<u>Conversion and Narrative</u> Ryan Szpiech,2012-10-29 In 1322, a Jewish doctor named Abner entered a synagogue in the Castilian city of Burgos and began to weep in prayer. Falling asleep, he dreamed of a great man who urged him to awaken from his slumber. Shortly thereafter, he converted to Christianity and wrote a number of works attacking his old faith. Abner tells the story in fantastic detail in the opening to his Hebrew-language but anti-Jewish polemical treatise, Teacher of Righteousness. In the religiously plural context of the medieval Western Mediterranean, religious conversion played an important role as a marker of social boundaries and individual identity. The writers of medieval religious polemics such as Teacher of Righteousness often began by giving a brief, first-person account of the rejection of their old faith and their embrace of the new. In such accounts, Ryan Szpiech argues, the narrative form plays an important role in dramatizing the transition from infidelity to faith. Szpiech draws on a wide body of sources from Christian, Jewish, and Muslim polemics to investigate the place of narrative in the representation of conversion. Making a firm distinction between stories told about conversion and the experience of religious change, his book is not a history of conversion itself but a comparative study of how and why it was presented in narrative form within the context of religious disputation. He argues that between the twelfth and fifteenth centuries, conversion narratives were needed to represent communal notions of history and authority in allegorical, dramatic terms. After considering the late antique paradigms on which medieval Christian conversion narratives were based, Szpiech juxtaposes Christian stories with contemporary accounts of conversion to Islam and Judaism. He emphasizes that polemical conflict between Abrahamic religions in the medieval Mediterranean centered on competing visions of history and salvation. By seeing conversion not as an individual experience but as a public narrative, Conversion and Narrative provides a new, interdisciplinary perspective on medieval writing about religious disputes.

Cultures of Conversions Jan N. Bremmer,Wout Jac. van Bekkum,Arie L. Molendijk,2006 In the terms of Durkheimian sociology, conversion is a fait social. Although they are rarely treated as a cultural phenomenon, conversions can obviously be examined for the norms, values and presuppositions of the cultures in which they take place. Thus conversion can help us to shed light on a particular culture. At the same time, the term evokes a dramatic appeal that suggests a kind of suddenness, although in most cases conversion implies a more gradual process of establishing and defining a new - religious - identity. From 21-24 May, 2003, the University of Groningen hosted an international conference on 'Cultures of Conversion'. The contributions have been edited in two volumes, which pay special attention to the modes of language and idiom in conversion literature, the meaning and sense of religious-ideological discourse, the variety of rhetorical tropes, and the effects of the conversion narrative with allusions to religious or political conventions and idealizations. The present volume offers in-depth studies of conversion that are mainly taken from the history of India, Islam and Judaism, ranging

from the Byzantine period to the new Muslimas of the West. The other volume, Paradigms, Poetics and Politics of Conversion, in addition to stimulating case studies, contains theoretical contributions on the theory of conversion, with special attention to the rational choice theory and to the history of research into conversion.

English Texts & Contexts 1 F. Pollock,L. Dippel,2003 This book includes chapters dealing with the relationships between composers and responders, how to use technology to make texts, and how to effectively compose and respond to different types of text. There is a wide range of texts presented, including film, visual and electronic texts. Students will learn how to increase their understanding of language features, structures, the perspectives of composers and responders, and the way that context can affect a text.

Handbook of Research on Natural Computing for Optimization Problems Mandal, Jyotsna Kumar,2016-05-25 Nature-inspired computation is an interdisciplinary topic area that connects the natural sciences to computer science. Since natural computing is utilized in a variety of disciplines, it is imperative to research its capabilities in solving optimization issues. The Handbook of Research on Natural Computing for Optimization Problems discusses nascent optimization procedures in nature-inspired computation and the innovative tools and techniques being utilized in the field. Highlighting empirical research and best practices concerning various optimization issues, this publication is a comprehensive reference for researchers, academicians, students, scientists, and technology developers interested in a multidisciplinary perspective on natural computational systems.

Conversion Katherine Howe,2015-06-16 A chilling mystery based on true events, from New York Times bestselling author Katherine Howe. It's senior year, and St. Joan's Academy is a pressure cooker. Grades, college applications, boys' texts: Through it all, Colleen Rowley and her friends keep it together. Until the school's queen bee suddenly falls into uncontrollable tics in the middle of class. The mystery illness spreads to the school's popular clique, then more students and symptoms follow: seizures, hair loss, violent coughing fits. St. Joan's buzzes with rumor; rumor erupts into full-blown panic. Everyone scrambles to find something, or someone, to blame. Pollution? Stress? Are the girls faking? Only Colleen—who's been reading The Crucible for extra credit—comes to realize what nobody else has: Danvers was once Salem Village, where another group of girls suffered from a similarly bizarre epidemic three centuries ago . . . Inspired by true events—from seventeenth-century colonial life to the halls of a modern-day high school—Conversion casts a spell. [Howe] has a gift for capturing the teenage mindset that nears the level of John Green.—USA Today ...this creepy, gripping novel is intimately real and layered, shedding light on the challenges teenage girls have faced throughout history.—The New York Times A chilling guessing game . . . that will leave readers thinking about the power (and powerlessness) of young women in the past and present alike.—Publishers Weekly, Starred Review

Sample Rate Conversion in Software Configurable Radios Tim Hentschel,2002 This authoritative, leading-edge resource gives you a comprehensive overview of sample rate conversion (SRC) and its applications in software configurable radios. The book helps you understand the limits of feasible systems for sample rate conversion, as well as the limits of interpolation. You get sound advice on selecting the appropriate types of SRC for specific applications, and assistance in handling the trade-off between hardware complexity and the clock rate of a system.

