Current Ornithology Volume 17 Charles F. Thompson, 2010-09-09 Current Ornithology publishes authoritative, up-to-date, scholarly reviews of topics selected from the full range of current research in avian biology. Topics cover the spectrum from the molecular level of organization to population biology and community ecology. The series seeks especially to review (1) fields in which an abundant recent literature will benefit from synthesis and organization, or (2) newly emerging fields that are gaining recognition as the result of recent discoveries or shifts in perspective, or (3) fields in which students of vertebrates may benefit from comparisons of birds with other classes. All chapters are invited, and authors are chosen for their leadership in the subjects under review.

For Every Dog a Different Master Kateřina Šedá, 2008 Tiré du site Internet de JRP/Ringier: Based on Sedá's work for Documenta 12, this book documents a complex and long-term project realized in Nova Lisen, Brno, Czech Republic, where the artist lives. In the guise of a kind of mail art, Sedá put in contact the inhabitants of a housing project undergoing renovation, breaking down the conventions of addressing an audience in the art context, as well as stimulating exchanges and relations between the involuntarily participants. Fifth volume of the Tranzit series edited by Vít Havránek and focusing on Central and Eastern European artists.

Emerging pests and vector-borne diseases in Europe Willem Takken, Bart G.J. Knols, 2023-08-28 This is a multi-authored book concerning the perceived threat and recorded increase of emerging pests and vector-borne diseases affecting man and animals in Europe. Historically, Europe suffered from numerous pests and vector-borne diseases, including yellow fever, malaria, plague and typhus. Introduction of hygienic measures, drugs and vector control caused the disappearance of many of these diseases from Europe. In the (sub)tropics, however, many of these diseases still thrive, causing serious health problems for humans and animals. Increased trade, leading to animal and human movement and climate change cause reason to assume that several of these diseases might become re-established or allow 'new' diseases and pests to be introduced in Europe. The recent outbreaks of bluetongue virus in North-western Europe highlights this concern, requiring an effective surveillance systems for the early detection of pests and vector-borne diseases. In 24 chapters this book provides examples of the most likely pests and diseases affecting man and animals in Europe, with emphasis on ecological factors favouring these diseases and methods for prevention and intervention. The authors are recognized experts in specific fields. All chapters are peer reviewed.

Change Management Frank Voehl, H. James Harrington, 2016-03-23 Change Management: Manage Change or It Will Manage You represents a substantial core guidance effort for Change Management practitioners. Organizations currently contend with increasingly higher levels of knowledge-driven competition. Many attempt to meet the challenge by investing in expensive knowledge-driven change management systems. Such systems are useless, and sometimes even harmful, for making strategic decisions because they do not distinguish between what is strategically relevant and what is not. This Management-for-Results Handbook focuses on identifying and managing the specific, critical knowledge assets that your organization needs to disrupt your competitors, including tacit experience of key employees, a deep understanding of customers' needs, valuable patents and copyrights, shared industry practices, and customer- and supplier-generated innovations. The authors present two aspects of Change Management: (1) traditional Change Management as it impacts the project management team's activities and (2) a suggested new approach to Change Management directed at changing the culture. The focus is to prepare the people impacted by the project and change activities to accept and adapt to the new/changed working conditions. The first half of the book deals with traditional Change Management, which covers the topics of remembering, understanding, and applying. The second half presents the authors' new approach to changing the culture, which deals with analyzing, evaluating, and creating.

Aesthetic Programming Winnie Soon, Geoff Cox, 2020-12-31 The book explores the technical as well as cultural imaginaries of programming from its insides, demonstrating the reflexive practice of aesthetic programming, to understand and question existing technological objects and paradigms.

