

Phases Of The Moon Ad 507

Herman Heine Goldstine

Technical Abstract Bulletin Defense Documentation Center (U.S.),1964

Government-wide Index to Federal Research & Development Reports ,1965

New and Full Moons 1001 B.C. to A.D. 1651 Herman Heine Goldstine,1973 Originally pub. in 1973; reprinted in 1994. Presents tables giving the dates of all new and full moons during an historical era when these data were of considerable interest and importance. The longitudes of the moon at each of these times is also given, as is a consecutive enumeration of the conjunctions and a similar one of the oppositions. All dates are reckoned in the Julian calendar. These dates and times are calculated for an observer in Babylon, or equivalently Baghdad, since this location is fairly centrally located for the historians of the period. The time used is civil time and is based on a 24-hour clock with its origin at midnight. Since this vol. may be considered as a suppl. to Tuckerman's tables, all fundamental astronomical elements have been taken from them.
