Who's Who in Plastics Polymers James P. Harrington, 2000-05-09 This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. The biographical directory is i

Texts from Jane Eyre Mallory Ortberg, 2014-11-04 Hilariously imagined text conversations—the passive aggressive, the clever, and the strange—from classic and modern literary figures, from Scarlett O'Hara to Jessica Wakefield Mallory Ortberg, the co-creator of the cult-favorite website The Toast, presents this whimsical collection of hysterical text conversations from your favorite literary characters. Everyone knows that if Scarlett O'Hara had an unlimited text-and-data plan, she'd constantly try to tempt Ashley away from Melanie with suggestive messages. If Mr. Rochester could text Jane Eyre, his ardent missives would obviously be in all-caps. And Daisy Buchanan would not only text while driving, she'd text you to pick her up after she totaled her car. Based on the popular web-feature, Texts from Jane Eyre is a witty, irreverent mashup that brings the characters from your favorite books into the twenty-first century.

Priorities in Health , 2006-01-01 This companion guide to Disease Control Priorities in Developing Countries, 2nd edition speeds the diffusion of life-

saving knowledge by distilling the contents of the larger volume into an easily read format. Policy makers, practitioners, academics, and other interested readers will get an overview of the messages and analysis in *Disease Control Priorities in Developing Countries*, 2nd edition; be alerted to the scope of major diseases; learn strategies to improve policies and choices to implement cost-effective interventions; and locate chapters of immediate interest.

The Millennium Development Goals for Health Adam Wagstaff, 2004-01-01
Annotation Provides information on progress and trends, including poor/nonpoor disparities; health systems reform as a means of laying building blocks for the efficient and equitable delivery of effective interventions; the financing of health spending through domestic resources and aid; and improving the effectiveness of development assistance in health. Linking the health Millennium Development Goals? agenda with the broader poverty-reduction agenda, this book is a valuable resource for policymakers in developing countries and development practitioners working in the health, nutrition, and population sector as well as students and scholars of public health.

The Health of Adults in the Developing World Richard G. Feachem, 1992 Sick adults consume often more than half of all resources allocated to the health sector. This volume draws attention to the causes and results of disease and ill health in adults in developing countries and to the burden they impose

not only on individuals but on their families and society as well. Researchers and policymakers will find this work essential because of its useful data on adult morbidity and mortality, as well as its call for more information on problems and risk factors.

Curbing the Epidemic Prabhat Jha, Frank J. Chaloupka, 1999-01-01 Annotation. Addresses important economic and social issues confronting policymakers when dealing with the issue of tobacco control and its impact on the social and economic resources of both developed and developing countries.

Case Studies in Global Health Ruth Levine, What Works Working Group, 2007 One of the greatest human accomplishments has been the spectacular improvement in health since 1950, particularly in developing countries. With death rates falling steadily, more progress was made in the health of populations in the past half-century than in many earlier millennia. A careful look at that success can yield important lessons about how to tackle the challenges of HIV/AIDS, child health, and global health inequities in the future. This series of twenty case studies illustrates real-life proven, large-scale success stories in global public health. Drawing from a rich evidence base, the accessible case write-ups highlight experiences in scale-up of health technologies, strengthening of health systems, and the use of health education and policy change to achieve impressive reductions in disease and disability, even in the poorest countries. An overview chapter draws attention to factors that contributed to the successes. Discussion questions

help to bring out the main points and provide a point of departure for independent student research.

Haute Bohemians Miguel Flores-Vianna, 2017-09-26 Who, exactly, is a haute bohemian? Leave it to the discriminating, gimlet eye of photographer Miguel Flores-Vianna, who enjoys an international, cult-like following. He has journeyed through four continents to capture an extraordinary group of fashion designers, landscape architects, artists and art historians, potters, and interior designers, where they live--country cottages, beach bungalows, canal-side lofts, and East Village apartments, as well as assorted estancias, chateaux, and palazzi. Some of these spaces are grand, others are modest, but all are original, stylish, charming, and above all authentic, in the sense that they reflect their owners' care and taste. His work is introduced by Amy Astley, editor of AD.

