The Histories Book 7: Polymnia Herodotus,2015-08-24 Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the Father of History, and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his inquiry, being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the Muse of History, Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

  <u>Four Internets</u> Kieron O'Hara,Wendy Hall,2021 The book describes the Internet, and how Internet governance prevents it fragmenting into a 'Splinternet'. Four opposing ideologies about how data flows around the network have become prominent because they are (a) implemented by technical standards, and (b) backed by influential geopolitical entities. Each of these specifies an 'Internet', described in relation to its implementation by a specific geopolitical entity. The Four Internets of the title are the Silicon Valley Open Internet, developed by pioneers of the Internet in the 1960s, based on principles of openness and efficient dataflow; the Brussels Bourgeois Internet, exemplified by the European Union with a focus on human rights and legal administration; the DC Commercial Internet, exemplified by the Washington establishment and its focus on property rights and market solutions; and the Beijing Paternal Internet, exemplified by the Chinese government's control of Internet content. These Internets have to coexist if the Internet as a whole is to remain connected. The book also considers the weaponization of the hacking ethic as the Moscow Spoiler model, exemplified by Russia's campaigns of misinformation at scale; this is not a vision of the Internet, but is parasitic on the others. Each of these ideologies is illustrated by a specific policy question. Potential future directions of Internet development are considered, including the policy directions that India might take, and the development of technologies such as artificial

intelligence, smart cities, the Internet of Things, and social machines. A conclusion speculates on potential future Internets that may emerge alongside those described--

  Journeys in Narrative Inquiry D Jean Clandinin,2019-09-20 Organized around a metaphor of an academic journey, D. Jean Clandinin offers published tracings of an unfolding journey over 40 years that, at its outset, appeared to focus only on questions of epistemology. However, the book illuminates how that apparent beginning focus shape-shifted to questions of methodology, ethics, ontology, and subsequently, political concerns. Clandinin shows that, even at the outset, her research wonders were grounded in relational

understandings of experience, understandings that were simultaneously ontological, methodological, epistemological and ethical. Jean's work is collaborative, an engagement alongside others and within the contexts in which they and she lived and worked, including those who were participants in the research. She continues to acknowledge that narrative inquiry changes people's ways of being in the world, and those changes have ethical significance. While what she and her colleagues now call relational ethics has always been central, recently her sense of ethics has become more explicitly political. She shows the development of ideas over time, beginning as she entered doctoral work and continuing through 2019 and onward. Jean's work, centered on relational understandings of experience, highlights ethical dimensions, and has come to define narrative understandings for generations of researchers. This book will be an invaluable resource for researchers and graduate students, and professional researchers in both educational and healthcare settings. .
