MITRE Systems Engineering Guide ,2012-06-05

A History of the Ecosystem Concept in Ecology Frank B. Golley,1993-01-01 The ecosystem concept--the idea that flora and fauna interact with the environment to form an ecological complex--has long been central to the public perception of ecology and to increasing awareness of environmental degradation. In this book an eminent ecologist explains the ecosystem concept, tracing its evolution, describing how numerous American and European researchers contributed to its evolution, and discussing the explosive growth of ecosystem studies. Golley surveys the development of the ecosystem concept in the late nineteenth and early twentieth centuries and discusses the coining of the term ecosystem by the English ecologist Sir Arthur George Tansley in 1935. He then reviews how the American ecologist Raymond Lindeman applied the concept to a small lake in Minnesota and showed how the biota and the environment of the lake interacted through the exchange of energy. Golley describes how a seminal textbook on ecology written by Eugene P. Odum helped to popularize the ecosystem concept and how numerous other scientists investigated its principles and published their results. He relates how ecosystem studies dominated ecology in the 1960s and became a key element of the International Biological Program biome studies in the United States--a program aimed at the betterment of mankind specifically through conservation, human genetics, and improvements in the use of natural resources; how a study of watershed ecosystems in Hubbard Brook, New Hampshire, blazed new paths in ecosystem research by defining the limits of the system in a natural way; and how current research uses the ecosystem concept. Throughout Golley shows how the ecosystem concept has been shaped internationally by both developments in other disciplines and by personalities and politics.

Corporate Bond Rating Drift Edward I. Altman,Duen Li Kao,1991

The Keys and the Kingdom Catherine Pepinster,2017-11-16 Catherine Pepinster charts the relationship between the British and the papacy in the modern era, looking at how this relationship is coloured by its turbulent past. Despite the enmity of previous centuries, Pepinster uncovers surprising instances of influence of the papacy in British politics, the collaboration between Pope and politicians on key issues, the 'stealth minority' of Catholics occupying major positions in public life, and the modern relationship between the Papacy and the Crown. In addition Pepinster analyses the crucial role that Britain has played in Rome, uncovers the unexpected role of the British Foreign Office in the appointment of Pope Francis, and discusses the modern style of the papacy and how this functions on a global scale. Featuring exclusive interviews with Cardinals Nichols and Murphy-O'Connor, Rowan Williams, Lord Patten and former British Ambassadors to both the Holy See and Italy, this account of the contemporary relationship between Great Britain and the Pope offers both fundamental evidence and penetrating insights into this most fascinating of political relationships.

Corporate Financial Distress, Restructuring, and Bankruptcy Edward I. Altman,Edith Hotchkiss,Wei Wang,2019-03-26 A comprehensive look at the enormous growth and evolution of distressed debt markets, corporate bankruptcy, and credit risk models This Fourth Edition of the most authoritative finance book on the topic updates and expands its discussion of financial distress and bankruptcy, as well as the related topics dealing with leveraged finance, high-yield, and distressed debt markets. It offers state-of-the-art analysis and research on U.S. and international restructurings, applications of distress prediction models in financial and managerial markets, bankruptcy costs, restructuring outcomes, and more.

Mrs Delany Clarissa Campbell Orr,2019-01-01 The first comprehensive biography of Mary Granville Delany - the artist and court insider whose flower collages, in particular, continue to inspire widespread admiration Mrs Delany is best remembered for her captivating paper collages of flowers, but her artistic flourishing came late in life. This nuanced, deeply researched biography pulls back the lens to place Delany's art in the broader context of her family life, relationships with royalty, and her endeavor to live as an independent woman. Clarissa Campbell Orr, a noted authority on the eighteenth century court, charts Mary Delany's development from a young woman at the heart of elite circles to beloved godmother and celebrated collagist. Orr traces the varied connections Mary Delany fostered throughout her life and which influenced her intellectual and artistic development: she was friends with prominent figures such as Methodist leader, John Wesley, composer G. F. Handel, the writer Jonathan Swift, and England's leading patron of science, Margaret Bentinck, Duchess of Portland. Mrs Delany reveals its subject to be far more than a widow befriended by George III and Queen Charlotte; she is, instead, restored to her proper place in the era's aristocratic society -and as a ground-breaking artist.

