**Foucault's Pendulum** Umberto Eco,2014-08-29 Three book editors, jaded by reading far too many crackpot manuscripts on the mystic and the occult, are inspired by an extraordinary conspiracy story told to them by a strange colonel to have some fun. *World in the Balance: The Historic Quest for an Absolute System of Measurement* Robert P. Crease,2011-10-24 The epic story of the invention of a global network of weights, scales, and instruments for measurement. Millions of transactions each day depend on a reliable network of weights and measures. This network has been called a greater invention than the steam engine, comparable only to the development of the printing press. Robert P. Crease traces the evolution of this international system from the use of flutes to measure distance in the dynasties of ancient China and figurines to weigh gold in West Africa to the creation of the French metric and British imperial systems. The former prevailed, with the United States one of three holdout nations. Into this captivating history Crease weaves stories of colorful individuals, including Thomas Jefferson, an advocate of the metric system, and American philosopher Charles S. Peirce, the first to tie the meter to the wavelength of light. Tracing the dynamic struggle for ultimate precision, World in the Balance demonstrates that measurement is both stranger and more integral to our lives than we ever suspected.

**The Other Quiet Revolution** José E. Igartua,2011-11-01 The Other Quiet Revolution traces the under-examined cultural transformation woven through key developments in the formation of Canadian nationhood, from the 1946 Citizenship Act and the 1956 Suez crisis to the Royal Commission on Bilingualism and Biculturalism (1963-70) and the adoption of the federal multiculturalism policy in 1971. José Igartua analyzes editorial opinion, political rhetoric, history textbooks, and public opinion polls to show how Canada's self-conception as a British country dissolved as struggles with bilingualism and biculturalism, as well as Quebec's constitutional demands, helped to fashion new representations of national identity in English-speaking Canada based on the civic principle of equality.