Killer Game Programming in Java Andrew Davison, 2005-05-20 Although the number of commercial Java games is still small compared to those written in C or C++, the market is expanding rapidly. Recent updates to Java make it faster and easier to create powerful gaming applications-particularly Java 3D-is fueling an explosive growth in Java games. Java games like Puzzle Pirates, Chrome, Star Wars Galaxies, Runescape, Alien Flux, Kingdom of Wars, Law and Order II, Roboforge, Tom Clancy's Politika, and scores of others have earned awards and become bestsellers. Java developers new to graphics and game programming, as well as game developers new to Java 3D, will find Killer Game

Programming in Java invaluable. This new book is a practical introduction to the latest Java graphics and game programming technologies and techniques. It is the first book to thoroughly cover Java's 3D capabilities for all types of graphics and game development projects. Killer Game Programming in Java is a comprehensive guide to everything you need to know to program cool, testosterone-drenched Java games. It will give you reusable techniques to create everything from fast, full-screen action games to multiplayer 3D games. In addition to the most thorough coverage of Java 3D available, Killer Game Programming in Java also clearly details the older, better-known 2D APIs, 3D sprites, animated 3D sprites, first-person shooter programming, sound, fractals, and networked games. Killer Game Programming in Java is a must-have for anyone who wants to create adrenaline-fueled games in Java.

Disorders of Hemoglobin Martin H. Steinberg, Bernard G. Forget, Douglas R. Higgs, David J. Weatherall, 2009-08-17 Completely revised new edition of the definitive reference on disorders of hemoglobin.

Global Burden of Disease and Risk Factors Alan D. Lopez, 2006-04-02 Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide

the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

Saving Lives, Buying Time Institute of Medicine, Board on Global Health, Committee on the Economics of Antimalarial Drugs, 2004-09-09 For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa—currently just over one million per year—are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called artemisinin are available, they are unaffordable for the majority of the affected population, even at a cost of one dollar per course. *Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and transmission will intensify.

Love Radio Ebony LaDelle,2022-05-31 Prince Jones, a self-professed teen love doctor known for his radio segment on the local hip-hop station, believes he can get the bookish, anti-romance Dani Ford to fall in love with him in three dates.

Our Sister, Again Sophie Cameron,2022-05-12 On a small island off the Scottish coast, Isla and her family are grieving the loss of her older sister Flora, who died three years ago. Then they're offered the chance to be part of a top-secret trial, which revives loved ones as fully lifelike AI robots using their digital footprint. Isla has her doubts about Second Chances, but they evaporate the moment the 'new' Flora arrives. This girl is not some uncanny close likeness; she is Flora - a perfect replica. But not everyone on their island feels the same. And as the threats to Flora mount, she grows distant and more secretive. Will Isla be able to protect the new Flora and bring the community back together? An intriguing, thoughtful and poignant exploration of what makes us 'us', for fans of *SHOW US WHO YOU ARE*, *A POCKETFUL OF STARS* and *TROOFRIEND*?

National Institute of Parasitic Diseases, China ,2020-06-16 National Institute of Parasitic Diseases, China: 70 Years and Beyond, Volume 110 covers the major achievements gained in the research and control of parasitic

diseases in China, e.g. schistosomiasis, malaria, lymphatic filariasis, echinococcosis, visceral leishmaniasis, soil-transmitted helminthiasis, foodborne clonorchiasis, angiostrongyliasis, taeniasis and cysticercosis, etc. The book introduces approaches that can be developed with big data analytic tools, how to use surveillance-response systems at national and regional levels, and tactics to promote the national parasitic resources center to support various research and control activities. Finally, a chapter on the roadmap for parasitic diseases control in China from 2020 to 2030 is presented.

Poetic Beings Will Small, 2020-03-17 An accompaniment to the Poetic Beings podcast, this book features original poetry written by Will Small after interviewing a diverse range of interesting people - uni students, artists, academics, social workers, venue owners and more. The poems reflect on the ordinary and extraordinary aspects of these human stories, and invite the reader to reflect on their own life as a 'poetic being'. The book also features 12 original artworks by Grant Molony, beautifully capturing the hands of each interviewee.
