Mac OS X Panther Hacks Rael Dornfest, James Duncan Davidson, 2004 Mac OS X is a wonderful combination of the power and flexibility of Unix with the ease of use that seems to come only from Apple. Between the tools baked right into the system, a veritable cornucopia of third-party applications, and a cottage industry of customizations, tweaks, and hacks, the Mac is a force to be reckoned with like never before. Mac OS X Panther Hacks celebrates the Macintosh's adventurous spirit, inviting the citizen engineer on a quest of deeper discovery -- both with the purpose of going further and simply enjoying the ride. Mac OS X Panther Hacks continues the tradition started with Mac OS X Hacks, sitting squarely at the peculiar confluence of deadly earnest optimization and creative (albeit sometimes wacky) tweaking you seem to find only on a Mac.

Micromachining Techniques for Fabrication of Micro and Nano Structures Mojtaba Kahrizi, 2012-02-03 Micromachining is used to fabricate three-dimensional microstructures and it is the foundation of a technology called Micro-Electro-Mechanical-Systems (MEMS). Bulk micromachining and surface micromachining are two major categories (among others) in this field. This book presents advances in micromachining technology. For this, we have gathered review articles related to various techniques and methods of micro/nano fabrications, like focused ion beams, laser ablation, and several other specialized techniques, from esteemed researchers and scientists around the world. Each chapter gives a complete description of a specific micromachining method, design, associated analytical works, experimental set-up, and the final fabricated devices, followed by many references related to this field of research available in other literature. Due to the multidisciplinary nature of this technology, the collection of articles presented here can be used by scientists and researchers in the disciplines of engineering, materials sciences, physics, and chemistry.

Compressed Image File Formats John Miano, 1999 Since not all graphic formats are of equal complexity, author John Miano does not simply choose a number of file formats and devote a chapter to each one. Instead, he offers additional coverage for the more complex image file formats like PNG (a new standard) and JPEG, while providing all information necessary to use the simpler file formats. While including the well-documented BMP, XBM, and GIF formats for completeness, along with some of their less-covered features, this book gives the most space to the more intricate PNG and JPEG, from basic concepts to creating and reading actual files. Among its highlights, this book covers: -- JPEG Huffman coding, including decoding sequential mode JPEG images and creating sequential JPEG files-- Optimizing the DCT-- Portable Network Graphics format (PNG), including decompressing PNG image data and creating PNG files-- Windows BMP, XBM, and GIF

CARS 2005 Heinz U. Lemke, Michael W. Vannier, Kiyonari Inamura, 2005 This volume contains the papers of the 19th International Congress of Computer Assisted Radiology and Surgery (CARS 2005) held in Berlin, Germany between 22 and 25 June 2005. For 20 years, CARS has developed a culture of innovation with its focus on interdisciplinary and international cooperation. In approximately 20,000 pages of proceedings written by several thousand authors from more than 50 countries, many innovative developments have been reported which now assist the daily practice of physicians in their care of patients. Examples are PACS, a concept on which CARS was founded, and computer assisted surgical tools and systems, which were initially reported in CAR 85 and have now become mainstream developments. Some of these innovations are incremental, making noticeable improvements in daily practice, but others like PACS or minimally invasive surgery are transformational innovations in a sense that they have fundamentally changed the way things are done. CARS has established itself as the major event for the presentation of R & D work of high actuality. In addition to the traditional scientific/medical sessions, some of the outstanding topics presented and which are included in the CARS 2005

conference proceedings include: Interventional Radiology; Colon and Liver CAD; Intra-Operative Imaging; Minimal Invasive Spine Surgery; PACS Beyond Radiology (in conjunction with EuroPACS); Surgical PACS and the Digital Operating Room (in conjunction with SPIE Integrating the Health Care Enterprise (in conjunction with EuroPACS). The process of innovation in these fields is a continuum with many examples of other new developments being presented at CARS 2005, which marks the 20th anniversary of the congress.
