looking only for his own gain. If you are looking for a forgiving, nice, MC that goes around saving people in distress, this is not your cup of tea. Same if you want an unchanging MC with no character development.

The Burning Of Bridget Cleary Angela Bourke,2010-12-15 In 1895 twenty-six-year-old Bridget Cleary disappeared from her house in rural Tipperary. At first, some said that the fairies had taken her into their stronghold in a nearby hill, from where she would emerge, riding a white horse. But then her badly burned body was found in a shallow grave. Her husband, father, aunt and four cousins were arrested and charged, while newspapers in nearby Clonmel, and then in Dublin, Cork, London and further afield attempted to make sense of what had happened. In this lurid and fascinating episode, set in the last decade of the nineteenth century, we witness the collision of town and country, of storytelling and science, of old and new. The torture and burning of Bridget Cleary caused a sensation in 1895 which continues to reverberate more than a hundred years later. Winner of the Irish Times Prize for Non-Fiction

Advances in Artificial Intelligence, Software and Systems Engineering Tareq Z. Ahram,2018-06-28 This book focuses on emerging issues following the integration of artificial intelligence systems in our daily lives. It focuses on the cognitive, visual, social and analytical aspects of computing and intelligent technologies, highlighting ways to improve technology acceptance, effectiveness, and efficiency. Topics such as responsibility, integration and training are discussed throughout. The book also reports on the latest advances in systems engineering, with a focus on societal challenges and next-generation systems and applications for meeting them. It also discusses applications in smart grids and infrastructures, systems engineering education as well as defense and aerospace. The book is based on both the AHFE 2018 International Conference on Human Factors in Artificial Intelligence and Social Computing, Software and Systems Engineering, The Human Side of Service Engineering and Human Factors in Energy, July 21–25, 2018, Loews Sapphire Falls Resort at Universal Studios, Orlando, Florida, USA.

Educational Research James B. Schreiber, Kimberly Asner-Self,2010-10-26 Researchers finally have a resource that focuses on the research question, providing them with a unique approach that will help in the field. Key Ideas sections presented in each chapter act as an organising mechanism and look at the big picture of that chapter. Many of the writing activities are open-ended questions that allow them to write questions or what they are thinking about the topic at that point. In-Text Activities ask them to write down what they are working on, such as a research question, review of literature, or potential sample. Case study examples are also integrated throughout to demonstrate how decisions are made and how they affect everything in a study. This enables researchers to create the most effective studies.

Crisis Communications Kathleen Fearn-Banks,2002 A casebook approach to studying crisis communications means learning from the actions of those who have experienced crises. What did they expect? What actually happened? Were they prepared? What were their strategies? What were their challenges, pressures, and problems? Were the news media adversarial or supportive? If they had to do it again, what would they do differently? These and other questions are answered in the case studies of this second edition. Presenting organizational and individual problems that may become crises and the communication responses to these situations, this revision of Fearn-Banks' very successful text: * presents crisis communication theory, including a critique of the communications of White Star Lines after its Titanic sank on its maiden voyage; * describes ways of determining the most likely and most damaging crises that may strike an organization; * centers on causes of crisis--rumor, gotcha television news and the non-expert expert, and crises caused by the news media; * gets into the 21st century and cyberspace-caused crises, including mini-cases of rogue Web sites and e-mail rumors; * explains how to communicate with the news media, lawyers, internal publics or audiences, and external publics; and * includes narrated case studies illustrating how spokespersons and managers used communication in several kinds of crises. The text is supplemented by a workbook, enabling students to test their knowledge and develop their skills. Written as a primer for crisis communications, public relations, and communications management, Crisis Communications serves as an essential resource in the practice of public relations and corporate communications.

Applying Case-Based Reasoning Ian Watson,1997-07 This book explains the principles of CBR by describing its origin and contrasting it with familiar information disciplines such as traditional data processing, logic programming, rule-based expert systems, and object-oriented programming. Through case studies and step-by-step examples, this book shows programmers and software managers how to design and implement a reliable, robust CBR system in a real-world environment.

Delay the Disease David Zid,2007-01-01 The exercise program is a collaboration between a certified personal trainer, David Zid, a nurse, Jackie Russell and an orthopedic surgeon, Dr. Thomas Mallory, who retired due to Parkinson's disease. The idea was sparked when Dr. Mallory discovered that a daily exercise routine created for him by Zid seemed to dramatically improve his symptoms. The result was a book detailing a fitness plan for Parkinson's patients at every stage of the disease. The 70 page spiral bound book lays flat enabling the person to easily consult each Parkinson's specific exercise which is illustrated in full color with a detailed description on how to perform the exercise. Emphasis is placed on activities of daily living that frequently become a challenge to those with Parkinson's, such as rising from a chair or moving around in crowds. The program is well thought out and works the entire body.
