**The Least Developed Countries Report 2013** United Nations, 2013 The Least Developed Countries Report 2013 analyses the employment challenge of the Least Developed Countries (LDCs). Demographic projections indicate that around 225 million people in LDCs will be entering the labour force until 2030. Hence, creating sufficient and decent employment opportunities for all will be a real challenge. However, recent experience shows that the link between growth and employment in LDCs is not automatic. The LDC Report 2013 aims to raise awareness and galvanize the attention of policymakers to the magnitude of the problem. It also reviews and analyses recent labour market performance of the LDCs, compares it with the future needs in relation to job creation, and elaborates concrete policy recommendations for growth with employment.

**50 Years of Solar System Exploration** Linda Billings, 2020 To commemorate the 50th anniversary of the first successful planetary mission, Mariner 2 sent to Venus in 1962, the NASA History Program Office, the Division of Space History at the National Air and Space Museum, NASA's Science Mission Directorate, and the Jet Propulsion Laboratory organized a symposium. Solar System Exploration @ 50 was held in Washington, D.C., on 25-26 October 2012. The purpose of this symposium was to consider, over the more than 50-year history of the Space Age, what we have learned about the other bodies of the solar system and the

processes by which we have learned it. Symposium organizers asked authors to address broad topics relating to the history of solar system exploration such as various flight projects, the development of space science disciplines, the relationship between robotic exploration and human spaceflight, the development of instruments and methodologies for scientific exploration, as well as the development of theories about planetary science, solar system origins and implications for other worlds. The papers in this volume provide a richly textured picture of important developments - and some colorful characters - in a half century of solar system exploration. A comprehensive history of the first 50 years of solar system exploration would fill many volumes. What readers will find in this volume is a collection of interesting stories about money, politics, human resources, commitment, competition and cooperation, and the faster, better, cheaper era of solar system exploration-

**Understanding Facial Expressions in Communication** Manas K. Mandal, Avinash Awasthi, 2014-10-10 This important volume provides a holistic understanding of the cultural, psychological, neurological and biological elements involved in human facial expressions and of computational models in the analyses of expressions. It includes methodological and technical discussions by leading scholars across the world on the subject. Automated and manual analysis of facial expressions, involving cultural, gender, age and other variables, is a growing and important area of research with important implications for cross-

cultural interaction and communication of emotion, including security and clinical studies. This volume also provides a broad framework for the understanding of facial expressions of emotion with inputs drawn from the behavioural sciences, computational sciences and neurosciences.

**Contemporary Anarchist Studies** Randall Amster, Abraham DeLeon, Luis Fernandez, Anthony J. Nocella, II, Deric Shannon, 2009-02-10 This volume of collected essays by some of the most prominent academics studying anarchism bridges the gap between anarchist activism on the streets and anarchist theory in the academy. Focusing on anarchist theory, pedagogy, methodologies, praxis, and the future, this edition will strike a chord for anyone interested in radical social change. This interdisciplinary work highlights connections between anarchism and other perspectives such as feminism, queer theory, critical race theory, disability studies, post-modernism and post-structuralism, animal liberation, and environmental justice. Featuring original articles, this volume brings together a wide variety of anarchist voices whilst stressing anarchism's tradition of dissent. This book is a must buy for the critical teacher, student, and activist interested in the state of the art of anarchism studies.

*Internet Security* Man Young Rhee, 2003-07-25 Knowledge of number theory and abstract algebra are pre-requisites for any engineer designing a secure internet-based system. However, most of the books currently available on the subject are aimed at practitioners who just want to know how the various

tools available on the market work and what level of security they impart. These books traditionally deal with the science and mathematics only in so far as they are necessary to understand how the tools work. Internet Security differs by its assertion that cryptography is the single most important technology for securing the Internet. To quote one reviewer if every one of your communication partners were using a secure system based on encryption, viruses, worms and hackers would have a very hard time. This scenario does not reflect the reality of the Internet world as it currently stands. However, with security issues becoming more and more important internationally, engineers of the future will be required to design tougher, safer systems.

