A Minimalist Theory of Simplest Merge Samuel D. Epstein,Hisatsugu Kitahara,T. Daniel Seely,2021-09-28 This collection explicates one of the core ideas underpinning Minimalist theory – explanation via simplification – and its role in shaping some of the latest developments within this framework, specifically the simplest Merge hypothesis and the reduction of syntactic phenomena to third factor considerations. Bringing together recent papers on the topic by Epstein, Kitahara, and Seely, with one by Epstein, Seely and Obata, and one by Kitahara, the book begins with an introduction which situates the papers in a cohesive overview of some of the latest research on Minimalism, as facilitated by current theoretical developments. The volume integrates a historical overview of evolutions in Merge, starting with Chomsky’s (pre-Merge) Aspects model up to current theoretical models, including a primer of Chomsky’s most recent theory of Merge based on the concept of Workspace. The Minimalist notions of perfection and simplification are also outlined, providing clearly explicated coverage of key technical concepts within the framework as applied to grammatical phenomena. Taken as a whole, the collection both introduces and advances Minimalist theory for students and scholars in linguistics and related sub-disciplines of psychology, philosophy, and cognitive science, as well as offering new directions for future research for researchers in these fields.

Nonprofit Mergers Dan H. McCormick,2001 For maximizing assets, saving costs, and securing market share, mergers can make all the difference. But for nonprofits, mergers can mean more than leveraging resources and meeting legal requirements. They mean building consensus, maintaining ideals, and mingling cultures. In Nonprofit Mergers: The Power of Successful Partnerships, you'll learn how to do it all. Step-by-step expert strategist Dan H. McCormick guides you through a well-planned, well-executed merger and the real world merger lessons learned by a small foundation and a large association. From questions to ask, to documents to gather, this handbook cleans away myths and mysteries to give your nonprofit a powerful, proven tool you can put to work today for long-term success.

Robin Williams Cool Mac Apps John Tollett,Robin Williams,2010-04-07 This popular book shows readers how to take advantage of the iLife '08 applications that to many are the coolest parts of using a Mac. Through tutorials, tips, and techniques readers will learn how to use each of the powerful applications -- individually and as part of an integrated, interactive suite. Robin and John also cover the features of the immensely popular .Mac Web Gallery, which enables you to share your iPhoto library with family and friends with just a few clicks. Friendly, practical instructions will have new and veteran Mac owners using all that's new in the suite in no time. They'll find everything about getting on the Internet and using email; using the way-cool iChat AV, which adds audio and video to instant messaging; using iTunes, including access to the iTunes Music Store; the new video library in iMovie; new organization and editing tools in iPhoto; new animated themes in iDVD; and much more!

Merge in the Mind-Brain Naoki Fukui,2017-04-21 This collection of nine papers brings together Naoki Fukui’s pioneering body of work on Merge, the basic operation of human language syntax, from the two distinct but related perspectives of theoretical syntax and neurosciences. Part I presents an overview of the development of the theory of Merge and its current formulations in linguistic theory, highlighting the author’s previously published papers in theoretical syntax, while Part II focuses on experimental research on Merge in the brain science of language, demonstrating how new techniques and the results they produce can inform the study of syntactic structures in the brain in the future. By combining insights from theoretical linguistics and neurosciences, this book presents an innovative unified account of the study of Merge and paves new directions for future research for graduate students and scholars in theoretical linguistics, neuroscience, syntax, and cognitive science.

Automated Theorem Proving Monty Newborn,2012-12-06 This text and software package introduces readers to automated theorem proving, while providing two approaches implemented as easy-to-use programs. These are semantic-tree theorem proving and resolution-refutation theorem proving. The early chapters introduce first-order predicate calculus, well-formed formulae, and their transformation to clauses. Then the author goes on to show how the two methods work and provides numerous examples for readers to try their hand at theorem-proving experiments. Each chapter comes with exercises designed to familiarise the readers with the ideas and with the software, and answers to many of the problems.

Agreement Beyond Phi Shigeru Miyagawa,2017-03-24 An argument that agreement and agreementless languages are unified under an expanded view of grammatical features including both phi-features and certain discourse configurational features. Much attention in theoretical linguistics in the generative and Minimalist traditions is concerned with issues directly or indirectly related to movement. The EPP (extended projection principle), introduced by Chomsky in 1981, appeared to coincide with morphological agreement, and agreement came to play a central role as the driver of movement and other narrow-syntax operations. In this book, Shigeru Miyagawa continues his investigation into a computational equivalent for agreement in agreementless languages such as Japanese. Miyagawa extends his theory of Strong Uniformity, introduced in his earlier book, Why Agree? Why Move? Unifying Agreement-Based and Discourse-Configurational Languages (MIT Press). He argues that agreement and agreementless languages are unified under an expanded view of grammatical features including both phi-features and discourse configurational features of topic and focus. He looks at various combinations of these two grammatical features across a number of languages and phenomena, including allocutive agreement, root phenomena, topicalization, “why” questions, and case alternation.

Financial Management for Nurse Managers J. Michael Leger,Janne Dunham-Taylor,2017-08-01 Financial Management for Nurse Managers: Merging the Heart with the Dollar, Fourth Edition is a unique text that addresses the financial management issues faced by nurse leaders in a variety of settings, including hospitals, ambulatory/outpatient clinics, long-term care facilities, and home care. With an evidence-based and practical approach, it covers a wide-range of financial information, including healthcare finance, economics, budgeting, reimbursements, accounting, and financial strategies. Completely updated and revised, the Fourth Edition features a new, streamlined structure that concentrates on core financial management topics while condensing supplemental material. As a result, the text is organized into three parts: * Healthcare, the Economy, and Value-Based Purchasing * Budget Principles * Financial Strategies and Accounting Issues The Fourth Edition also focuses on bringing financial concepts to life for students with real-life applications in nursing practice.

