The Making of a US Marine-Scholar Dr. George A. Baker III,2020-01-24 The Making of a US Marine Scholar, in the original long work and the three works now published by iuniverse, Baker shares a theory of leadership that can be applied by change oriented leaders in a multitude of cultures and organizations. This volume is subtitled, Hail to the Chief, which begins with the surprise assignment as the Executive Officer, designate at the Presidential Retreat, Camp David. He then was selected for the military staff of the President of the United States, Lyndon B. Jonson. The second tour in vietnam brings an unusual WIA,a challenging relationship with one leader, and salvation with another. The third volume is a must read as Baker transitions to higher education and fights to win advancement to the more prestigious positions, and finds that his military and political skills properly applied bring continuing success. Dr. Baker is the author of twenty books, and numerous articles and technical reports. He is the editor of the first ever Handbook on the Community College in America.

F-4 Phantom Pilot's Flight Operating Manual Periscope Film Com,2006-08-15 One of the great aircraft of the Cold War era, the McDonnell Douglas F-4 Phantom II was the most heavily produced supersonic, all-weather fighter bomber. Capable of a top speed of Mach 2.23, it set sixteen world records including an absolute speed record of 1,606 mph and an altitude record of 98,557 feet. The F-4 flew Vietnam, in the Arab-Israeli conflict, and the Gulf War and amassed a record of 393 aerial victories. F-4s also flew as part of the USAF Thunderbirds and the U.S. Navy Blue Angels flight demonstration teams. Originally printed by McDonnell and the U.S. Navy in the 1960s, this flight operating handbook taught pilots everything they needed to know before entering the cockpit. Classified restricted, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Care has been taken however to preserve the integrity of the text.

Haunted Worcestershire Anthony Poulton-Smith,2009-07-01 Anthony Poulton-Smith takes the reader on a fascinating A-Z tour of the haunted hotspots of Worcestershire. Contained within the pages of this book are strange tales of spectral sightings, active poltergeists, and restless spirits appearing in streets, inns, churches, estates, public buildings, and private homes across the area. They include tales from Worcester, Bewdley, Droitwich, Bromsgrove, Tenbury Wells, and Stourport-on-Severn. This new collection of stories, a product of both historical accounts and numerous interviews conducted with local witnesses, is sure to appeal to all those intrigued by Worcestershire's haunted heritage.

Down These Mean Streets Larry Correia,Kacey Ezell,2024-01-02 NEW FANTASY AND SCIENCE FICTION STORIES WITH A HARDBOILED NOIR TWIST—FOCUSING ON THE MEAN STREETS OF THE CITY “Down these mean streets a man must go who is not himself mean, who is neither tarnished nor afraid.” —Raymond Chandler Humans have always been fascinated by darkness. Especially the darkness of a city at night, when the black sky is made ever more inky by the pools of illumination dropped under streetlights. We harken to the sound of streetcars in the distance. We are drawn to the garish flash of club signs and marquees. We love the danger of shadowed alleyways, of wealth and poverty living side by side. We love the city. It's a part of us. Whether the mean streets be in an alternate past charmed with dark magic or the dirty alleyways of futuristic crowded space stations, the city—and its darkened streets—will always fascinate us. Here then, an anthology of all new stories of science fiction and fantasy with a hardboiled noir twist that acknowledge that the city is a living, breathing entity...and it isn't always on our side. Stories by: Laurell K. Hamilton, Larry Correia, Kacey Ezell, Mike Massa, Steve Diamond, Robert E. Hampson, Chris Kennedy, Marisa Wolf, Griffin Barber, Robert Buettner, Hinkley Correia, Casey Moores, Patrick M. Tracy, and Dan Willis. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for No Game for Knights: “The authors successfully create a fantasy pastiche of Chanderlesque hardboiled fiction.” —Tangent Online Praise for Noir Fatale: “Marvelous is a good word to describe all of the stories in the book . . . Noir Fatale is a book that will charm both noir fans, and general science fiction and fantasy readers. Correia and Ezell have created a captivating mix of stories.” —The Galveston County Daily News “[A] wonderfully diverse collection of stories from a broad range of authors and it delivers in spades . . . It is a diverse and exciting slice of Noir and Fatale and a great read.” —SFRevu Praise for Larry Correia and the Monster Hunter International series: “[E]verything I like in fantasy: intense action scenes, evil in horrifying array, good struggling against the darkness, and most of all people— gorgeously flawed human beings faced with horrible moral choices that force them to question and change and grow.” —Jim Butcher “[A] no-holds-barred all-out page turner that is part science fiction, part horror, and an absolute blast to read.” —Bookreporter.com “If you love monsters and action, you'll love this book. If you love guns, you'll love this book. If you love fantasy, and especially horror fantasy, you'll love this book.” —Knotclan.com “This lighthearted, testosterone-soaked sequel to 2009's Monster Hunter International will delight fans of action horror with elaborate weaponry, hand-to-hand combat, disgusting monsters, and an endless stream of blood and body parts.” —Publishers Weekly on Monster Hunter Vendetta Praise for the work of Kacey Ezell: “Gritty, dark and damp. Much like the war itself.” —Michael Z. Williamson “I loved Minds of Men.” —D.J. Butler “A lot of good scifi writers write war, but sometimes forget that it is fought by actual people, and even in the midst of war, you don't stop being people while you fight. If you want a good read that dares you to think about what it is like to go to war when you can't hide behind the masks you learn to wear, check it out.” —John T. Mainer

