30 Days to a More Powerful Vocabulary Dan

Strutzel, 2018-10-09 A Bigger Vocabulary = A Brighter Future. Words. They're the foundation of nearly everything of value in our world. They have the power to create and the power to destroy. The power to inspire and to terrify. The power to enlighten and also to obscure. And, more specifically for you, they have the power to attract wealth and success and guarantee your brighter future. This is not hyperbole - it is based on rock-solid research. Studies show that those people with large vocabularies are smarter, wealthier, and happier than the average person - and substantially so. And here's the best news of all: a large vocabulary is not tied to your social status, your genes, or even your education level. It is a skill that can be learned - and it takes only 30 days. In this cutting-edge program, 30 Days to a More Powerful Vocabulary, personal development expert and English enthusiast Dan Strutzel will instruct, enlighten, and inspire you with a concentrated 30-day program that will teach you over 500 words. But, more than teaching you these words, the uniquely designed program will ensure that these words become a habit-knit part of your life - and with minimal effort on your part. Best of all, research shows that learning new words has an exponential effect on the size of your vocabulary - since learning one word naturally produces an association between two to three more words. In short, after reading and applying the system in this 30-day program, you will not only have a bigger vocabulary - you will have a brighter future! Here's just a sampling of what you'll learn: The 10 myths about building a dynamic vocabulary The secret behind the exponential effect of vocabulary building A 30-day program designed to maximize learning and comprehension of over 500 words The words you need to know about money and

financial issues The words you need to know about persuading others The words you need to know about marriage, parenting, and other relationships The words you need to know about science The words you need to know to be a great conversationalist Why building a large, dynamic vocabulary is even more valuable in the digital age And much more!

Thirty Million Words Dana Suskind, 2015-09-08 The founder and director of the Thirty Million Words Initiative, Professor Dana Suskind, explains why the most important—and astoundingly simple—thing you can do for your child’s future success in life is to talk to them. What nurtures the brain to optimum intelligence and stability? It is a secret hiding in plain sight: the most important thing we can do for our children is to have conversations with them. The way you talk with your growing child literally builds his or her brain. Parent talk can drastically improve school readiness and lifelong learning in everything from math to art. Indeed, parent-child talk is a fundamental, critical factor in building grit, self-control, leadership skills, and generosity. It is crucial to making the most in life of the luck you have with your genes. This landmark account of a new scientific perspective describes what works and what doesn't (baby talk is fine; relentless correction isn't). Discover how to create the best language environments for children by following the simple structure of the Three Ts: Tune In; Talk More; Take Turns. Dr. Suskind and her colleagues around the country have worked with thousands of families; now their insights and successful, measured approaches are available to all. This is the first book to reveal how and why the first step in nurturing successful lives is talking to children in ways that build their brains. Your family—and our nation—need to know. *Nominated for the Books for a Better Life Award*
