Amine, FOURNIER Régis, 2012-09-14 Ce livre met en évidence l'utilisation des différentes approches de traitement du signal et de l'image dans des applications d'identification ou d'authentification des individus. Son contenu s'adresse, en particulier, aux étudiants de 3ème cycle, chercheurs et ingénieurs qui souhaitent s'initier au développement d'algorithmes spécifiques et leur intégration dans des systèmes biométriques. Le lecteur y trouvera, d'une part, des chapitres introductifs, orientés pédagogie et d'autre part, des chapitres à vocation recherche. Evidemment, la reconnaissance faciale 2D/3D, la reconnaissance par l'iris et les traits de la main sont considérés, mais les auteurs ont également souhaité renforcer le contenu de cet ouvrage par des chapitres portant sur la multi-biométrie, l'évaluation des performances des systèmes biométriques ainsi que certains outils de traitement du signal tels que la classification, la cryptographie et la protection des données. Enfin, il est également présenté dans cet ouvrage de nouveaux concepts et orientations récentes. Ce travail est le fruit de la contribution de plusieurs acteurs du milieu académique et de l'industrie, actifs dans le domaine de la biométrie et de la sécurité.

cultural content, is well represented in the major collections. Numerous exhibitions, awards and membership of juries have consolidated his international reputation. The publication contains an overview of his work for the first time.

**Images in Mind** Deborah Steiner, 2001 In archaic and classical Greece, statues played a constant role in people's religious, political, economic, aesthetic, and mental lives. Evidence of many kinds demonstrates that ancient Greeks thought about--and interacted with--statues in ways very different from our own. This book recovers ancient thinking about statues by approaching them through contemporary literary sources. It not only shows that ancient viewers conceived of images as more operative than aesthetic, but additionally reveals how poets and philosophers found in sculpture a practice 'good to think with.' Deborah Tarn Steiner considers how Greek authors used images to ponder the relation of a copy to an original and of external appearance to inner reality. For these writers, a sculpture could straddle life and death, encode desire, or occasion reflection on their own act of producing a text. Many of the same sources also reveal how thinking about statues was reflected in the objects' everyday treatment. Viewing representations of gods and heroes as vessels hosting a living force, worshippers ritually washed, clothed, and fed them in order to elicit the numinous presence within. By reading the plastic and verbal sources together, this book offers new insights into classical texts while illuminating the

practices surrounding the design, manufacture, and deployment of ancient images. Its argument that images are properly objects of cultural and social--rather than purely aesthetic--study will attract art historians, cultural historians, and anthropologists, as well as classicists.

*Images of the Divine: The Theology of Icons at the Seventh Ecumenical Council - Revised Edition* Ambrosios Giakalis, 2005-08-01 This book, newly revised and updated, examines the Eastern Church's theology of icons chiefly on the basis of the acts of the Seventh Ecumenical Council of 787. The political circumstances leading to the outbreak of the iconoclast controversy in the eighth century are discussed in detail, but the main emphasis is on the theological arguments and assumptions of the council participants. Major themes include the nature of tradition, the relationship between image and reality, and the place of christology. Ultimately the argument over icons was about the accessibility of the divine. Icons were held by the iconophiles to communicate a deifying grace which raised the believer to participation in the life of God.
