Online Distribution of Content in the EU Taina Pihlajarinne, Juha Vesala, Olli Honkkila, The legal issues surrounding the online distribution of content have recently gained prominence due to the European Commission's commitment to the Digital Single Market (DSM). This book is one of the first to provide highly topical analysis of the key legal challenges surrounding the online distribution of content, with particular focus on intellectual property rights, competition law and the regulation of new technologies.

Oxford Handbook of Online Intermediary Liability, 2020-05-04 To better understand the heterogeneity of the international online intermediary liability regime, The Oxford Handbook of Intermediary Liability Online is designed to provide a comprehensive, authoritative and 'state-of-the-art' discussion of by highlighting emerging trends. This book discusses fundamental legal issues in intermediary liability online, while also describing advancement in intermediary liability theory and identifying recent policy trends. Sections I and II provide a taxonomy of internet platforms, a general discussion of possible basis for liability and remedies, while putting into context intermediary liability regulation with fundamental rights and the ethical implications of the intermediaries' role. Section III presents a jurisdictional overview discussing intermediary liability safe harbour arrangements and highlighting issues with systemic fragmentation and miscellaneous inconsistent approaches. Mapping online intermediary liability

worldwide entails the review of a wide-ranging topic, stretching into many different areas of law and domain-specific solutions. Section IV provides an overview of intermediate liability for copyright, trademark, and privacy infringement, together with Internet platforms' obligations and liabilities for defamation, hate and dangerous speech. Section V reviews intermediary liability enforcement strategies by focusing on emerging trends, including proactive monitoring obligations across the entire spectrum of intermediary liability subject matters, blocking orders against innocent third parties, and the emergence of administrative enforcement of intermediary liability online. In addition, Section VI discusses an additional core emerging trend in intermediary liability enforcement: voluntary measures and private ordering. Finally, international private law issues are addressed in Section VII with special emphasis on the international struggle over Internet jurisdiction and extra-territorial enforcement of intermediaries' obligations.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional

Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Human Rights, Digital Society and the Law Mart Susi,2019-05-31 The Internet has created a formidable challenge for human rights law and practice worldwide. International scholarly and policy-oriented communities have so far established a consensus regarding only one main aspect – human rights in the internet are the same as offline. There are emerging and ongoing debates regarding not only the standards and methods to be used for achieving the sameness of rights online, but also whether classical human rights as we know them are contested by the online environment. The internet itself, in view of its cross-border nature and its ability to affect various areas of law, requires adopting an internationally oriented approach and a perspective strongly focused on social sciences. In particular, the rise of the internet, enhanced also by the influence of new technologies such as algorithms and intelligent artificial systems, has influenced individuals' civil, political and social rights not only in the digital world, but also in the atomic realm. As the coming of the internet calls into question well-established legal categories, a broader perspective than the domestic one is necessary to

investigate this phenomenon. This book explores the main fundamental issues and practical dimensions related to the safeguarding of human rights in the internet, which are at the focus of current academic debates. It provides a comprehensive analysis with a forward-looking perspective of bringing order into the somewhat chaotic online dimension of human rights. It addresses the matter of private digital censorship, the apparent inefficiency of existing judicial systems to react to human rights violations online, the uncertainty of liability for online human rights violations, whether the concern with personal data protection overshadows multiple other human rights issues online and will be of value to those interested in human rights law and legal regulation of the internet.

Continent in Crisis Brian Schoen,Jewel L. Spangler, Frank Towers,2023-01-03
Written by leading historians of the mid-nineteenth century United States, this book focuses on the continental dimensions of the U.S. Civil War. It joins a growing body of scholarship that seeks to understand the place of America's mid-nineteenth-century crisis in the broader sweep of world

history. However, unlike other studies that have pursued the Civil War's connections with Europe and the Caribbean, this volume focuses on North America, particularly Mexico, British Canada, and sovereign indigenous states in the West. As the United States went through its Civil War and Reconstruction, Mexico endured its own civil war and then waged a four-year campaign to expel a French-imposed monarch. Meanwhile, Britain's North American colonies were in complex and contested negotiations that culminated in confederation in 1867. In the West, indigenous nations faced an onslaught of settlers and soldiers seeking to conquer their lands for the United States. Yet despite this synchronicity, mainstream histories of the Civil War mostly ignore its connections to the political upheaval occurring elsewhere in North America. By reading North America into the history of the Civil War, this volume shows how battles over sovereignty in neighboring states became enmeshed with the fratricidal conflict in the United States. Its contributors explore these entangled histories in studies ranging from African Americans fleeing U.S. slavery by emigrating to Mexico to Confederate privateers finding allies in Halifax, Nova Scotia. This continental perspective highlights the uncertainty of the period when the fate of old nations and possibilities for new ones were truly up for grabs.

