The DAM Book Peter Krogh, 2009-04-27 One of the main concerns for digital photographers today is asset management: how to file, find, protect, and re-use their photos. The best solutions can be found in *The DAM Book*, our bestselling guide to managing digital images efficiently and effectively. Anyone who shoots, scans, or stores digital photographs is practicing digital asset management (DAM), but few people do it in a way that makes sense. In this second edition, photographer Peter Krogh -- the leading expert on DAM -- provides new tools and techniques to help professionals, amateurs, and students: Understand the image file lifecycle: from shooting to editing, output, and permanent storage Learn new ways to use metadata and key words to track photo files Create a digital archive and name files clearly Determine a strategy for backing up and validating image data Learn a catalog workflow strategy, using Adobe Bridge, Camera Raw, Adobe Lightroom, Microsoft Expression Media, and Photoshop CS4 together Migrate images from one file format to another, from one storage medium to another, and from film to digital Learn how to copyright images To identify and protect your images in the marketplace, having a solid asset management system is essential. *The DAM Book* offers the best approach.

Practical Common Lisp Peter Seibel, 2006-11-01 * Treats LISP as a language for commercial applications, not a language for academic AI concerns. This could be considered to be a secondary text for the Lisp course that most schools teach . This would appeal to students who sat through a LISP course in college without quite getting it -- so a nostalgia approach, as in *wow-lisp* can be practical... * Discusses the Lisp programming model and environment. Contains an introduction to the language and gives a thorough overview of all of Common Lisp's main features. * Designed for experienced programmers no matter what languages they may be coming from and written for a modern audience--programmers who are familiar with languages like Java, Python, and Perl. * Includes several examples of working code that actually does something useful like Web programming and database access.

Object-Oriented Information Systems Dimitri Konstantas, Michel Leonard, Yves Pigneur, Shusma Patel, 2003-09-09 The conference on Object Oriented Information Systems (OOIS) is now an established international conference where innovative ideas, research, applications, and experiences in the design, development, and use of object oriented information systems, from both the academic and industrial environments, are presented. The ninth OOIS conference was held at the University of Geneva, September 2-5, 2003. The main theme was the Evolution of Object Oriented Information Systems. The papers presented ideas and issues related to the evolution, adaptability, restructuring, and flexibility of OOIS. In the context of the conference, 7 workshops and four tutorials were organized providing a discussion forum for new ideas and including in depth presentations on important "hot" subjects. The three invited speakers of the ninth OOIS conference provided an alternative view on OOIS and their evolution. Prof. John Mylopoulos (University of Toronto and VLDB president) gave the opening presentation entitled "Agent Oriented IS Development" , Dr. Richard Soley (OMG President and CEO) gave the closing presentation entitled "Model Driven Architecture: The Evolution of Object-Oriented Systems?" and Prof. Lina Al-Jadir (American University of Beirut) gave the theme presentation entitled "Once Upon a Time a DTD Evolved into Another DTD...".

The Book of R Tilman M. Davies, 2016-07-16 The Book of R is a comprehensive, beginner-friendly guide to R, the world's most popular programming language for statistical analysis. Even if you have no programming experience and little more than a grounding in the basics of mathematics, you'll find everything you need to begin using R effectively for statistical analysis. You'll start with the basics, like how to handle data and write simple programs, before moving on to more advanced topics, like producing statistical summaries of your data and performing statistical tests and modeling. You'll even learn how to create impressive data visualizations with R's basic graphics tools and contributed packages, like ggplot2 and ggvis, as well as interactive 3D visualizations using the rgl package. Dozens of hands-on exercises (with downloadable solutions) take you from theory to practice, as you learn: –The fundamentals of programming in R, including how to write data frames, create functions, and use variables, statements, and loops –Statistical concepts like exploratory data analysis, probabilities, hypothesis tests, and regression modeling, and how to execute them in R –How to access R's thousands of functions, libraries, and data sets –How to draw valid and useful conclusions from your data –How to create publication-quality graphics of your results Combining detailed explanations with real-world examples and exercises, this book will provide you with a solid understanding of both statistics and the depth of R's functionality. Make The Book of R your doorway into the growing world of data analysis.

U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer,Lt.-Col. Lane Rogers,Dr. V. Keith Fleming Jr.,2016-08-09 This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines

with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Introduction to Parallel Computing Wesley P. Petersen, Peter Arbenz, 2004 This is a practical student guide to scientific computing on parallel computers, working up from a hardware instruction level, to shared memory machines, and finally to distributed memory machines.

Transforming Early Years Policy in the U.S. Mark K. Nagasawa, Lacey Peters, Marianne N. Bloch, Beth Blue Swadener, 2023 This timely collection provides an accessible discussion and analysis of some of the most urgent policy issues facing early childhood care and education in the United States: fragmented policy systems; broad disregard for early years professionals exemplified by low pay; standards that fail to increase equity; and overlooking the role community contexts plays in producing or ameliorating social inequalities among children. Contributors draw upon their deep personal experiences with these issues as educators, scholars, and advocates to advance practice-based recommendations for how the nation's inequitable systems can be transformed. Their call to collective action is supported by an accessible and powerful advocacy toolkit that will grow with readers over time and with practice. The text centers the perspectives of Black, Indigenous, and other People of Color, with a clear focus on the effects of systemic racism, ageism, sexism, classism, and associated oppressions on early years policies and programs in the U.S. Book Features: Concise essays that acknowledge the demands on contemporary readers' time. Authors that represent a cross section of educators, advocates, researchers, and leaders who are in dialogue with each other. Personal stories that illustrate how policies and systems affect people, making an urgent case for transforming early care and education policies. A call for action that includes tools for linking personal reflection to collective action. Contributors include Lea Austin, Stephanie Curenton, Kerry Ann Escayg, Lucinda Heimer, Iheoma Iruka, Jacqueline Jones, Anna Lees, and Chrishana Lloyd.