A History of the Theory of Investments Mark Rubinstein,2011-09-02 This exceptional book provides valuable insights into the evolution of financial economics from the perspective of a major player. -- Robert Litzenberger, Hopkinson Professor Emeritus of Investment Banking, Univ. of Pennsylvania; and retired partner, Goldman Sachs A History of the Theory of Investments is about ideas -- where they come from, how they evolve, and why they are instrumental in preparing the future for new ideas. Author Mark Rubinstein writes history by rewriting history. In unearthing long-forgotten books and journals, he corrects past oversights to assign credit where credit is due and assembles a remarkable history that is unquestionable in its accuracy and unprecedented in its power. Exploring key turning points in the development of investment theory, through the critical prism of award-winning investment theory and asset pricing expert Mark Rubinstein, this groundbreaking resource follows the chronological development of investment theory over centuries, exploring the inner workings of great theoretical breakthroughs while pointing out contributions made by often unsung contributors to some of investment's most influential ideas and models.

Dobson's Complaint Giles R. Youngs,1998

Emotionally Disturbed Deborah Blythe Doroshow,2019-04-26 Before the 1940s, children in the United States with severe emotional difficulties would have had few options for care. The first option was usually a child guidance clinic within the community, but they might also have been placed in a state mental hospital or asylum, an institution for the so-called feeble-minded, or a training school for delinquent children. Starting in the 1930s, however, more specialized institutions began to open all over the country. Staff members at these residential treatment centers shared a commitment to helping children who could not be managed at home. They adopted an integrated approach to treatment, employing talk therapy, schooling, and other activities in the context of a therapeutic environment. Emotionally Disturbed is the first work to examine not only the history of residential treatment but also the history of seriously mentally ill children in the United States. As residential treatment centers emerged as new spaces with a fresh therapeutic perspective, a new kind of person became visible—the emotionally disturbed child. Residential treatment centers and the people who worked there built physical and conceptual structures that identified a population of children who were alike in distinctive ways. Emotional disturbance became a diagnosis, a policy problem, and a statement about the troubled state of postwar society. But in the late twentieth century, Americans went from pouring private and public funds into the care of troubled children to abandoning them almost completely. Charting the decline of residential treatment centers in favor of domestic care-based models in the 1980s and 1990s, this history is a must-read for those wishing to understand how our current child mental health system came to be.

Merciful Release N. D. A. Kemp,2002 The Labour government elected in 1997 pledged to reform the Westminster parliament by modernising the House of Commons and removing the hereditary peers from the House of Lords. Events have consequently demonstrated the deep controversy that accompanies such attempts at institutional reconfiguration, and have highlighted the

shifting fault lines in executive-legislative relations in the UK, as well as the deep complexities surrounding British constitutional politics. The story of parliamentary reform is about the nature of the British political system, about how the government seeks to expand its control over parliament, and about how parliament discharges its duty to scrutinise the executive and hold it to account. This book, available in paperback for the first time, charts the course of Westminster reform since 1997, but does so by placing it in the context of parliamentary reform pursued in the past, and thus adopts a historical perspective which lends it considerable analytical value. Significantly, the book examines parliamentary reform through the lens of institutional theory, in order not only to describe reform but also to interpret and explain it. It also draws on extensive interviews conducted with MPs and peers involved in the reform of parliament since 1997, thus offering a unique insight into how these political actors perceived the reform process in which they played a part. Parliamentary reform at Westminster, now available in paperback, provides a comprehensive and authoritative analysis of the trajectory and outcome of the reform of parliament, along with an incisive interpretation of the implications for our understanding of British politics.

A Practical Guide to Information Architecture Donna Spencer, 2010-12

The Wounded Self Nina Schmidt, 2018 Takes the recent wave of German autobiographical writing on illness and disability seriously as literature, demonstrating the value of a literary disability studies approach.

I am Not a Brain Markus Gabriel, 2019-08-12 Many consider the nature of human consciousness to be one of the last great unsolved mysteries. Why should the light turn on, so to speak, in human beings at all? And how is the electrical storm of neurons under our skull connected with our consciousness? Is the self only our brain's user interface, a kind of stage on which a show is performed that we cannot freely direct? In this book, philosopher Markus Gabriel challenges an increasing trend in the sciences towards neurocentrism, a notion which rests on the assumption that the self is identical to the brain. Gabriel raises serious doubts as to whether we can know ourselves in this way. In a sharp critique of this approach, he presents a new defense of the free will and provides a timely introduction to philosophical thought about the self – all with verve, humor, and surprising insights. Gabriel criticizes the scientific image of the world and takes us on an eclectic journey of self-reflection by way of such concepts as self, consciousness, and freedom, with the aid of Kant, Schopenhauer, and Nagel but also Dr. Who, The Walking Dead, and Fargo.

