Unlocking the Clubhouse Jane Margolis,Allan Fisher,2003-02-28 Understanding and overcoming the gender gap in computer science education. The information technology revolution is transforming almost every aspect of society, but girls and women are largely out of the loop. Although women surf the Web in equal numbers to men and make a majority of online purchases, few are involved in the design and creation of new technology. It is mostly men whose perspectives and priorities inform the development of computing innovations and who reap the lion's share of the financial rewards. As only a small fraction of high school and college computer science students are female, the field is likely to remain a male clubhouse, absent major changes. In Unlocking the Clubhouse, social scientist Jane Margolis and computer scientist and educator Allan Fisher examine the many influences contributing to the gender gap in computing. The book is based on interviews with more than 100 computer science students of both sexes from Carnegie Mellon University, a major center of computer science research, over a period of four years, as well as classroom observations and conversations with hundreds of college and high school faculty. The interviews capture the dynamic details of the female computing experience, from the family computer kept in a brother's bedroom to women's feelings of alienation in college computing classes. The authors investigate the familial, educational, and institutional origins of the computing gender gap. They also describe educational reforms that have made a dramatic difference at Carnegie Mellon—where the percentage of women entering the School of Computer Science rose from 7% in 1995 to 42% in 2000—and at high schools around the country.

Unlocking Agile's Missed Potential Robert Webber,2022-07-07 UNLOCKING AGILE'S MISSED POTENTIAL Agile has not delivered on its promises. The business side expected faster time to market, but they still experience the long delays of bloated releases. Engineers thought they would be given time to build the product right the first time, but they are rushed under pressure to deliver new features within impossible schedules. What went wrong? The culprit is feature-based waterfall release planning perpetuated in a vain attempt to achieve business predictability. Agile didn't address the business need for multi-year financial predictability. The Agile community's answer was the naïve response, The business needs to be more Agile. Waterfall release planning with fixed schedules undercuts a basic tenet of Agile development – the need to adjust content delivered within a timebox to account for evolving requirements and incorporation of feedback. Agile without flexible content is not Agile. This book introduces a novel solution that enables product teams to deliver higher value within shorter cycle times while meeting the predictability needs of the business. Organizations today want product teams that break down walls between product management and engineering to achieve schedule and financial objectives. Until now they haven't had a way to implement product teams within the rigid constraints of traditional organizational structures. The Investment planning approach described in this book supports small development increments planned and developed by product teams aligned by common schedule and financial goals. It uses Cost of Delay principles to prioritize work with the highest value and shortest cycle times. Investments provide a vehicle for collaboration and innovation and fulfill the promise of highly motivated self-directed Agile development teams. This book is for engineers, product managers and project managers who want to finally do Agile the way it was envisioned. This book is also for leaders who want to build high-performance teams around the inherent motivational environment of Agile when done right. Foreword by Steve McConnell, author of More Effective Agile: A Roadmap for Software Leaders (Construx Press, 2019).

Unlocking SME Finance in Asia Naoyuki Yoshino,Farhad Taghizadeh-Hesary,2019-07-01 There is limited access for small and medium-sized enterprises (SMEs) to bank credit. This book proposes new and sustainable models to help ease the access of SMEs to finance and boost economic growth and job creation in Asia. This book looks at the difficulties of SMEs in accessing finance and suggests ways on how to mitigate these challenges. It suggests how we can develop credit information infrastructures for SMEs to remedy the asymmetric information problem and to utilize credit rating techniques for the development of a sustainable credit guarantee scheme. The book provides illustrations of various Asian economies that implemented credit guarantee schemes and credit risk databases and is a useful reference for lessons and policy recommendations.

Using Technology to Unlock Musical Creativity Scott Watson,2011-08-25 It has never been easier or more fun for students to compose, improvise, arrange, and produce music than with today's technology. Perfect for pre- or in-service music educators, Using Technology to Unlock Musical Creativity offers both a pedagogical framework and a description of the technology tools for engaging students in creative musical projects.

