Bill Hensley, Colleen Hensley

Reporting Clear? Cheryl A. Cage, 2003-12 This comprehensive guide to the pilot-interview process walks applicants through the process and illustrates the best way to present their personal-history paperwork to airlines and increase their chances of landing an interview. Covering how to discuss shortcomings in a professional history and obtaining the supplemental paperwork that must be provided to an interviewer, these strategies enable pilots to avoid common mistakes and present background information confidently and concisely. Questions such as What exactly is the Pilot Records Improvement Act (PRIA) and how does the Act impact pilots? Why are the airlines interested in every area of a pilot's background? and What is an addendum and when do pilots need one? are addressed.

To Be a Pilot Randal Agostini, 2011-11-14 To Be a Pilot wins by its sheer presentation of what it means to be a pilot and to face often perilous situations in planes, with only one's native wits to carry the day. After reading To Be a Pilot, one thinks about flying differently, not just the small regional planes, but even the larger jumbo jets. Who is in front? What are they talking about? What kind of curve balls will be tossed them during the flight? How much are they letting us know? Most of all, how open-eyed and courageous these people are for whom being on earth just simply is not enough, for whom the clouds and the endless horizon seem to be their one allure. The author is quick witted, observant, resourceful and engaging. He

has a sense of irony, world-awareness, lack of naivety, whic

Test Pilot Brian Johnson, 2011-06-20 Test pilots - dashing and courageous young men or foolhardy gamblers? In this fully illustrated book written by the producer of the BBC1 television series of the same name, we follow the ups and downs of a group of trainee test pilots at Boscombe Down in Wiltshire. Beginning with the exacting selection procedure, we discover what personal and professional qualities a pilot needs in order to become a test pilot. Only six UK and twelve foreign students are chosen each year and, once selected, the pressure on them steadily mounts. As the students learn to push each aircraft's performance to its limits they, too, are being mentally and physically stretched further than ever before. Training is given on both fixed - and rotary - wing aircraft and by the end of the course each student is fully conversant with the different techniques necessary to fly each type.

They learn how to recover safely from spins, how to cope with sudden failures of equipment in mid-flight and how to land an aircraft with no power. All the time, they are assessing each aircraft's capabilities and the scope of the on-board technology. The final part of the course is the 'preview exercise' when every student is required to evaluate an aircraft he has never flown before and to make a formal presentation to his tutors and examiners. Using a number of remarkably frank interviews with students and tutors, Brian Johnson explores the process of becoming a test pilot and reveals both the stresses and successes of the year. The RAF has given its full support to both the book and the television programmes and thus has enabled Brian Johnson to produce a unique and authoritative account of the training for one of the most responsible and exciting jobs in modern aviation.

Practical Aviation Charles Brian Hayward,1919

The Pilot Bill Hensley, Colleen Hensley, 2011 Former US Air Force (USAF) and commercial aviation pilots turned entrepreneurs Bill and Colleen Hensley reveal the unique disciplines that allow pilots to excel under enormous stress. The Hensleys' lighthearted tone and dramatic narrative make this a quick, easy read, but one whose lessons linger. Their fictionalized but accurate tale about USAF pilots learning to fly the fiendishly fast

supersonic T-38 jet reveals the roots of the Hensleys' method for personal success. The book has an endearing gee-whiz quality; it reads like a story in a Boy Scout magazine. The whiz-bang tone offsets the book's shortfall: While the Hensleys adeptly describe the programs and practices pilots follow to achieve mastery, they never quite connect these practices to a world outside the military. Even so, getAbstract recommends their enjoyable flight-based narrative to anyone seeking a more purposeful, disciplined approach to work and life.

Pilot Selection Robert Bor, Carina Eriksen, Todd Hubbard, Ray King, 2019-10-16
This comprehensive book describes in practical terms - underpinned by research - how recruitment, selection, and psychological assessment can be conducted amongst pilots. The chapters emphasize evidence-based and ethical selection methods for different pilot groups. It includes chapters written by experts in the field and also covers related areas, such as air traffic controllers and astronauts. The book is written for airline managers, senior pilots responsible for recruitment and training, human resources specialists, human factors and safety specialists, occupational health doctors,

psychologists, AMEs, practitioners, or academics involved in pilot selection. Robert Bor, DPhil CPsychol CSci FBPsS HonFRAeS UKCP Reg EuroPsy, is a Registered and Chartered Clinical Counselling and Health Psychologist, Registered Aviation Psychologist and Co-Director of the Centre for Aviation Psychology. Carina Eriksen, MSc DipPsych CPsychol FBPsS BABCP, is an HCPC Registered and BPS Chartered Consultant Counselling Psychologist and Registered Aviation Psychologist. Todd P. Hubbard, B.A., M.S. Aeronautical Sciences, Ed.D. Applied Educational Studies in Aviation, Lt. Col. USAF (ret.), is the Clarence E. Page Professor of Human Factors research, University of Oklahoma. Ray King, Psy.D., J.D. is a licensed clinical psychologist, recently retired from the U.S. Air Force, currently with the U.S. Federal Aviation Administration (FAA).

Sled Driver Brian Shul, Sheila Kathleen O'Grady, 1991 No aircraft ever captured the curiosity & fascination of the public like the SR-71 Blackbird. Nicknamed The Sled by those few who flew it, the aircraft was shrouded in secrecy from its inception. Entering the U.S. Air Force inventory in 1966, the SR-71 was the fastest, highest flying jet aircraft in the world. Now for the first time, a Blackbird pilot shares his unique experience of what it was like to fly this legend of aviation history. Through the words & photographs of retired Major Brian Shul, we enter the world of the Sled Driver. Major Shul gives us insight on all phases of flying, including the humbling experience of simulator training, the physiological stresses of wearing a

space suit for long hours, & the intensity & magic of flying 80,000 feet above the Earth's surface at 2000 miles per hour. SLED DRIVER takes the reader through riveting accounts of the rigors of initial training, the gamut of emotions experienced while flying over hostile territory, & the sheer joy of displaying the jet at some of the world's largest airshows. Illustrated with rare photographs, seen here for the first time, SLED DRIVER captures the mystique & magnificence of this most unique of all aircraft.
