Graphics Recognition Young-Bin Kwon, Jean-Marc Ogier, 2013-02-11 This book constitutes the thoroughly refereed post-conference proceedings of the 9th International Workshop on Graphics Recognition (GREC 2011), held in Seoul, Korea, September 15-16, 2011. The 25 revised full papers presented were carefully selected from numerous submissions. Graphics recognition is a subfield of document image analysis that deals with graphical entities in engineering drawings, sketches, maps, architectural plans, musical scores, mathematical notation, tables, and diagrams. Accordingly the conference papers are organized in 5 technical sessions, covering the topics such as map and ancient documents, symbol and logo recognition, sketch and drawings, performance evaluation and challenge processing.

Graphics Recognition. Algorithms and Applications Dorothea Blostein, Young-Bin Kwon, 2014-10-08 This book presents refereed and revised papers presented at GREC 2001, the 4th IAPR International Workshop on Graphics Recognition, which took place in Kingston, Ontario, Canada in September 2001. Graphics recognition is a branch of document image analysis that focuses on the recognition of two-dimensional notations such as engineering drawings, maps, mathematical notation, music notation, tables, and chemical structure diagrams. Due to the growing demand for both off-line and on-line document recognition systems, the field of graphics recognition has an exciting and promising future. The GREC workshops provide an opportunity for researchers at all levels of experience to share insights into graphics recognition methods. The workshops enjoy strong participation from researchers in both industry and academia. They are sponsored by IAPR TC-10, the Technical Committee on Graphics Recognition within the International Association for Pattern Recognition. Edited volumes from the previous three workshops in this series are available as

Lecture Notes in Computer Science, Vols. 1072, 1389, and 1941. After the GREC 2001 workshop, authors were invited to submit enhanced versions of their papers for review. Every paper was evaluated by three reviewers. We are grateful to both authors and reviewers for their careful work during this review process. Many of the papers that appear in this volume were thoroughly revised and improved, in response to reviewers' suggestions.

Graphics Recognition. Recent Advances and Perspectives Josep Lladós, Young-Bin Kwon, 2004-09-23 1 This book contains refereed and improved papers presented at the 5th International Workshop on Graphics Recognition (GREC 2003). GREC 2003 was held in the Computer Vision Center, in Barcelona (Spain) during July 30-31, 2003. The GREC workshop is the main activity of the IAPR-TC10, the Technical 2 Committee on Graphics Recognition. Edited volumes from the previous workshops in the series are available as Lecture Notes in Computer Science: LNCS Volume 1072 (GREC 1995 at Penn State University, USA), LNCS Volume 1389 (GREC 1997 in Nancy, France), LNCS Volume 1941 (GREC 1999 in Jaipur, India), and LNCS Volume 2390 (GREC 2001 in Kingston, Canada). Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents, either from paper or electronic formats. Topics of interest for the graphics recognition community are: vectorization; symbol recognition; analysis of graphic documents with agrammatic notation like electrical diagrams, architectural plans, engineering drawings, musical scores, maps, etc.; graphics-based information retrieval; performance evaluation in graphics recognition; and systems for graphics recognition. In addition to the classic objectives, in recent years graphics recognition has faced up to new and promising perspectives, some of them in conjunction with other, adjacent scientific communities. Examples of that are sketchy interfaces and on-line graphics recognition in the framework of human

computer interaction, or query by graphic content for retrieval and browsing in large-format graphic documents, digital libraries and Web applications. Thus, the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community, with a promising future.

Invariants for Pattern Recognition and Classification Marcos A. Rodrigues, 2000 This book was conceived from the realization that there was a need to update recent work on invariants in a single volume providing a useful set of references and pointers to related work. Since the publication in 1992 of J L Mundy and A Zisserman's *Geometric Invariance in Computer Vision*, the subject has been evolving rapidly. New approaches to invariants have been proposed and novel ways of defining and applying invariants to practical problem solving are testimony to the fundamental importance of the study of invariants to machine vision. This book represents a snapshot of current research around the world. A version of this collection of papers has appeared in the *International Journal of Pattern Recognition and Artificial Intelligence* (December 1999). The papers in this book are extended versions of the original material published in the journal. They are organized into two categories: foundations and applications. Foundation papers present new ways of defining or analyzing invariants, and application papers present novel ways in which known invariant theory is extended and effectively applied to real-world problems in interesting and difficult contexts. Each category contains roughly half of the papers, but there is considerable overlap. All papers carry an element of novelty and generalization that will be useful to theoreticians and practitioners alike. It is hoped that this volume will be not only useful but also inspirational to researchers in image processing, pattern recognition and computer vision at large.

Late Antique Archaeology conference series, explores war and warfare in Late Antiquity. Papers examine strategy and intelligence, weaponry, literary sources and topography, the West Roman Empire, the East Roman Empire, the Balkans, civil war and Italy.

Becoming Slav, Becoming Croat Danijel Dzino, 2010-08-03 Drawing on the new ways of

reading and studying ancient and early medieval sources, this book explores the appearance of the Croat identity in early medieval Dalmatia.

Byzantium, Its Neighbours and Its Cultures Danijel Dzino, Ken Parry, 2014-01-01 Byzantium was one of the longest-lasting empires in history. Throughout the millennium of its existence, the empire showed its capability to change and develop under very different historical circumstances. This remarkable resilience would have been impossible to achieve without the formation of a lasting imperial culture and a strong imperial ideological infrastructure. Imperial culture and ideology required, among other things, to sort out who was 'insider' and who was 'outsider' and develop ways to define and describe ones neighbours and interact with them. There is an indefinite number of possibilities for the exploration of relationships between Byzantium and its neighbours. The essays in this collection focus on several interconnected clusters of topics and shared research interests, such as the place of neighbours in the context of the empire and imperial ideology, the transfer of knowledge with neighbours, the Byzantine perception of their neighbours and the political relationship and/or the conflict with neighbours.