CO2 Free Ammonia as an Energy Carrier Ken-ichi Aika,Hideaki Kobayashi,2022-11-01 This book describes important findings in intensive studies conducted in Japan on ammonia as an energy carrier. It illustrates an advanced solar-heat capture system and storage materials at 600°C and hydrogen production with SOECs and a new IS method through the use of heat. New industrial ammonia catalysts and a demonstration process that started running in Fukushima are also introduced. Advanced ammonia decomposition catalysts and the process that were developed for use by the hydrogen station are presented. An advanced direct ammonia fuel cell was developed and the base data are shown. The book explains that ammonia is used as a fuel for industrial applications because its burning can be controlled without emitting extra NOx in the gas turbine and the real coal co-fired power plant. These breakthroughs have made a strong impact in the world as a practical technology for CO2 reduction. Also provided here are the scientific and industrial backgrounds as well as the environmental assessment and economic evaluation for the future.This book will be helpful for all who are interested in energy technology—researchers, students, and strategy planners at companies and in the government.

The Making of a Marine-Scholar Dr. George A. Baker III,2012-07-11 Dr. George A. Baker III distinguished himself both as a marine and educator; in this memoir, he looks back at a long life dedicated to serving others. From his boyhood in Sumter, South Carolina, to entering the service during the Cold War to his experiences on the battlefield, Baker examines his actions and those of others with refreshing honesty. As a confidante and contemporary to high-ranking military men, presidents, and Washington insiders, Bakers ascension through the military ranks allowed him to witness and analyze political and social changes from a unique perspective. He ultimately rose to the rank of lieutenant colonel, and his perspective of the Cold War, Vietnam, and politics provided him with a strong foundation to excel in his second career as an educator. Baker draws upon his experiences as a soldier, tactician, and teacher to share a theory of leadership that can be applied in various settings. Numerous vignettes offer powerful learning opportunities in various contexts. In *The Making of a Marine-Scholar*, discover untold history as well as what it really means to serve your country and fellow man. Baker presents a blueprint for living a rewarding life that has purpose and meaning.

