File Unlocker 40

Olav Martin Kvern,David Blatner

Unlocking the Files of the FBI Gerald K. Haines,David A. Langbart,1993 This comprehensive guide explains what kinds of documents the FBI holds, where they are located, and how to gain access to them. The FBI has investigated a vast range of activities: communism, civil rights and antiwar protests, organised crime, political corruption, terrorists, and even foreign espionage. The massive amount of documentation produced on countless cases is divided into hundreds of major classifications. Now under the Freedom of Information Act (FOIA), more of these valuable records are open to researchers than ever before. Haines and Langbart provide a focused description of the contents of every one of the more than 278 classifications the bureau uses to organise its efforts. They also include descriptions of special, unclassified records, and a full explanation of the FOIA, with a sample letter requesting access under the act; FBI organisational charts; a sample showing how the bureau sanitises documents; and other information.

Windows Security Monitoring Andrei Miroshnikov,2018-03-13 Dig deep into the Windows auditing subsystem to monitor for malicious activities and enhance Windows system security Written by a former Microsoft security program manager, DEFCON Forensics CTF village author and organizer, and CISSP, this book digs deep into the Windows security auditing subsystem to help you understand the operating system's event logging patterns for operations and changes performed within the system. Expert guidance brings you up to speed on Windows auditing, logging, and event systems to help you exploit the full capabilities of these powerful components. Scenario–based instruction provides clear illustration of how these events unfold in the real world. From security monitoring and event patterns to deep technical details about the Windows auditing subsystem and components, this book provides detailed information on security events generated by the operating system for many common operations such as user account authentication, Active Directory object modifications, local security policy changes, and other activities. This book is based on the author's experience and the results of his research into Microsoft Windows security monitoring and anomaly detection. It presents the most common scenarios people should be aware of to check for any potentially suspicious activity. Learn to: Implement the Security Logging and Monitoring policy Dig into the Windows security auditing subsystem Understand the most common monitoring event patterns related to operations and changes in the Microsoft Windows operating system About the Author Andrei Miroshnikov is a former security program manager with Microsoft. He is an organizer and author for the DEFCON security conference Forensics CTF village and has been a speaker at Microsoft's Bluehat security conference. In addition, Andrei is an author of the Windows 10 and Windows Server 2016 Security Auditing and Monitoring Reference and multiple internal Microsoft security training documents. Among his many professional qualifications, he has earned the (ISC)2 CISSP and Microsoft MCSE: Security certifications.

Unlocking the Future Luo Xiaoming,2023-04-28 The book highlights the urban imagination in contemporary Chinese science fiction, in order to assess the capacity of Chinese society to conceive of the future. The author argues that 'the future' is a set of directional and normative ideas that forms the basis of the entire social mobilization mechanism in China, while the capacity to imagine the future is likely to be produced in response to the present challenges. By discussing the urban space, the reconstruction of time, the infrastructure, and concepts of the 'urban-rural' and civilization in contemporary Chinese science fiction, she demonstrates how contemporary Chinese sci-fi may offer potential solutions to ways of 'unlocking' the future. In addition, she also points out the limitations of Chinese society's imaginative vision of the future. The book will be of interest to scholars and postgraduate students of modern Chinese literature, science fiction studies, urban studies, or cultural studies.

Foster the increased use of engineered performance standards by making available standard time data of stated accuracy and reliability structured for maximum ease of application. c. Promote appropriate application of more efficient methods of performing work. d. Provide uniformity in labor performance standards development by standardizing the application of various work measurement techniques. e. Facilitate communication by providing common terminology and definitions.

Unlocking Educations Future: A Step-by-Step Practical Guide to Transformative Blockchain DApps in the Academic Landscape Dr. Poornima G. Naik, Dr. Girih R. Naik,2023-11-20 Blockchain technology has the potential to revolutionize the education sector in several significant ways. Firstly, it can enable the secure and tamper-proof storage of educational records, such as degrees, certifications, and diplomas. This ensures the authenticity and integrity of the credentials, reducing the risk of fraud and facilitating seamless verification processes for employers and educational institutions. Secondly, blockchain can facilitate the creation of decentralized learning platforms, enabling peer-to-peer interactions, transparent tracking of learning progress, and secure sharing of educational content. The book aims at providing insight into how blockchain can be leveraged in education sector. Chapter 1 focuses on overview of fungible and non-fungible tokens, different ERC standards for creating fungible and non-fungible tokens. The role of OpenZeppelin for simplifying the creation of non-fungible tokens is discussed at length. Chapter 2 unleashes the power of decentralized applications. It explores the development of decentralized applications using Blockchain Technology with React.js as frontend. Two decentralized applications one for transferring fund from one account to another and another for developing a frontend for demo project are discussed. Chapters 3 and 4 provide an overview of decentralized applications for educational domain. The first application elaborated in Chapter 3 targets design and development of decentralized feedback application focusing in detail on the steps pertaining to design of smart contract, testing the smart contract in two versatile environments of Remix IDE, Hardhat environment and Sepolia test environment, designing the frontend in React.
