Jessica Pressler (New York) delves into the personal and professional rivalry between Tory and Christopher Burch, former spouses now competing to dominate the fashion world. Peter

Whoriskey (Washington Post) exposes the human cost of promoting pharmaceuticals off-label. Charles Duhigg and David Barboza (New York Times) investigate Apple's unethical labor practices in China. Max Abelson (Bloomberg) reports on Wall Street's amusing reaction to the diminishing annual bonus. Mina Kimes (Fortune) recounts the grisly story of a company's illegal testing—and misuse—of a medical device for profit, and Jeff Tietz (Rolling Stone) composes one of the most poignant and comprehensive portraits of the financial crisis's dissolution of the American middle class.

**Information Security Best Practices** George L Stefanek, 2002-04-19 Protecting computer networks and their client computers against willful (or accidental) attacks is a growing concern for organizations and their information technology managers. This book draws upon the author's years of experience in computer security to describe a set of over 200 rules designed to enhance the security of a computer network (and its data) and to allow quick detection of an attack and development of effective defensive responses to attacks. Both novice and experienced network administrators will find this book an essential part of their professional tool kit. It is also essential reading for a corporate or organization manager who needs a solid understanding of the issues involved in computer security.