Simulation and Experiment in Laser Metrology Zoltan Füzessy,Werner Jüotner,Wolfgang Osten,1996 These proceedings document about 45 contributions to the International Symposium on Laser Applications in Precision Measurement held in Balatonfüred/Hungary during June 3-6, 1996. Special emphasis was given to the Combination of Simulation and Experiment in Laser Metrology. International experts provide a survey over a large variety of their latest achievements and developments in this rapidly advancing field. Over the last years, optical measurement techniques like structured illumination, holographic interferometry and tomography were applied more and more in combination with CAE-tools such as CAD and FEM. This combination has found a world of new applications in scientific and industrial branches interested in highly exact but nondestructive and noncontact measurement of technical components. Each of the four sections contains an overview article given by international leading experts. With that the proceedings should be considered to be a state-of-the-art report combining the areas of mathematical modeling of objects, experimental testing under definite stresses, computer-aided evaluation and measuring of objects.

Afterburner John Darrell Sherwood,2004-05-31 View the Table of Contents. Read the Prologue. An exceptionally well written, well documented, fast-moving account.—Washington Times This is a book written on multiple levels, and well worth reading.—M.S. Naval Institute Proceedings This book is a welcome addition to the history of naval aviation and fills a much-needed void by detailing the later years of the Vietnam naval air campaign.—Sea Power Makes for lively, vivid, and informative reading. I would include it...on my list of the top ten books on the air war in Vietnam. —Air Power History John Sherwood has done a fine job in giving us a first-rate account of a confusing but critically important period in Naval Aviation history.—The Hook As a collection of individual studies and 'war stories,' *Afterburner* should find an interested readership. —Military History With a 45-degree dive angle set, 450 knots of airspeed building, and my altimeter unwinding like crazy, my scan went rapidly between the bombsight and flight instruments. . . . When I looked over my shoulder at the target, I could see where the bombs had hit and exploded. Through stories like this diary entry of a fighter pilot, John Darrell Sherwood brings forth the personal accounts of 21 naval and marine aviators in this chronicle of the second half of the Navy's air war over Vietnam. Despite spending over 200 billion dollars and dropping almost 8 million tons of bombs on Southeast Asia, the U.S. was unable to score a definitive victory in the air war. *Afterburner* takes us inside the day-to-day operations of the air war, particularly during the most intense year of the campaign: 1972. During that year, North Vietnam launched the first large-scale conventional attacks on strongholds in South Vietnam. Sherwood shows how the U.S. fought back with some of the most innovative air campaigns in its history, including Nixon's Linebacker bombings and the Navy's mining operation in Haiphong Harbor. From duels with enemy MiGs to the experiences of Commander C. Ronald Polfer, who became the voice of reason among American POWs in the Hanoi Hilton's Room 5, the detailed stories in *Afterburner* make these historical events come to life. Sherwood compiles and analyzes an incredible breadth of information about the details of each of the Navy's operations during the air war and then relates the key parts of the narrative through the eyes of an pilot or flight officer involved in each action. Through tales of courage and fear, triumph and horror, Sherwood reveals the lives of common aircrews who performed extraordinary service. Their experiences illustrate the personal nature of war—even from the air—and show that the air war in Vietnam may have begun as a slow burn, but by 1972, it was more intense than an F-4 afterburner.

Digital Holography: Applications and Emerging Technologies Peter Wai Ming Tsang,Tsing-Chung Poon,Yaping Zhang,Pietro Ferraro,2023-07-13 With the rapid growth of computing and display technologies, digital holography (DH) has undergone significant advancement in the past two decades. Contemporary research works have enabled holography, a technology which is originally intended for displaying three-dimensional (3-D) images, to be deployed in numerous scientific, engineering, and bio-medical applications. Notably, digital holography has been incorporated into quite a number of contemporary applications, such as, but limited to holographic cryptography, optical metrology, remote sensing and inspection, and more recently, quantum computing. The success attained with DH so far does not limit its development to its current state-of-the-art, but rather research on holography keeps on expanding, with new ideas and methods keep coming up in a sustainable manner. This Research Topic aims to collect representative works from experts in the field, with the aim of providing an insight on the overall picture on digital holography, as well as reporting existing methodologies and emerging technologies that are likely to have strong impact on future research directions. Participating in the Research Topic, either as authors or readers, also facilitates establishing a platform for researchers to network, and to share their knowledge.