Unlocking the Gates Taylor Walsh,2010-12-28 How elite universities are entering the world of online education Over the past decade, a small revolution has taken place at some of the world's leading universities, as they have started to provide free access to undergraduate course materials—including syllabi, assignments, and lectures—to anyone with an Internet connection. Yale offers high-quality audio and video recordings of a careful selection of popular lectures, MIT supplies digital materials for nearly all of its courses, Carnegie Mellon boasts a purpose-built interactive learning environment, and some of the most selective universities in India have created a vast body of online content in order to reach more of the country's exploding student population. Although they don't offer online credit or degrees, efforts like these are beginning to open up elite institutions—and may foreshadow significant changes in the way all universities approach teaching and learning. Unlocking the Gates is one of the first books to examine this important development. Drawing on a wide range of sources, including extensive interviews with university leaders, Taylor Walsh traces the evolution of these online courseware projects and considers the impact they may have, both inside elite universities and beyond. As economic constraints and concerns over access demand more efficient and creative teaching models, these early initiatives may lead to more substantial innovations in how education is delivered and consumed—even at the best institutions. Unlocking the Gates tells an important story about this form of online learning—and what it might mean for the future of higher education.

Unlocking Energy Innovation Richard K. Lester,David M. Hart,2011-10-21 Experts outline a plan to overhaul the U.S. energy innovation system for accelerated, large-scale adoption of reliable, low-cost, low-carbon energy technologies. Energy innovation offers us our best chance to solve the three urgent and interrelated problems of climate change, worldwide insecurity over energy supplies, and rapidly growing energy demand. But if we are to achieve a timely transition to reliable, low-cost, low-carbon energy, the U.S. energy innovation system must be radically overhauled. Unlocking Energy Innovation outlines an up-to-the-minute plan for remaking America's energy innovation system by tapping the country's entrepreneurial strengths and regional diversity in both the public and private spheres. "Business as usual" will not fill the energy innovation gap. Only the kind of systemic, transformative changes to our energy innovation system described in this provocative book will help us avert the most dire scenarios and achieve a sustainable and secure energy future.

Unlocking Strategic Innovation Surja Datta,Sandeep Roy,Tobias Kutzewski,2021-03-14 This new book explores how firms achieve competitive advantage in a disruptive, digital and globalized business landscape. An integrative framework, 'The Four Rs of Competitive Success', is introduced, which covers the four core pillars of global strategy: resources and capabilities, technology and innovation (recombination), internationalization and international markets (reach), and physical and virtual location (roots). It then explains how competitive advantage is achieved through an interaction of these four drivers against the backdrop of a globalized and digitized world. It is uniquely practical in its approach, combining theoretical understanding with international case studies and real-life examples throughout each chapter, including Apple, IKEA and Microsoft. Unlocking Strategic Innovation is concise, applied reading for postgraduate students studying international business, corporate strategy, innovation and digital strategy, as well as academics in the field. It will also be important reading for practitioners looking to gain further understanding of how firms compete and flourish in a global and technology-driven environment.

Unlocking the Power of Networks Stephen Goldsmith,Donald F. Kettl,2009-12-01 The era of strict top-down, stovepiped public management in America is over. The traditional dichotomy between public ownership and privatization is an outdated notion. Public executives have shifted their focus from managing workers and directly providing services to orchestrating networks of public, private, and nonprofit organizations to deliver those services. Unlocking the Power of Networks employs original sector-specific analyses to reveal how networked governance achieves previously unthinkable policy goals. Stephen Goldsmith and Donald F. Kettl head a stellar cast of policy practitioners and scholars exploring the potential, strategies, and best practices of high-performance networks while identifying next-generation issues in public-sector network management. They cover the gamut of public policy issues, including national security, and the book even includes a thought-provoking look at how jihadist terrorists use the principles of network management to pursue their goals. Contributors: William G. Berberich (Virginia Tech), Tim Burke (Harvard University), G. Edward DeSeve (University of Pennsylvania),William D. Eggers (Manhattan Institute), Anne M. Khademian (Virginia Tech), H. Brinton Milward (University of Arizona), Mark H. Moore (Harvard University), Paul Posner (George Mason University), Jörg Raab (Tilburg University), and Barry G. Rabe (University of Michigan).
