Controversies in Management Alan B Thomas,2005-07-25 As managerial roles diversify, the phenomenon of management becomes increasingly puzzling. Demand for formal management training, theories and qualifications has increased, yet our ability to think critically about management has diminished. At a time of organizational and environmental turbulence, the question of effective management is more complex than ever. Unpicking the puzzles faced by both the manager and the student of management, this introductory guide explores the major issues of management, organization and knowledge, asking questions of our 'guru' culture and raising debates on so-called expert thinking. Written from the viewpoint that the most effective managers are those that can think for themselves and put aside the advice of the management 'guru', it is a topical, challenging and thought-provoking study. Thoroughly revised and reorganized, this second edition features two completely new chapters that cover gender issues in management, debates on globalization, post-modernity and the future of management. Designed to bring readers into the debate, rather than simply providing a framework of answers, this new edition also includes an orientation questionnaire, discussion questions for each area covered and further reading suggestions.

Tourism in the Middle East Rami Daher,2007 'Tourism in the Middle East' embodies a multi-discursive approach to the study of tourism in the region, offering not only different perspectives but qualifying local knowledge and realities.

**Yes? No! Maybe...** Emilyn Claid,2006-09-27 Covering fifty years of British dance, from Margot Fonteyn to innovative contemporary practitioners such as Wendy Houstoun and Nigel Charnock, Yes? No! Maybe is an innovative approach to performing and watching dance. Emilyn Claid brings her life experience and interweaves it with academic theory and historical narrative to create a dynamic approach to dance writing. Using the 1970s revolution of new dance as a hinge, Claid looks back to ballet and forward to British independent dance which is new dance's legacy. She explores the shifts in performer-spectator relationships, and investigates questions of subjectivity, absence and presence, identity, gender, race and desire using psychoanalytical, feminist, postmodern, post-structuralist and queer theoretical perspectives. Artists and practitioners, professional performers, teachers, choreographers and theatre-goers will all find this book an informative and insightful read.

**An Introduction to the Geography of Health** Helen Hazen,Peter Anthamatten,2012-05-23 Health issues such as the emergence of infectious diseases, the potential influence of global warming on human health, and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world. A geographic approach to the study of health offers a critical perspective to these issues, considering how changing relationships between people and their environments influence human health. An Introduction to the Geography of Health provides an accessible introduction to this rapidly growing field, covering theoretical and methodological background. The text is divided into three sections which consider distinct approaches and techniques related to health geographies. Section one introduces ecological approaches, with a focus on how natural and built environments affect human health. For instance, how have irrigation projects influenced the spread of water-borne diseases? How can modern healthcare settings, such as hospitals, affect the spread and evolution of pathogens? Section two discusses social aspects of health and healthcare, considering health as not merely a biological interaction between a pathogen and human host, but as a process that is situated among social factors which ultimately drive who suffers from what, and where disease occurs. Section three then considers spatial techniques and approaches to exploring health, giving special focus to the growing role of cartography and geographic information systems (GIS) in the study of health. This clearly written text contains a range of pedagogical features including a wealth of global case studies, discussion questions and suggestions for further reading at the end of each chapter, a colour plate section and over eighty diagrams and figures. The accompanying website also provides presentations, exercises, further resources, and tables and figures. This book is an essential introductory text for undergraduate students studying Geography, Health and Social Studies.

*If I Ever Get Out of Here* Eric Gansworth,2013-07-30 A heart-healing, mocs-on-the-ground story of music, family and friendship. -- Cynthia Leitich Smith, author of Tantalize and Rain is Not My Indian Name. Lewis Shoe Blake is used to the joys and difficulties of life on the Tuscarora Indian reservation in 1975: the joking, the Fireball games, the snow blowing through his roof. What he's not used to is white kids being nice to him -- kids like George Haddonfield, whose family recently moved to town with the Air Force. As the boys connect through their mutual passion for music, especially the Beatles, Lewis has to lie more and more to hide the reality of his family's poverty from George. He also has to deal with the vicious Evan Reininger, who makes Lewis the special target of his wrath. But when everyone else is on Evan's side, how can he be defeated? And if George finds out the truth about Lewis's home -- will he still be his friend? Acclaimed adult author Eric Gansworth makes his YA debut with this wry and powerful novel about friendship, memory, and the joy of rock 'n' roll.

*The Paris System for Reporting Urinary Cytology* Eva M. Wojcik,Daniel F.I. Kurtycz,Dorothy L. Rosenthal,2022-02-03 The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

Covering a wide range of topics of central importance to architecture today, the papers also address the related topics to which architecture and architectural studies are inextricably linked. The invited authors draw on sociology, philosophy, cultural studies and the sciences to round out the collection and highlight the breadth and vitality of modern architectural studies, offering perspectives from different disciplines as well as different corners of the globe.

Global Nomads Anthony D'Andrea,2007-01-24 Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D’Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

**Earth's Climate Response to a Changing Sun** Katja Matthes,Thierry Dudok de Wit,Jean Lilensten,2021 For centuries, scientists have been fascinated by the role of the Sun in the Earth's climate system. Recent discoveries, outlined in this book, have gradually unveiled a complex picture, in which our variable Sun affects the climate variability via a number of subtle pathways, the implications of which are only now becoming clear. This handbook provides the scientifically curious, from undergraduate students to policy makers with a complete and accessible panorama of our present understanding of the Sun-climate connection. 61 experts from different communities have contributed to it, which reflects the highly multidisciplinary nature of this topic. The handbook is organised as a mosaic of short chapters, each of which addresses a specific aspect, and can be read independently. The reader will learn about the assumptions, the data, the models, and the unknowns behind each mechanism by which solar variability may impact climate variability. None of these mechanisms can adequately explain global warming observed since the 1950s. However, several of them do impact climate variability, in particular on a regional level. This handbook aims at addressing these issues in a factual way, and thereby challenge the reader to sharpen his/her critical thinking in a debate that is frequently distorted by unfounded claims.