Shakespeare and Classical Antiquity Colin Burrow, 2013-09-05 Shakespeare and Classical Antiquity explains the nature and extent of Shakespeare's classical learning, exploring why Ben Jonson was wrong to claim that he had 'small Latin and less Greek'. It examines Shakespeare's relationship to classical texts and how this relationship changed in the course of his career.

The Role of the Currency Board in Bulgaria's Stabilization Ms. Anne Marie Gulde, 1999-04-01 This paper focuses on the process leading to the choice of a currency board as a stabilization instrument, and its specific design. The use of a currency board was complicated and controversial because of serious structural problems, including a systemic banking crisis. It argues that the arrangement was well designed for the task at hand, combining a traditional rule-based exchange arrangement with a number of legal and structural measures to address the pressing bank sector and fiscal issues. In light of the interdependence of the measures, the success of Bulgaria's currency board stabilization must be attributed to a combination of elements, of which the currency board was a crucial, but not the only determining factor. Structural problems, most notably in the banking sector, were equally severe. The banking crisis had been smoldering since at least 1995. A 1996 review found that out of ten state banks, which still accounted for more than 80 percent of banking sector assets, nine had negative capital and more than half of all state banks' portfolios were nonperforming.

Stanley's Dream Jacalyn Duffin, 2019-08-30 In 1964–65, an international team of thirty-eight scientists and assistants, led by Montreal physician Stanley Skoryna, sailed to the mysterious Rapa Nui (Easter Island) to conduct an unprecedented survey of its biosphere. Born of Cold War concerns about pollution, overpopulation, and conflict, and initially conceived as the first of two trips, the project was designed to document the island's status before a proposed airport would link the one thousand people living in humanity's remotest community to the rest of the world – its germs, genes, culture, and economy. Based on archival papers, diaries, photographs, and interviews with nearly twenty members of the original team, Stanley's Dream sets the expedition in its global context within the early days of ecological research and the understudied International Biological Program. Jacalyn Duffin traces the origins, the voyage, the often-complicated life within the constructed camp, the scientific preoccupations, the role of women, the resultant reports, films, and publications, and the previously unrecognized accomplishments of the project, including a goodwill tour of South America, the delivery of vaccines, and the discovery of a wonder drug. For Rapa Nui, the expedition coincided with its rebellion against the colonizing Chilean military, resulting in its first democratic election. For Canada, it reflected national optimism as the country prepared for its centennial and adopted its own flag. Ending with Duffin's own journey to the island to uncover the legacy of the study and the impact of the airport, and to elicit local memories, Stanley's Dream is an entertaining and poignant account of a long-forgotten but important Canadian-led international expedition.

The Handbook of Corporate Financial Risk Management Stanley Myint, Fabrice Famery, 2019

Death by Prescription Terence H. Young, Terence Young, 2011-11 INDUSTRY & INDUSTRIAL STUDIES. Michael Jackson and Whitney Houston get the headlines, but there are thousands of other people who suffer and die because of the wrong prescription. This is one harrowing story about a father, a family, a daughter. After fifteen years of Vanessa taking Prepidol to alleviate a stomach disorder, suddenly, unexpectedly, she collapsed and died in her family home. Confusion, grief, and remorse are channeled by Terence Young into determination to get to the root causes of his daughter's death. His investigations take him from Health Canada to the Corner's Office, from the salespeople of major drug manufacturers to the medical profession, from the legal profession to the courts.

John Muir Mary Colwell, 2014-11-21 John Muir is regarded as the 'father of America's national parks' and is a towering figure in the history of that country's involvement with ecology. Born into a harsh home in Dunbar, Scotland he would often escape to revel in the birds and wildlife of the area. When his father suddenly uprooted the family and moved to the United States, the oppression he associated with his childhood continued – and so did his involvement with the natural world. Despite the difficulty of his formative years Muir grew up to be a man of great joy – first an inventor and then an explorer, he found his haven in the mountains of Sierra Nevada. He was a fascinating character: on the one hand a recluse, who sought solitude, and on the other a passionate activist, determined to save the places he loved. A strong believer in both God and the essential goodness of humanity, he was the founder and first president of the Sierra Club. This wonderful memoir pays tribute to a giant of ecology and is essential reading for lovers of natural history.

The Global Nomad Greg Richards, Julie Wilson, 2004-01-01 Backpackers have shifted from the margins of the travel industry into the global spotlight. This volume explores the international backpacker phenomenon, drawing together different disciplinary perspectives on its meaning, impact and significance. Links are drawn between theory and practice, setting backpacking in its wider social, cultural and economic context.
