H. Kelly-Holmes

Principles and Practice in Second Language Acquisition Stephen D. Krashen, 1987

English as a Global Language David Crystal, 2012-03-29 Written in a detailed and fascinating manner, this book is ideal for general readers interested in the English language.

How to Improve Your Foreign Language Immediately Boris Shekhtman, 2013-05 This is the third edition of a popular book that provides a unique set of tools designed to enhance an individual's success in communication in a foreign language environment. The devices presented allow the speaker of a foreign language to demonstrate the level of his/her language more impressively. These techniques were developed and tested by the author with adult professionals in such varied fields as journalism, diplomacy, government, and international business.

Advertising as Multilingual Communication H. Kelly-Holmes, 2016-01-11 Advertising has traditionally communicated messages to consumers with strong local and national identities. However, increasingly, products, producers, advertising agencies and media are becoming internationalized. In the development of strategies that appeal to a large multinational consumer base, advertising language takes on new 'multilingual' features. The author explores the role of advertising language in this new globalized environment, from a communicative theory point of view, as well as from a close linguistic analysis of some major advertising campaigns within a multicultural and multilingual marketplace.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal

sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Creative Curriculum Teaching Strategies,Gryphon House,Delmar Thomson Learning,1988-01-01
The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explaining appropriate practice.

Deep Learning for Coders with fastai and PyTorch Jeremy Howard,Sylvain Gugger,2020-06-29 Deep learning is often viewed as the exclusive domain of math PhDs and big tech

companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A.

Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

An Introduction to Language and Linguistics Ralph Fasold,Jeffrey Connor-Linton,2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert

who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Raising a Bilingual Child Barbara Zurer Pearson, 2008-04-15 If you would like your children to experience the benefits of becoming bilingual, but you aren't sure how to teach them a second language, then *Raising a Bilingual Child* is the perfect step-by-step guide for you. *Raising a Bilingual Child* provides parents with information, encouragement, and practical advice for creating a positive bilingual environment. It offers both an overview of why parents should raise their children to speak more than one language and detailed steps parents can take to integrate two languages into their child's daily routine. *Raising a Bilingual Child* also includes inspirational first-hand accounts from parents. It dispels the myth that bilingualism may hinder a child's academic performance and explains that learning languages at a young age can actually enhance a child's overall intellectual development.

Inside the C++ Object Model Stanley B. Lippman,1996 There is a lot of misinformation and myth about the overhead and costs associated with C++. Now Stan Lippman, the acclaimed author of the C++ Primer, answers the call for a book that gives strategy guidelines for C++ programming. Inside the C++ Object Model explains where overhead costs reside and what they actually consist of. The author explains which parts vary by implementation and which are invariant. He tells how the various implementation models arose, points out areas where they are likely to evolve, and explains why they are what they are. This book is a must for C++ programmers who want to understand the semantic implications of the C++ object model and how the model affects their programs.