Rome at War AD 293-696 Michael Whitby, 2014-06-06 In the early third century AD the Roman Empire was a force to be reckoned with, controlling vast territories and wielding enormous political power from Scotland to the Sahara. 400 years later this mighty Empire was falling apart in the face of successive problems that the rulers failed to deal with. In this challenging new volume Michael Whitby tackles the fundamental issues (such as the rise of Christianity) that led to the 'decline and fall' of the Roman Empire, and offers a startling reassessment of the performance of the late Roman army.

Late Roman Army Karen R. Dixon, Pat Southern, 2014-06-23 Using a full range of original literary sources, modern Continental scholarship, and current archaeological research, Pat Southern and

Karen R. Dixon provide a stimulating overview of the historical period, the critical changes in the army, and the way these changes affected the morale of the soldiers.

The Roman Cavalry Karen R. Dixon,Pat Southern,2013-01-11 The cavalry was a vital part of the army of Rome and it played a significant role in the expansion and success of the Roman Empire. Karen R. Dixon and Pat Southern describe the origins of the mounted units of the Roman army and trace their development from temporary allied troops to the regular alae and cohorts. They have drawn together evidence from a wide variety of sources: archaeological, epigraphic and literary, as well as comparing ancient testimony with more recent experience of the use of cavalry. The book covers the subject from the perspective of both the men and the horses. How were the horses selected and disposed of; how were they trained, stabled and fed? How were the men recruited, organized and equipped; and what were the conditions of service for a Roman cavalryman? The cavalry had to be employed in peacetime and this is discussed as well as its role in war. The image of the Roman cavalry is often one of excitement and glory but the authors are aware that a true picture must not overlook the routine and the suffering. This book provides a comprehensive account of the Roman cavalry and the current state of knowledge concerning it. The wide selection of illustrations includes original drawings by Karen R. Dixon.

Edward Gibbon and Empire Rosamond McKitterick,Roland Quinault,2002-07-18 This book examines Gibbon's interpretations of empire and the intellectual context in which he formulated them against a background of the eighteenth- and late twentieth-century knowledge of late antiquity and the Middle Ages. Gibbon's ideas of empire, his understanding of monarchy and the balance of power, his sources and working methods, the structure of the History of the Decline and Fall of the Roman Empire, his attitude towards the barbarians, the contrasting treatments of the eastern and western

Empire, his appreciation of past civilizations and their material remains, his audience and their reactions - contemporary and Victorian - are considered in the light of the latest research on eighteenth-century intellectual history on the one hand and on late antiquity, Byzantium and the Middle Ages on the other. The book breaks new ground in taking the form of a dialogue between experts on the fields about which Gibbon himself wrote, and eighteenth-century intellectual historians.

Greek Narratives of the Roman Empire under the Severans Adam M. Kemezis, 2014-10-23

This book explores how Greek authors who witnessed sudden political change reacted by re-imagining the larger narrative of the Roman past.

Byzantium at War John Haldon, 2014-06-06 Byzantium survived for 800 years, yet its dominions and power fluctuated dramatically during that time. John Haldon tells the story from the days when the Empire was barely clinging on to survival, to the age when its fabulous wealth attracted Viking mercenaries and Asian nomad warriors to its armies, their very appearance on the field enough to bring enemies to terms. In 1453 the last emperor of Byzantium, Constantine XII, died fighting on the ramparts, bringing to a romantic end the glorious history of this legendary empire.

The Roman Army, 31 BC - AD 337 Brian Campbell, 2006-05-23 The Roman army is remarkable for its detailed organisation and professional structure. It not only extended and protected Rome's territorial empire which was the basis of Western civilisation, but also maintained the political power of the emperors. The army was an integral part of the society and life of the empire and illustrated many aspects of Roman government. This sourcebook presents literary and epigraphic material, papyri and coins which illustrate the life of the army from recruitment and in the field, to peacetime and the community. It is designed as a basic tool for students of the Roman army and Roman history in

general.

Before the Normans Barbara M. Kreutz, 2011-06-07 Histories of medieval Europe have typically ignored southern Italy, looking south only in the Norman period. Yet Southern Italy in the ninth and tenth centuries was a complex and vibrant world that deserves to be better understood. In *Before the Normans*, Barbara M. Kreutz writes the first modern study in English of the land, political structures, and cultures of southern Italy in the two centuries before the Norman conquests. This was a pan-Mediterranean society, where the Roman past and Lombard-Germanic culture met Byzantine and Islamic civilization, creating a rich and unusual mix.

Beyond the Great Story Robert F. Berkhofer, 1995 What legitimate form can history take when faced by the severe challenges issued in recent years by literary, rhetorical, multiculturalist, and feminist theories? That is the question considered in this pathbreaking book. Robert Berkhofer addresses the essential practical concern of contemporary historians.

Cultural Identity in the Roman Empire Dr Joanne Berry, Joanne Berry, Ray Laurence, 2002-09-11 This provocative and often controversial volume examines concepts of ethnicity, citizenship and nationhood, to determine what constituted cultural identity in the Roman Empire. The contributors draw together the most recent research and use diverse theoretical and methodological perspectives from archaeology, classical studies and ancient history to challenge our basic assumptions of Romanization and how parts of Europe became incorporated into a Roman culture. *Cultural Identity in the Roman Empire* breaks new ground, arguing that the idea of a unified and easily defined Roman culture is over-simplistic, and offering alternative theories and models. This well-documented and timely book presents cultural identity throughout the Roman empire as a complex and diverse issue, far removed from the previous notion of a dichotomy between the Roman

invaders and the Barbarian conquered.