Deriving Coordinate Symmetries John R. te Velde,2006-01-18 This monograph proposes a minimalist, phase-based approach to the derivation of coordinate structures, utilizing the operations Copy and Match to account for both the symmetries and asymmetries of coordination. Data are drawn primarily from English, German and Dutch. The basic assumptions are that all coordinate structures are symmetric to some degree (in contrast to parasitic gap and many verb phrase ellipsis constructions), and these symmetries, especially with ellipsis, allow syntactic derivations to utilize Copy and Match in interface with active memory for economizing with gaps and assuring clarity of interpretation. With derivations operating at the feature level, troublesome properties of coordinate structures such as cross-categorial and non-constituent coordination, violations of the Coordinate Structure Constraint, as well as coordinate ellipsis (Gapping, RNR, Left-Edge Ellipsis) are accounted for without separate mechanisms or conditions applicable only to coordinate structures. The proposal provides support for central assumptions about the structure of West Germanic.

The Final-Over-Final Condition Michelle Sheehan,Theresa Biberauer,Ian Roberts,Anders Holmberg,2017-10-27 An examination of the evidence for and the theoretical implications of a universal word order constraint, with data from a wide range of languages. This book presents evidence for a universal word order constraint, the Final-over-Final Condition (FOFC), and discusses the theoretical implications of this phenomenon. FOFC is a syntactic condition that disallows structures where a head-initial phrase is contained in a head-final phrase in the same extended projection/domain. The authors argue that FOFC is a linguistic universal, not just a strong tendency, and not a constraint on processing. They discuss the effects of the universal in various domains, including the noun phrase, the adjective phrase, the verb phrase, and the clause. The book draws on data from a wide range of languages, including Hindi, Turkish, Basque, Finnish, Afrikaans, German, Hungarian, French, English, Italian, Romanian, Arabic, Hebrew, Mandarin, Pontic Greek, Bagirmi, Dholuo, and Thai. FOFC, the authors argue, is important because it is the only known example of a word order asymmetry pertaining to the order of heads. As such, it has significant repercussions for theories connecting the narrow syntax to linear order.

Advanced Materials 1991-1992 J. Binner,2013-10-22 Advanced Materials 1991-1992, I. Source Book focuses on the properties, characteristics, reactions, applications, and composition of ceramics, composites, and plastics. The publication first elaborates on ceramics, including markets, materials, applications, processing, equipment, standards, health, safety, the environment, research initiatives, and industry news. Topics include joint ventures/agreements, powder processing, furnaces, bioceramics, electronics, superconductors, oxide films, silica, sensors, and superconductors. The manuscript also takes a look at composites, as well as markets, materials, applications, processing, non-destructive evaluation, testing, health, safety, and the environment, research initiatives, and industry news. Concerns include restructuring, takeovers and mergers, recycling, health and safety, test development, data generation, manufacturing processes, tooling, coatings, general engineering, aerospace, automotive, and boom in advanced composites. The book then ponders on plastics, including markets, materials, applications, processing, equipment, health, safety, the environment, and industry news. The publication is a valuable reference for readers interested in the properties, applications, processing, and composition of ceramics, composites, and plastics.

Introduction to Process Algebra Wan Fokkink,2013-03-09 Automated and semi-automated manipulation of so-called labelled transition systems has become an important means in discovering flaws in software and hardware systems. Process algebra has been developed to express such labelled transition systems algebraically, which enhances the ways of manipulation by means of equational logic and term rewriting. The theory of process algebra has developed rapidly over the last twenty years, and verification tools have been developed on the basis of process algebra, often in cooperation with techniques related to model checking. This textbook gives a thorough introduction into the basics of process algebra and its applications.

Merging Traditions Judah Rubinstein,Jane Avner,2004 Published in cooperation with the Western Reserve Historical Society Out of a small group of Jewish settlers that came to Cleveland in 1839 sprang the large, vibrant, and diverse Jewish community, numbering in excess of 81,500, that has contributed significantly to Cleveland's life. At the turn of the century, many immigrants found work in Cleveland's thriving garment industry, then second only to New York's. Others entered the building trades, and those with entrepreneurial inclinations opened retail stores dedicated to serving their Jewish neighborhoods. The entry of Jews into the business mainstream facilitated inclusion into nearly every area of community endeavor--civic life, education, and culture. During World War II the community began to move to the suburbs, with Cleveland Heights emerging as the largest Jewish neighborhood outside of Cleveland. The exodus to the suburbs continued unabated until the mid-1950s, practically emptying the central city of its Jewish population. Many moved still farther east in the 1960s. As families left the traditional Jewish enclaves for more affluent areas and purchased larger properties in the suburbs, the synagogues and Jewish institutions and facilities also migrated. At the time of his death in February 2003 Judah Rubinstein was working on this second edition of Merging Traditions: Jewish Life in Cleveland, which he initially co-wrote with the late Sidney Z. Vincent in 1978. This revised and updated pictorial review of the nearly two-century history of the Jewish community tells the story of Jewish settlement and achievement in Northeast Ohio and continues in the spirit of the original, illuminating the struggles and the successes of one particular immigrant group and providing a valuable perspective on Cleveland's Jewish community, past and present.