Internet Security:

- \* Offers an in-depth introduction to the relevant cryptographic principles, algorithms protocols - the nuts and bolts of creating a secure network
- \* Links cryptographic principles to the technologies in use on the Internet, eg. PGP, S/MIME, IPsec, SSL TLS, Firewalls and SET (protecting credit card transactions)
- \* Provides state-of-the-art analysis of the latest IETF standards plus summaries and explanations of RFC documents
- \* Authored by a recognised expert in security

Internet Security is the definitive text for graduate students on security and cryptography courses, and researchers in security and cryptography areas. It will prove to be invaluable to professionals engaged in the long-term development of secure systems.

**Political Debate and the Role of the Media** European Audiovisual

Observatory,2004 This report is based on the discussions and presentations given at a workshop, held in June 2004, and organised by the European Audiovisual Observatory and its partner organisation, the Institute for Information Law (IViR) of the University of Amsterdam. The purpose of the workshop was to discuss various aspects of political debate and the role played by the media.

**Innovation U 2.0** Louis G. Tornatzky,Elaine C. Rideout,2014

**The Economist** ,2002

Propaganda and Conflict Mark Connelly,Jo Fox,Ulf Schmidt,Stefan Goebel,2020-11-26 Propaganda has always played a key role in shaping attitudes during periods of conflict and the academic study of propaganda, commencing in earnest in 1915, has never really left us. We continue to want to understand propaganda's inner-workings and, in doing so, to control and confine its influence. We remain anxious about pernicious information warfare campaigns, especially those that seemingly endanger liberal democracy or freedom of thought. What are the challenges, then, of studying propaganda studies in the twenty-first century? Much scholarship remains locked into the study of state-led campaigns, however an area of special concern in recent years has been the loss of official control over the basic instruments of mass communication. This has been seen in the rise of 'fake news' and the ability of non-state actors to influence political events. This volume presents the latest research in propaganda studies, featuring contributions

from a range of leading scholars and covering the most cutting-edge scholarship in the study of propaganda from World War I to the present.

International Space Law Frans G. von der Dunk, 2018 The scholarly contributions presented in this timely collection address the special realm of legal rules pertinent to space activities and their terrestrial applications. Outer space is generally considered a global commons, so this volume focuses on the international regime which is also the foundation of an increasing number of national space laws. Topics covered concern the development, character and structure of international space law, its relationship with national space law, and the military and commercial aspects of space activities, including launching and satellite applications. Together with an original introduction by the editor, this fascinating collection provides a comprehensive overview of the most important matters relating to international space law and will be a valuable research tool for academics and practitioners alike.

*Advances in Computer Entertainment* Anton Nijholt, Teresa Romão, Dennis Reidsma, 2012-10-12 This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics

across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.

*"Leave None to Tell the Story"* Alison Liebhafsky Des Forges, Human Rights Watch (Organization), 1999 \*\*\* Law and Order

*The House as a Product* Andreas Vogler, 2016 In the coming age minimal embodied energy and low ecological footprints are renewed values that will be added to energy-positive housing and that will have an influence on the building technology of the future. Other materials will have to be chosen and developed to function in building elements and components.

*The Future of the Chemical Industry by 2050* Rafael Cayuela Valencia, 2013-03-27 Discussing the technological supremacy of the chemical industry, including pharmaceuticals, and how it will adopt a leading position to solve some of the largest global challenges humans have even seen, this book details how the industry will address climate change, aging populations, resource scarcity, globality, networks speed, pandemics, and massive growth and demand. Following a detailed introduction to some of the megatrends shaping our world over the forthcoming decades, the book goes on to provide several scenarios of how the world could look by 2050, including 'business as usual' and a 'sustainable' one. Chapter 3 gives a comprehensive overview of

the current status, while providing a short historical review of the chemical industry, its origins, achievements and fundamentals. The following chapter reviews the potential impact of each of the selected megatrends on the industry, while Chapter 5 proposes how it could look by 2050. Several features of the chemical industry are presented and discussed, including the industrial relevance from an economical, technological and profitability point of view. The largest chemicals markets in absolute and per capita bases and the areas and countries with largest growth potential for chemicals, pharmaceuticals and feedstock. This chapter also reviews the impact of climate change on the chemical industry from a feedstocks and products point of view and, more specifically, the potential costs in reducing CO<sub>2</sub> emissions. A final, concluding chapter summarizes the forthcoming megatrends and potential challenges, opportunities and the outlook for the industry as a whole.
