Tuning in to the neo-avant-garde Inge Arteel,Lars Bernaerts,Siebe Bluijs,Pim Verhulst,2021-07-06 Bringing together an international and diverse group of scholars, *Tuning in to the neo-avant-garde* offers the first in-depth study of the radio medium's significance as a site of artistic experimentation for the literary neo-avant-garde in the postwar period. Covering radio works from the 1950s until the 2010s, the collection charts how artists across the UK, Europe and North America continued as well as reacted to the legacies of the historical avant-garde and modernism, operating within different national broadcasting contexts, by placing radio in an intermedial dialogue with prose, poetry, theatre, music and film. In doing so, the volume explores a wide variety of acoustic genres – radio play, feature, electroacoustic music, radiophonic poem, radio opera – to show that the medium deserves to occupy a more central place than it currently does in studies of literature, (inter)media(lity) and the (neo-)avant-garde.

Controller Tuning Optimization Methods for Multi-Constraints and Nonlinear Systems Maude Josée Blondin,2021-01-06 This book covers controller tuning techniques from conventional to new optimization methods for diverse control engineering applications. Classical controller tuning approaches are presented with real-world challenges faced in control engineering. Current developments in applying optimization techniques to controller tuning are explained. Case studies of optimization algorithms applied to controller tuning dealing with nonlinearities and limitations like the inverted pendulum and the automatic voltage regulator are presented with performance comparisons. Students and researchers in engineering and optimization interested in optimization methods for controller tuning will utilize this book to apply optimization algorithms to controller tuning, to choose the most suitable optimization algorithm for a specific application, and to develop new optimization techniques for controller tuning.

The Tuning of Place Richard Coyne,2010-03-26 How pervasive digital devices—smartphones, iPods, GPS navigation systems, and their networks—us formulate a sense of place and refine social relationships How do pervasive digital devices—smartphones, iPods, GPS navigation systems, and cameras, among others—influence the way we use spaces? In *The Tuning of Place*, Richard Coyne argues that these ubiquitous devices and the networks that support them become the means of making incremental adjustments within spaces—of tuning place. Pervasive media help us formulate a sense of place, writes Coyne, through their capacity to introduce small changes, in the same way that tuning a musical instrument invokes the subtle process of recalibration. Places are inhabited spaces, populated by people, their concerns, memories, stories, conversations, encounters, and artifacts. The tuning of place—whereby people use their devices in their interactions with one another—is also a tuning of social relations. The range of ubiquity is vast—from the familiar phones and hand-held devices through RFID tags, smart badges, dynamic signage, microprocessors in cars and kitchen appliances, wearable computing, and prosthetics, to devices still in development. Rather than catalog achievements and predictions, Coyne offers a theoretical framework for discussing pervasive media that can inform developers, designers, and users as they contemplate interventions into the environment. Processes of tuning can lead to consideration of themes highly relevant to pervasive computing: intervention, calibration, wedges, habits, rhythm, tags, taps, tactics, thresholds, aggregation, noise, and interference.

Tuning the Student Mind Molly Beauregard,2020-07-01 How can we rethink teaching practices to include and engage the whole student? What would student experience look like if we integrated silence and feeling with empirical analysis? *Tuning the Student Mind* is the story of one teacher's attempt to answer these questions by creating an innovative college course that marries the spiritual and the theoretical, integrating meditation and self-reflection with more conventional academic curriculum. The book follows Molly Beauregard and her students on their intellectual and spiritual journey over the course of a semester in her class, Consciousness, Creativity, and Identity. Interweaving personal stories, student writing, and Beauregard's responses, along with recommendations for further reading and a research appendix, it makes the case for the transformative power of consciousness-centered education. Written in a warm, engaging voice that reflects Beauregard's teaching style, *Tuning the Student Mind* provides an accessible, step-by-step template for other educators, while inviting readers more broadly to reconnect with the joy of learning in and beyond the classroom.
