Saving Time Jenny Odell,2024-01-02 NEW YORK TIMES BESTSELLER • “The visionary author of *How to Do Nothing* returns to challenge the notion that ‘time is money.’ . . . Expect to feel changed by this radical way of seeing.”—*Esquire* “One of the most important books I’ve read in my life.” —Ed Yong, author of *An Immense World* A BEST BOOK OF THE YEAR: Harper’s Bazaar, *Esquire*, Chicago Public Library In her first book, *How to Do Nothing*, Jenny Odell wrote about the importance of disconnecting from the “attention economy” to spend time in quiet contemplation. But what if you don’t have time to spend? In order to answer this seemingly simple question, Odell took a deep dive into the fundamental structure of our society and found that the clock we live by was built for profit, not people. This is why our lives, even in leisure, have come to seem like a series of moments to be bought, sold, and processed ever more efficiently. Odell shows us how our painful relationship to time is inextricably connected not only to persisting social inequities but to the climate crisis, existential dread, and a lethal fatalism. This dazzling, subversive, and deeply hopeful book offers us different ways to experience time—inspired by pre-industrial cultures, ecological cues, and geological timescales—that can bring within reach a more humane, responsive way of living. As planet-bound animals, we live inside shortening and lengthening days alongside gardens growing, birds migrating, and cliffs eroding; the stretchy quality of waiting and desire; the way the present may suddenly feel marbled with childhood memory; the slow but sure procession of a pregnancy; the time it takes to heal from injuries. Odell urges us to become stewards of these different rhythms of life in which time is not reducible to standardized units and instead forms the very medium of possibility. *Saving Time* tugs at the seams of reality as we know it—the way we experience time itself—and rearranges it, imagining a world not centered on work, the office clock, or the profit motive. If we can “save” time by imagining a life, identity, and source of meaning outside these things, time might also save us.

168 Hours Laura Vanderkam,2011-05-31 It's an unquestioned truth of modern life: we are starved for time. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or if we don't make excuses, we make sacrifices- taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you'll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter.

It's about Time Phyllis Moen,2018-08-06 How do two-career couples manage in a one-career world?It's about Time examines this mismatch between outdated scripts and the experiences of dual-earner couples. It broadens our understanding of occupational and family career strategies couples use in light of the widening gap between their real lives and the outdated work-hour and career-path roles, rules, and regulations they confront. It's about Time draws on the data from the Cornell Couples and Careers Study to demonstrate that:*Regardless of income, time is a scarce commodity in dual-earner households. With two jobs, two commutes, often long work hours, high job demands, business travel, several cars, children, ailing relatives, and/or pets - time is always an issue.*Time is built into jobs and career paths in ways that make continuous full-time (40 or typically more hours a week) paid work a fact of life in American society. *The multiple strands of life—career, family and personal—unfold over time. Spouses move through their life courses in tandem, with early choices - to have children or not, to work long hours or not, to switch jobs or not, to relocate for his or her career or not—all having long-term consequences for life quality and for gender inequality.The evidence from this book suggests that it is about time for the United States to confront the realities and needs of contemporary working couples and indeed, all members of the new workforce. To do so requires more than Band-Aid, short-term (and often short-sighted) policy remedies. It's about Time argues that it is essential to re-imagine and reconfigure work hours, workweeks, and occupational career paths in ways that address the widening gaps between the time needs and goals of workers and their families, at all ages and stages of the life course.

Catholics, Conflicts and Choices Angela Coco,2014-09-12 Many Catholics today are disenchanted with the Church's continuing distrust of women and laity. But, despite this widespread dissatisfaction, traditional power relations have hardly changed over the last century. *Catholics, Conflicts and Choices* presents detailed interviews with lay people, priests, Sisters, and Christian Brothers, each discussing their personal struggles with church teachings and practices. The conversations are selected to illustrate different experiences of power relations - particularly different aspects of gender dynamics - within the organisational structures of the Church. The interviews are examined within a framework of feminist, sociological and psychological theory. *Catholics, Conflicts and Choices* reveals how, despite a long history of challenging official notions of authority and obedience and assumptions about intimate relationships, there is little potential for change if the established power relations of the Church are not confronted.

It then covers more advanced x-ray techniques as well as imaging with radioactive materials. The text also focuses on radiobiology, risk and radiation protection, and imaging with non-ionising radiation. The final chapter discusses data handling in a modern, electronic radiology department.

Mastered by the Clock Mark M. Smith,2000-11-09 *Mastered by the Clock* is the first work to explore the evolution of clock-based time consciousness in the American South. Challenging traditional assumptions about the plantation economy's reliance on a premodern, nature-based conception of time, Mark M. Smith shows how and why southerners--particularly masters and their slaves--came to view the clock as a legitimate arbiter of time. Drawing on an extraordinary range of eighteenth- and nineteenth-century archival sources, Smith demonstrates that white southern slaveholders began to incorporate this new sense of time in the 1830s. Influenced by colonial merchants' fascination with time thrift, by a long-held familiarity with urban, public time, by the transport and market revolution in the South, and by their own qualified embrace of modernity, slaveowners began to purchase timepieces in growing numbers, adopting a clock-based conception of time and attempting in turn to instill a similar consciousness in their slaves. But, forbidden to own watches themselves, slaves did not internalize this idea to the same degree as their masters, and slaveholders found themselves dependent as much on the whip as on the clock when enforcing slaves' obedience to time. Ironically, Smith shows, freedom largely consolidated the dependence of masters as well as freedpeople on the clock.