Archetypes of Conversion Anne Hunsaker Hawkins,2014-03-07 This sensitive and imaginative study explores the phenomenon of conversion in three major religious autobiographies: the Confessions of Saint Augustine, Grace Abounding by John Bunyan, and Thomas Merton's The Seven Storey Mountain. These three religious figures could hardly be more different, and yet, as Hawkins shows, their conversion narratives are remarkably similar in patterns of theme, figure, and action. This archetypal approach is particularly appropriate to spiritual autobiography, which is less concerned with self than with soul and which seeks to relate the individual to a divine reality that is universal and timeless. Hawkins' approach to these texts is sophisticated, yet free of jargon and doctrinaire psychologizing. Here, archetypal analysis becomes not an end in itself, but also a means to investigate the complexity of the individual text. Hawkins' archetypal analysis serves not only to discern continuities, but also to explore cultural, ideological, and psychological variations. Adapting William James's distinction between crisis and lysis conversion, Hawkins shows that the conversion paradigm central to each autobiography determines its religious meaning, its formal structure, and its archetypal emphases. The author approaches the phenomena of conversion with a blend of critical detachment and imaginative sympathy. She is always careful to honor the authenticity of religious experience, and for this reason her commentary succeeds in illuminating it. The result is an interdisciplinary study that will appeal to the psychologist and literary critic as well as the student of religion. But these narratives of conversion offer paradigms that apply to any deeply significant change, for they are of interest and concern to all readers seeking to find meaning in their lives. Hawkins makes us feel both the immediacy and the permanence of these texts, for What is human in them speaks to what is human in us.

The Art of Machine Learning Norman Matloff,2024-01-09 Learn to expertly apply a range of machine learning methods to real data with this practical guide. Packed with real datasets and practical examples, The Art of Machine Learning will help you develop an intuitive understanding of how and why ML methods work, without the need for advanced math. As you work through the book, you'll learn how to implement a range of powerful ML techniques, starting with the k-Nearest Neighbors (k-NN) method and random forests, and moving on to gradient boosting, support vector machines (SVMs), neural networks, and more. With the aid of real datasets, you'll delve into regression models through the use of a bike-sharing dataset, explore decision trees by leveraging New York City taxi data, and dissect parametric methods with baseball player stats. You'll also find expert tips for avoiding common problems, like handling "dirty" or unbalanced data, and how to troubleshoot pitfalls. You'll also explore: How to deal with large datasets and techniques for dimension reduction Details on how the Bias-Variance Trade-off plays out in specific ML methods Models based on linear relationships, including ridge and LASSO regression Real-world image and text classification and how to handle time series data Machine learning is an art that requires careful tuning and tweaking. With The Art of Machine Learning as your guide, you'll master the underlying principles of ML that will empower you to effectively use these models, rather than simply provide a few stock actions with limited practical use. Requirements: A basic understanding of graphs and charts and familiarity with the R programming language

The Organization of the Pyramid Texts Harold M. Hays,2012-06-01 The oldest substantial body of religious texts from ancient Egypt consists of the Pyramid Texts. Conversion S. C. Stephens,2009 Emma is content. She's got a promising career in front of her, great friends, and a pretty amazing family. But her love life has been a little lacking lately. That's when fate steps in, and she crashes into a tall, dark and handsome man--Teren Adams. He's single, successful, an extraordinary gentleman, but he's also secretive. And some of his secrets are more unusual than most people's. For instance, he's a little bit vampire. He has fangs, incredible hearing, unbelievable speed, and, on occasion, he enjoys drinking a steaming cup of blood. But he's also very much alive. He has a heartbeat, loves steak as well as cappuccinos, and has no problems walking around during the day. Since Teren acts human the majority of the time, the pros far outweigh the cons in Emma's book.

Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012 Zhicai Zhong,2013-04-09 Information engineering and applications is the field of study concerned with constructing information computing, intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications (IEA 2012), which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information engineering and applications.

A Community of One Martin A. Danahay,1993-01-01 Complementing recent feminist studies of female self-representation, this book examines the dynamics of masculine self-representation in nineteenth-century British literature. Arguing that the category

autobiography was a product of nineteenth-century individualism, the author analyzes the dependence of the nineteenth-century masculine subject on autonomy or self-naming as the prerequisite for the composition of a life history. The masculine autobiographer achieves this autonomy by using a feminized other as a metaphorical mirror for the self. The feminized other in these texts represents the social cost of masculine autobiography. Authors from Wordsworth to Arnold, including Samuel Taylor Coleridge, Thomas De Quincey, John Ruskin, Alfred Tennyson, Robert Louis Stevenson, John Stuart Mill, and Edmund Gosse, use female lovers and family members as symbols for the community with which they feel they have lost contact. In the theoretical introduction, the author argues that these texts actually privilege the autonomous self over the images of community they ostensibly value, creating in the process a self-enclosed and self-referential community of one.
