Air Purifier Zhonglin Xu,2018-09-03 This book discusses the development, types and application principles of portable air purifiers in China. It analyzes the theoretical characteristics of air purifiers under various operational conditions, and points out that the term "Clean Air Delivery Rate" cannot be used to precisely reflect the problems that occur under various operational conditions. By comparing theoretical and measured data, it highlights the main features of air purifiers and key points in the design process for different applications. Calculation methods for the indoor particle concentration and the self-purification time are also provided. The book describes the conditions for window opening in smog and for selecting air purifiers, and proposes a new method for improving their measurement. In closing, it includes a new assessment index.

Low Tox Life Alexx Stuart,2018-06-27 Ever stopped to read the list of ingredients in the products you use every day? In *Low Tox Life*, activist and educator Alexx Stuart gently clears a path through the maze of mass-market ingredient cocktails, focusing on four key areas: Body, Home, Food and Mind. Sharing the latest science and advice from experts in each area, Alexx tackles everything from endocrine-disruptors in beauty products to the challenge of going low plastic in a high-plastic world, and how to clean without a hit of harmful toxins. You don't need to be a fulltime homesteader with a cupboard full of organic linens to go low tox. Start small, switching or ditching one nasty at a time, and enjoy the process as a positive one for you and the planet.

Learning from SARS Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2004-04-26 The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

Clearing the Air Institute of Medicine,Division of Health Promotion and Disease Prevention,Committee on the Assessment of Asthma and Indoor Air,2000-05-24 Since about 1980, asthma prevalence and asthma-related hospitalizations and deaths have increased substantially, especially among children. Of particular concern is the high mortality rate among African Americans with asthma. Recent studies have suggested that indoor exposures—to dust mites, cockroaches, mold, pet dander, tobacco smoke, and other biological and chemical pollutants—may influence the disease course of asthma. To ensure an appropriate response, public health and education officials have sought a science-based assessment of asthma and its relationship to indoor air exposures. *Clearing the Air* meets this need. This book examines how indoor pollutants contribute to asthma—its causation, prevalence, triggering, and severity. The committee discusses asthma among the general population and in sensitive subpopulations including children, low-income individuals, and urban residents. Based on the most current findings, the book also evaluates the scientific basis for mitigating the effects of indoor air pollutants implicated in asthma. The committee identifies priorities for public health policy, public education outreach, preventive intervention, and further research.

WHO global air quality guidelines Weltgesundheitsorganisation,World Health Organization,2021-09-07 The main objective of these updated global guidelines is to offer health-based air quality guideline levels, expressed as long-term or short-term concentrations for six key air pollutants: PM_{2.5}, PM₁₀, ozone, nitrogen dioxide, sulfur dioxide and carbon monoxide. In addition, the guidelines provide interim targets to guide reduction efforts of these pollutants, as well as good practice statements for the management of certain types of PM (i.e., black carbon/elemental carbon, ultrafine particles, particles originating from sand and duststorms). These guidelines are not legally binding standards; however, they provide WHO Member States with an evidence-informed tool, which they can use to inform legislation and policy. Ultimately, the goal of these guidelines is to help reduce levels of air pollutants in order to decrease the enormous health burden resulting from the exposure to air pollution worldwide.

Handbook of Modern Hospital Safety William Charney,1999-03-12 As the need for attentive health care becomes more important than ever, on-the-job risks to physicians, nurses, and related professionals have continued to relentlessly increase. Ever-changing technology, new and unforeseen hazards, the dramatic shift to managed care, and a lack of skilled workers have only heightened the difficulties of maintaining safe environments for caregivers and patients alike. For guidance on health care worker protection, safety specialists have found definitive advice and guidance in William Charney's *Essentials of Modern Hospital Safety*, Volumes I to III - introduced by Lewis Publishers during the early 1990s. Charney now offers all the important details of that three-volume series, combined with an additional volume's worth of information, in a convenient, single-volume *Handbook of Modern Hospital Safety*. It's a tragic irony: the industry dedicated to healing and recovery has now become the second highest compensable injury sector—even more hazardous than manufacturing. Make sure your health care professionals have the skills, tools and awareness to protect themselves—and, in turn, their patients—with the *Handbook of Modern Hospital Safety*.

Urban Airborne Particulate Matter Fathi Zereini,Clare L. S. Wiseman,2011-02-16 This book presents the most up-to-date research and information regarding the origin, chemistry, fate and health impacts of airborne particulate matter in urban areas, a topic which has received a great deal of attention in recent years due to documented relationships between exposure and health effects such as asthma. With internationally recognised researchers and academics presenting their work and key concepts and approaches from a variety of disciplines, including environmental and analytical chemistry, biology, toxicology, mineralogy and the geosciences, this book addresses the topic of urban airborne particulate matter in a comprehensive, multidisciplinary manner. Topics and research addressed in the book range from common methodological approaches used to sample and analyse the composition of airborne particulates to

our knowledge regarding their potential to impact human health and the various policy approaches taken internationally to regulate particulate matter levels.

WHO Guidelines for Indoor Air Quality ,2010 This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.
