Saving the Security State Inderpal Grewal, 2017-11-03 In Saving the Security State Inderpal Grewal traces the changing relations between the US state and its citizens in an era she calls advanced neoliberalism. Marked by the decline of US geopolitical power, endless war, and increasing surveillance, advanced neoliberalism militarizes everyday life while producing the "exceptional citizens"—primarily white Christian men who reinforce the security state as they claim responsibility for protecting the country from racialized others. Under advanced neoliberalism, Grewal shows, others in the United States strive to become exceptional by participating in humanitarian projects that compensate for the security state's inability to provide for the welfare of its citizens. In her analyses of microfinance programs in the global South, security moms, the murders at a Sikh temple in Wisconsin, and the post-9/11 crackdown on Muslim charities, Grewal exposes the fissures and contradictions at the heart of the US neoliberal empire and the centrality of race, gender, and religion to the securitized state.

How to Protect Your Children on the Internet Gregory S. Smith, 2007-08-30 Parents and teachers are often ill-equipped to deal with the variety of devices and applications such as email, instant messaging, browsing, blogs, cell phones, and personal digital assistant devices (PDAs) that can facilitate the dangers lurking online. How to Protect Your Children on the Internet offers a comprehensive overview of the ways in which youth use such technologies and exposes the risks they represent. At the same time, it provides a roadmap that will enable parents and teachers to become more engaged in children's online activities, arming them with techniques and tips to help protect their children. Smith underscores his arguments through chilling, real-life stories, revealing approaches people are using to deceive and to conceal their activities online. Filled with practical advice and recommendations, his book is indispensable to anyone who uses the Internet and related technologies, and especially to those charged with keeping children safe.

Parenting Out of Control Margaret K. Nelson, 2010-05-01 They go by many names: helicopter parents, hovercrafts, PFHs (Parents from Hell). The news media is filled with stories of well-intentioned parents going to ridiculous extremes to remove all obstacles from their child's path to greatness . . . or at least to an ivy league school. From cradle to college, they remain intimately enmeshed in their children's lives, stifling their development and creating infantilized, spoiled, immature adults unprepared to make the decisions necessary for the real world. Or so the story goes. Drawing on a wealth of eye-opening interviews with parents across the country, Margaret K. Nelson cuts through the stereotypes and hyperbole to examine the realities of what she terms "parenting out of control." Situating this phenomenon within a broad sociological context, she finds several striking explanations for why today's prosperous and well-educated parents are unable to set realistic boundaries when it comes to raising their children. Analyzing the goals and aspirations parents have for their children as well as the strategies they use to reach them, Nelson discovers fundamental differences among American parenting styles that expose class fault lines, both within the elite and between the elite and the middle and working classes. Nelson goes on to explore the new ways technology shapes modern parenting. From baby monitors to cell phones (often referred to as the world's longest umbilical cord), to social networking sites, and even GPS devices, parents have more tools at their disposal than ever before to communicate with, supervise, and even spy on their children. These play important and often surprising roles in the phenomenon of parenting out of control. Yet the technologies parents choose, and those they refuse to use, often seem counterintuitive. Nelson shows that these choices make sense when viewed in the light of class expectations. Today's parents are faced with unprecedented opportunities and dangers for their children, and are evolving novel strategies to adapt to these changes. Nelson's lucid and insightful work provides an authoritative examination of what happens when these new strategies go too far.

Consuming Kids Susan Linn, 2005 Looks at the way corporations and advertisers target children as a profitable demographic, as well as their methods for getting past parental safeguards to make products of all kinds appeal directly to even the youngest children.

Cyber-risk and Youth Michael C Adorjan, Rosemary Ricciardelli, 2019-01-02 Cyber-risks are moving targets and societal responses to combat cyber-victimization are often met by the distrust of young people. Drawing on original research, this book explores how young people define, perceive, and experience cyber-risks, how they respond to both the messages they are receiving from society regarding their safety online, and the various strategies and practices employed by society in regulating their online access and activities. This book complements existing quantitative examinations of cyberbullying assessing its extent and frequency, but also aims to critique and extend knowledge of how cyber-risks such as cyberbullying are perceived and responded to. Following a discussion of their methodology and their experiences of conducting research with teens, the authors discuss the social network services that teens are using and what they find appealing about them, and address teens' experiences with and views towards parental and school-based surveillance. The authors then turn directly to areas of concern expressed by their participants, such as relational aggression, cyberhacking, privacy, and privacy management, as well as sexting. The authors conclude by making recommendations for policy makers, educators and teens – not only by drawing from their own theoretical and sociological interpretations of their findings, but also from the responses and recommendations given by their participants about going online and tackling cyber-risk. One of the first texts to explore how young people respond to attempts to regulate online activity, this book will be key reading for those involved in research and study surrounding youth crime, cybercrime, youth culture, media and crime, and victimology – and will inform those interested in addressing youth safety online how to best approach what is often perceived as a sensitive and volatile social problem.

Terrorism and the Politics of Fear David L. Altheide,2017-06-27 This thoughtful text demonstrates how the mass media constructs a politics of fear in the United States. Using a social interactionist perspective, the chapters examines such issues as the expansion of surveillance on the Internet, the construction of a terrorism-fighting hero to promote patriotism, the use of social media by terror groups, the fear of the other fostered by the refugee crisis and western radicalization, as well as the mass-mediated reaction to recent terrorist attacks. Also covered are the politics of fear involving disease (Ebola, Zika), social control efforts, and harsh attacks on American governmental officials for not keeping people safe from harm. All chapters in this new edition have been updated with descriptions and relevant analysis of significant events, including two Israeli-Hamas wars, terrorism attacks (e.g., Boston Marathon, Charlie Hebdo, San Bernadino, etc.), global reactions—often hostility—to refugees in the United States and especially Europe, the development of ISIS, surveillance (Wiki Leaks, Snowden, NSA), and the growing significance of social media. The text explains how the social construction of fear is used to steer public and foreign policy, arguing that security policies to protect the citizenry from violence have become control systems that most often curtail privacy and civil liberties.