Computer-Related Risks Peter G. Neumann, 1994-10-18 This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future. —Ralph Nader, Consumer Advocate This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

Science, Worldviews and Education Michael Matthews, 2009-07-14 This book has its origins in a special issue of the journal Science & Education (Volume 18 Numbers 6–7, 2009). The essay by Costas Skordoulis – 'Science and Worldviews in the Marxist Tradition' – did not appear in that special issue due to a mistake in production scheduling. It was published in an earlier issue of the journal (Volume 17 Number 6, 2008), but has been included in this book version of the special issue. As explained in the Introduction, the catalyst for the journal special issue was the essay on 'Science, Worldviews and Education' submitted to the journal by Hugh G. Gauch Jr. This was circulated to the other contributors who were asked to write their own contribution in the light of the arguments and literature contained in the paper. Hugh made brief 'Responses and Clarifications' after the papers were written. However the Tanis Edis article on Islam and my own article on Priestley were processed too late to benefit from Hugh's appraisal. The journal is associated with the International History, Philosophy, and Science Teaching Group which was formed in 1987. The group stages biennial international conferences and occasional regional conferences (details can be found at www.ihpst.org). The group, though the journal, conferences, and its electronic newsletter (at www.ihpst.org).

Foundations of GTK+ Development Andrew Krause,2007-09-09 There are only two mainstream solutions for building the graphical interface of Linux-based desktop applications, and GTK+ (GIMP Toolkit) is one of them. It is a necessary technology for all Linux programmers. This book guides the reader through the complexities of GTK+, laying the groundwork that allows the reader to make the leap from novice to professional. Beginning with an overview of key topics such as widget choice, placement, and behavior, readers move on to learn about more advanced issues. Replete with real-world examples, the developer can quickly take advantages of the concepts presented within to begin building his own projects.

Global Marketing (First Edition) Johny Johansson,Michael Furick,2016-01-27 The New Global Marketing: Local Adaptation for Sustainability and Profit discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths and weaknesses and analyze opportunities and risks in foreign markets. It discusses the proper balance between standardization and localization, and addresses the importance of the triple bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, The New Global Marketing is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.

The Art of Finding Nemo Mark Cotta Vaz,2015-11-10 Pixar Animation Studios, the Academy Award-winning creators of Toy Story, Toy Story 2, A Bug's Life, and Monsters, Inc., are bringing a new animated movie, Finding Nemo, to the screen this summer. This visually stunning underwater adventure follows eventful and comic journeys of two fish-a father and his son Nemo-who become separated in the Great Barrier Reef. The underwater world for the film was conceptualized and developed by the creative team of artists, illustrators, and designers at Pixar, resulting in a lush landscape rich with detail. The Art of Finding Nemo celebrates their talent, featuring concept and character sketches, storyboards, and lighting studies in a huge spectrum of media, from five-second sketches to intricate color pastels. This behind-the-scenes odyssey invites the reader into the elaborate creative process of animation films through interviews with all the key players at Pixar. There will be children's books related to Finding Nemo, but no adult titles other than this definitive volume. Revealing, insightful, and awesomely creative, The Art of Finding Nemo will delight film-goers, artists, and animation fans alike.

Contemporary India Neera Chandhoke,Praveen Priyadarshi,2009 Edited by Neera Chandhoke and Praveen Priyadarshi, Contemporary India addresses issues facing the nation-state and civil society from diverse perspectives: those of political science, sociology, economics and history. The book is thematically divided into three parts Economy, Society, and Politics and includes discussions on topics as wide-ranging as poverty, regional disparities, policies, social change and social movements, the elements of democracy, dynamics of the party system, secularism, federalism, decentralization, and so on. The common thread of democracy, which strings together different aspects of contemporary India, serves as the framework of understanding here and underlies discussions in all the chapters. The book includes 23 original, well-researched and up-to-date chapters by authors who teach different courses in the social sciences. Without compromising on the complexity of their arguments, the authors have used a lucid, conversational style that will attract even readers who have no previous knowledge of the topics. The contributors have also provided a glossary, questions and further readings lists with students examination needs in mind.

The Drowner Robert Drewe,2001-09-03 In the warm alkaline waters of the public bath a headstrong young engineer accidentally collides with a beautiful actress. From this innocent collision of flesh begins a passion that takes them from the Wiltshire Downs to the most elemental choices of life and death in the Australian desert. Their intense romance is but part of the daring story that unfolds. Mingling history, myth and technology with a modern cinematic and poetic imagination, Robert Drewe presents a fable of European ambitions in an alien landscape, and a magnificently sustained metaphor of water as the life-and-death force.
