Mathematics of Casino Carnival Games Mark Bollman,2020-10-21 There are thousands of books relating to poker, blackjack, roulette and baccarat, including strategy guides, statistical analysis, psychological studies, and much more. However, there are no books on Pell, Rouleno, Street Dice, and many other games that have had a short life in casinos! While this is understandable — most casino gamblers have not heard of these games, and no one is currently playing them — their absence from published works means that some interesting mathematics and gaming history are at risk of being lost forever. Table games other than baccarat, blackjack, craps, and roulette are called carnival games, as a nod to their origin in actual traveling or seasonal carnivals. Mathematics of Casino Carnival Games is a focused look at these games and the mathematics at their foundation. Features • Exercises, with solutions, are included for readers who wish to practice the ideas presented • Suitable for a general audience with an interest in the mathematics of gambling and games • Goes beyond providing practical 'tips' for gamblers, and explores the mathematical principles that underpin gambling games

Mathematics of The Big Four Casino Table Games Mark Bollman,2021-08-20 Mathematics is the basis of casino games, which are the bedrock of a $100 billion/year industry. Mathematics of the Big Four Casino Table Games: Blackjack, Baccarat, Craps, & Roulette takes an in-depth look at the four biggest table games in casinos: blackjack, baccarat, craps, and roulette. It guides readers through the mathematical principles that underpin these games and their different variations, providing insights that will be of huge interest to gamblers, casino managers, researchers, and students of mathematics. Features A valuable teaching resource, replete with exercises, for any course on gambling mathematics Suitable for a wide audience of professionals, researchers, and students Many practical applications for the gambling industry Mark Bollman is Professor of Mathematics and chair of the Department of Mathematics & Computer Science at Albion College in Albion, Michigan, and has taught 116 different courses in his career. Among these courses is Mathematics of the Gaming Industry, where mathematics majors carefully study the math behind games of chance and travel to Las Vegas, Nevada, in order to compare theory and practice. He has also taken those ideas into Albion's Honors Program in Great Issues in Humanities: Perspectives on Gambling, which considers gambling from literary, philosophical, and historical points of view as well as mathematically. Mark has also authored Basic Gambling Mathematics: The Numbers Behind the Neon, Mathematics of Keno and Lotteries, and Mathematics of Casino Carnival Games.

Mission Partnership in Creative Tension Samuel Cueva,2015-04-14 Samuel Cueva has refined his concept of 'partnership in mission' by advocating the use of reciprocal contextual collaboration in this important contribution to scholarly reflection on contemporary missiology. Referencing historical, theological and functional aspects of how mission has been carried out, as well as analyzing it's impact on the evangelical movement, the author identifies that mission always develops with positive and negative tensions. Emphasizing an understanding of current missions which include traditional, networking and emergent models, and how they can be combined, interconnected and interchanged, the author proposes a fresh model that ensures the suitability for every mission context.

Using Microsoft FrontPage 2000 Dennis Jones,Neil Randall,1999 Special Edition Using Microsoft FrontPage 2000 is an all-in-one guide to designing, creating, and publishing on the World Wide Web and on intranets with the leading tool on the market. Advancing the Story Debora Halpern Wenger,Deborah Potter,2018-08-17 This textbook takes a systematic approach to teaching broadcast and multimedia journalism to students. Easy to follow [and] very relatable for students. Visually appealing...Love this textbook. —Beth Bingham Georges, California State University, Fullerton Updated Edition of Bestseller! It's a multimedia world, and today's journalists must develop a multimedia mindset. How does this way of thinking change the newsgathering and news production processes? Having conceived of and written their book in this changed media landscape, broadcast veterans Wenger and Potter seamlessly build on the fundamentals of good news reporting while teaching students to use depth, interactivity and immediacy as they maximize the advantages of each platform. While retaining the book's clear instruction and advice from those in the trenches, Advancing the Story, Fourth Edition has been updated to reflect the latest issues and trends with: greater

emphasis on social media and mobile media to gather, promote and disseminate news content; expanded coverage of media ethics and media law; extended examples of effective reporting across multiple platforms; updated writing exercises and new resources for reviewing AP style; and additional interviews with journalists at the forefront of industry changes.

Bichitra: The Making of an Online Tagore Variorum Sukanta Chaudhuri,2016-02-12 This book documents the creation of the Bichitra Online Tagore Variorum, a publicly accessible database of Rabindranath Tagore's complete works in Bengali and English totaling some 140,000 pages of primary material. Chapters cover innovative aspects of the site, all replicable in other projects: a hyperbibliography; a search engine and hyperconcordance working across the database; and a unique collation program comparing variant texts at three levels. There are also chapters on the special problems of processing manuscripts, and on planning the website. Early chapters take readers through the history of the project, an overview of Tagore's works, and the Bengali writing system with the challenges of adapting it to electronic form. The name Bichitra, meaning various in Bengali, alludes both to the great variety of Tagore's works and to their various stages of composition. Beyond their literary excellence, they are notable for their sheer quantity, the number of variant forms of a great many items, and their afterlife in translation, often the poet's own. Seldom if ever has the same writer revised his material and recast it across genres on such a scale. Tagore won the Nobel Prize in 1913. By its value-added presentation of this range of material, Bichitra can be a model for future databases covering an author's complete works or other major corpus of texts. It offers vastly expanded access to Tagore's writings, and enables new kinds of research including computational text analysis. The "book of the website" shows in technical and human terms how researchers with interests in art, literature and technology can collaborate on cultural informatics projects.

Online GIS and Spatial Metadata Terry Bossomaier,Brian A. Hope,2015-12-02 Implement Your Own Applications Using Online GIS An in-depth study detailing the online applications of geographic information systems (GIS), Online GIS and Spatial Metadata, Second Edition outlines how GIS data are published, organized, accessed, searched, maintained, purchased, and processed over the web. This latest work describes how the internet has become a platform for the delivery and integration of geographic information. It highlights the growth that has taken place since the first edition and includes new chapters on popular XML formats used in online GIS, SDI Metadata Portals, Mobile GIS and Location-Based services. It also updates metadata standards and explains how metadata links it all together. Designed To Help Non-Technical Readers Understand Technical Issues The book provides a brief overview of the basic technology of online GIS before introducing the technical methods used to develop and implement GIS on the web. It includes an introduction to the protocols and standards now in use online and provides technical background and real-world examples of scripts, markup, and other elements that make this technology work. Expanding on the previous edition, the book offers a global perspective of online GIS, contains links and references to online resources, and includes future directions, applications, and trends. Reviewing major advances that have occurred over the past decade, this seminal work: Discusses the detail of four XML-based standards now in common use for Online GIS and spatial metadata Outlines the nature of Information Networks, systems in which information is distributed across many different sites Examines the conceptual framework of metadata, by studying the RDF and similar standards for the Web Describes several metadata standards in use around the world for spatial metadata Provides current examples of SDI metadata portals, catalogues, and clearinghouses Looks at ways in which distributed information can be built into data warehouses, and introduces basic ideas in data mining
