Sternberg's Diagnostic Surgical Pathology Stacey E. Mills, Joel K. Greenson, Jason L. Hornick, Teri A. Longacre, Victor E. Reuter, 2015-01-21 Sternberg's Diagnostic Surgical Pathology is a flagship book in pathology. This classic 2-volume reference presents advanced diagnostic techniques and the latest information on all currently known diseases. The book emphasizes the practical differential diagnosis of the surgical specimen while keeping to a minimum discussion of the natural history of the disease, treatment and autopsy findings. Contributors are asked to provide their expert advice on the diagnostic evaluation of every type of specimen from every anatomic site. This approach distinguishes it and provides a style of a personal consultation.

Types of Variation Terttu Nevalainen, Juhani Klemola, Mikko Laitinen, 2006-06-01 This volume interfaces three fields of linguistics rarely discussed in the same context. Its underlying theme is linguistic variation, and the ways in which historical linguists and dialectologists may learn from insights offered by typology, and vice versa. The aim of the contributions is to raise the awareness of these linguistic subdisciplines of each other and to encourage their cross-fertilization to their mutual benefit. If linguistic typology is to unify the study of all types of linguistic variation, this variation, both diatopic and diachronic, will enrich typological research itself. With the aim of capturing the relevant dimensions of variation, the studies in this volume make use of new

methodologies, including electronic corpora and databases, which enable cross- and intralinguistic comparisons dialectally and across time. Based on original research and unified by an innovative theme, the volume will be of interest to both students and teachers of linguistics and Germanic languages.

Distributed Computing and Artificial Intelligence Andre Ponce de Leon F. de Carvalho,Sara Rodríguez-González,Juan F. De Paz

Santana, Juan Manuel Corchado Rodríguez, 2010-11-18

The International Symposium on Distributed Computing and Artificial Intelligence (DCAI 10) is an annual forum that brings together past experience, current work and promising future trends associated with distributed computing, artificial intelligence and their application to provide efficient solutions to real problems. This symposium is organized by the Biomedicine, Intelligent System and Educational Technology Research Group (<http://bisite.usal.es/>) of the University of Salamanca. The present edition has been held at the Polytechnic University of Valencia, from 7 to 10 September 2010, within the Congreso Español de Informática (CEDI 2010). Technology transfer in this field is still a challenge, with a large gap between academic research and industrial products. This edition of DCAI aims at contributing to reduce this gap, with a stimulating and productive forum where these communities can work towards future cooperation with social and economic benefits. This conference is the forum in which to present application of innovative techniques to complex problems. Artificial intelligence is changing our society. Its application in distributed environments, such as internet, electronic commerce, environment monitoring, mobile communications, wireless devices, distributed computing, to cite some, is continuously increasing, becoming an element of high added value with social and economic potential, both in industry, life quality and research. These technologies are changing constantly as a result

of the large research and technical effort being undertaken in universities, companies.