ECAI 2016 G.A. Kaminka, M. Fox, P. Bouquet, 2016-08-24 Artificial Intelligence continues to be one of the most exciting and fast-developing fields of

computer science. This book presents the 177 long papers and 123 short papers accepted for ECAI 2016, the latest edition of the biennial European Conference on Artificial Intelligence, Europe's premier venue for presenting scientific results in AI. The conference was held in The Hague, the Netherlands, from August 29 to September 2, 2016. ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems (PAIS) 2016, and the Starting AI Researcher Symposium (STAIRS). The papers from PAIS are included in this volume; the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications (FAIA) series. Organized by the European Association for Artificial Intelligence (EurAI) and the Benelux Association for Artificial Intelligence (BNVKI), the ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI. This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field.

The Legal Challenges of the Fourth Industrial Revolution Dário Moura

Vicente, Sofia de Vasconcelos Casimiro, Chen Chen, 2023-09-26 This book explores the concept of a fourth industrial revolution as an expression of the current technological, economic, and social changes sparked by the growing interconnectivity and intelligent automation that have emerged in the 21st century. It seeks to identify and explain the legal challenges posed by this phenomenon in four main areas: content, economy, security, and people. Part I, Content, considers e.g. the problems posed by new uses of protected works in the digital environment, and the new rules on liability for intermediary services contained in the Digital Services Act. Part II, Economy, is particularly concerned with the regulation of Big Tech in the EU's Digital Markets Act, ecommerce and EU consumers' rights, the taxation of online platforms, and digital advertising. Part III, Security, addresses the European Union Strategy for Cybersecurity, the use of biometric data systems and facial recognition technologies for law enforcement purposes, and the security implications of the Proposal for an EU Regulation on Artificial Intelligence, as well as the challenges entailed by the European Union's positioning itself as a major cyber defence actor. Part IV, People, discusses the Data Protection Litigation System under the GDPR, the right to disconnect from work, the proposed EU Catalogue of Fundamental Digital Rights, the countering of terrorist propaganda online through the TERREG and the DSA, and AI and Fundamental Rights.

Ask Questions, Save Money, Make More: How to Take Control of Your Financial

Life Matt Schulz,2024-03-19 Asking credit card companies, banks, hospitals, schools, and other businesses for better rates and discounts works. Here's how to do it. In this must-have money manual, personal finance expert Matt Schulz empowers you to ask 45 fiscal questions in seven key areas of life: credit and debt, healthcare, housing, shopping, travel, work, and relationships. The questions feature decision trees, success stories, potential risks, and other practical tools that skillfully guide you through the pros and cons and explain the relevant data. Every request also comes with an easy-to-follow, fill-in-the-blank script. Gain the confidence to request a lower rate on your rent or mortgage, better financing for an auto loan, a higher salary, a refund on a cancelled flight, a lower phone bill, and even a fair split for that group dinner. You are the lifeblood of every company that you pay, and you have more power over your money than you realize. Put more of it in your pocket and keep it there. Sometimes all you have to do is ask.

Broadcasting in the 21st Century Richard Rudin, 2017-09-16 The 21st century is already seeing fundamental changes in broadcasting. No longer are audiences limited to watching or listening to television and radio at the times and places dictated by the broadcasters, or on radio or TV 'sets'. Broadcasting in the 21st Century demonstrates how 'traditional' television and radio is being both challenged and supported by technological developments, including convergence and social media. Drawing on interviews with industry personnel and featuring case studies and research from many countries, including that from the UK, USA, China, India and South Africa, Richard Rudin explains not only the significance of these changes but also how many of the functions and pleasures of broadcasting that were established in the 20th century are being enhanced by new media. Opening with a substantial account of how broadcasting developed in the 20th century, the author goes on to explore how new media forms are changing audiences' pleasures, expectations and demands. Rudin's illuminating study highlights the changing relationship between audiences and broadcast output to examine a range of subjects including: - The impact of citizens' journalism - Political coverage - International TV formats and news output - The continuing appeal of radio as a distinct medium - Debates over bias, truth and trust in broadcasting and broadcasters In addition, *Broadcasting in the 21st Century* addresses a range of broadcast forms and genres including the coverage of

general elections, Reality TV and pirate radio.
